# Machine Learning - IV (PCCS7010T)

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

## Prerequisite: Knowledge of

1. Basic Machine Learning
2. Database Management System

## Course Objectives:

To teach advance concepts of data management and data analysis for Big Data.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Evaluate the need of MapReduce framework.	L5	Evaluate
CO2	Apply appropriate method to handle big data.	L3	Apply
CO3	Apply suitable analysis method to draw conclusions from given big data.	L3	Apply

# Course Contents

---

## Unit-I

04 Hrs.

**Map-Reduce:** The Map Tasks, Grouping by Key, The Reduce Tasks, Combiners, Details of Map-Reduce Execution, Coping with Node Failure; Algorithms using MapReduce: Matrix-Vector multiplication by MapReduce, Selection, Projection, Natural Join, Union, Intersection, Difference, Matrix Multiplication.

## Unit-II

08 Hrs.

**Mining Data Stream:** The Stream Model, Sampling Data in a Stream, Filtering Streams: The Bloom Filter; Counting distinct element in the Stream: The Count-Distinct Problem, The Flajolet-Martin Algorithm; Estimating Moments: The Alon-Matias-Szegedy Algorithm for Second Moments, Higher-Order Moments, Dealing with Infinite Streams; Counting ones in a window: The cost of exact count, The DGIM algorithm, Storage Requirement, Query Answering.

## Unit-III

08 Hrs.

**Link Analysis:** PageRank: Search Engine, Term Spam, PageRank, Structure of Web, Avoiding Dead Ends, Spider Traps and Taxation, Efficient Computing of PageRank: Transition Matrices, Iteration using MapReduce, Topic Sensitive PageRank: Biased Random Walk, Using Topic Sensitive PageRank, Inferring Topics from Words. Link Spam: Architecture, Analysis of Spam Farm, Combating Link Spam, Trust Rank, Spam Mass. Hubs and Authorities, HITs Algorithm.

## Unit-IV

06 Hrs.

**Frequent Itemsets:** The Market-Basket model: Association Rules, A-Priori, Representation of Market-Basket Data, Monotonicity of itemset, Handling Larger Datasets in Main Memory: The Multistage Algorithm, The Multihash Algorithm, Limited-Pass Algorithms: Randomized Algorithm, Avoiding error in sampling algorithms, Counting Frequent Itemsets in a Stream: Frequent Itemsets in a decaying window.

## Unit-V

06 Hrs.

**Clustering:** Clustering Strategies, The Curse of Dimensionality, Hierarchical Clustering in a Euclidean Space and Non-Euclidean Spaces, The CURE Algorithm: Initialization, Completion, Representing Clusters in a GRGPF Algorithm, Initializing Cluster Tree, Adding Points, Splitting and Merging Clusters. Clustering for Streams and Parallelism: The Stream-Computing Model, Initializing, Merging Buckets, Answering Queries.

## Unit-VI

07 Hrs.

**Social Network Analysis:** Social Networks as Graphs, Clustering of Social Network Graphs: Distance Measure, Betweenness, The Girvan- Newman Algorithm, Betweenness to find communities, Direct discoveries of Communities: Finding Cliques, Complete Bipartite Graphs, Partition of Graphs: Normalized Cuts, Contents: Finding overlapping communities, Maximum Likelihood Estimation, The Affiliation Graph Model, SimRank: Random walkers on Social Media, Approximate SimRank, Counting Triangles, Neighborhood Properties of a graph.

2. Search Engine: <https://moz.com/blog/search-engine-algorithm-basics>

### Evaluation Scheme:

**Theory :**

**Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

**Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

**End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Machine Learning - IV Laboratory (PCCS7010L)

---

## Practical Scheme

Practical : 02 Hrs./week  
Credit : 01

## Examination Scheme

Teacher Assessment : 25 Marks  
End Sem Exam : 25 Marks  
Total : 50 Marks

---

## Course Objectives:

1. Understand MapReduce.
2. Perform Video Summarization and Community detection.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Perform, Implement and Execute Matrix Multiplication, sorting using MapReduce.	L6	Create
CO2	Apply MapReduce for Market basket Analysis.	L3	Apply
CO3	Video Summarization using Cure Algorithm and Community detection using Girvan	L2	Understand
CO4	Perform Similarity analysis using SimRank.	L3	Apply

# List of Laboratory Experiments

---

## Suggested Experiments:

1. Execute Matrix Multiplication using MapReduce.
2. Perform Sorting using MapReduce.
3. Implement Bloom Filter using MapReduce.
4. Approximate the number of unique elements in a data stream or database in one pass using Flajolet-Martin Algorithm.
5. Compute stochastic matrix from a given graph, compute PageRank vector and return the results.
6. Identify which page belongs to Link farm in a given graph. Compute trustrank vector.
7. Perform Market-Basket analysis using MapReduce.
8. Video Summarization using Cure Algorithm.
9. Community detection using Girvan- Newman Algorithm.
10. Similarity analysis using SimRank.

Minimum eight experiments from the above suggested list or any other experiment based on syllabus will be included, which would help the learner to apply the concept learnt.

## Evaluation Scheme:

### Laboratory:

#### Continuous Assessment (A):

Laboratory work will be based on PCCS7010T with minimum 08 experiments to be incorporated. The distribution of marks for term work shall be as follows:

1. Performance in Experiments: 05 Marks
2. Journal Submission: 05 Marks
3. Viva-voce: 05 Marks
4. Subject Specific Lab Assignment/Case Study: 10 Marks

The final certification and acceptance of term work will be subject to satisfactory performance of laboratory work and upon fulfilling minimum passing criteria in the term work.

#### End Semester Examination (C):

Oral/ Practical examination will be based on the entire syllabus including, the practicals performed during laboratory sessions.

# Image Processing and Computer Vision-II(PCCS7020T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

## Prerequisite: Knowledge of

1. Mathematics for Intelligent System
2. Machine Learning -I and II
3. IPCV -I

## Course Objectives:

To introduce theory and computation related to imaging geometry, and scene understanding. Also, to provide exposure to clustering, classification and deep learning techniques applied in computer vision.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand various data capturing methods.	L2	Understand
CO2	Apply appropriate object detection and object segmentation methods.	L3	Apply
CO3	Apply suitable method to analyze complex vision data.	L3	Apply
CO4	Develop suitable vision model for prediction.	L6	Create

# Course Contents

---

## Unit-I

06 Hrs.

**Camera Geometry Model:** Camera Geometry Model: Basics of Real Aperture Camera, Lens as LSI System, Geometric Projective, 2D Transformations, 3D Transformations, Homography Computation, planar homography, Camera geometry, Stereo geometry, Linear Filtering, Correlation, Convolution, Hierarchy of Transformations, Rotational Representation, Weak perspective projection and orthographic projection, coordinate system, camera parameters and camera calibration Algorithm.

## Unit-II

08 Hrs.

### Object Detection:

**Two Stage/Proposal:** Convolutional Neural Networks for Detection: R-CNN, Fast R-CNN, Faster R-CNN, RFCN and Mask RCN; Architecture and Issues in each algorithm. visualization of Kernels; Backprop-to-image/Deconvolution Methods.

**One Stage/Proposal Free:** YOLO, SSD, evaluation metrics (IoU, AP), Non-max suppression YOLO Loss function, Variants of YOLO.

**Face Recognition and Verification:** Zero-shot, One-shot, Few-shot Learning; Siamese Networks, Triplet Loss, Contrastive Loss, Ranking Loss; Attention Models in Vision, Spatio-temporal Models, Action/Activity Recognition, Region-based convolutional neural network, Semantic segmentation.

## Unit-III

06 Hrs.

**Generative Models:** Types of generative models: Implicit and Explicit density; Generative Adversarial Network; Vanilla GAN, Mode Collapse in GAN, Conditional GAN, DC GAN, GAN objective functions, JSD Divergence, EM Distance Least Squares.

## Unit-IV

06 Hrs.

**Transfer Learning:** Introduction to Transfer Learning, Options in Transfer Learning, Transfer Learning with ResNet50, Network architecture for Object Localization, Evaluating Object Localization, AlexNet, VGG and Inception architectures, Fine-grained image recognition, Detection and classification of facial attributes, Content based image retrieval, Computing semantic image embeddings using convolutional neural networks, Employing indexing structures for efficient retrieval of semantic neighbors, The reidentification problem in computer vision Facial key points regression, CNN for key points regression. Ensemble methods; Bagging.

## Unit-V

07 Hrs.

**Object Segmentation:** Semantic segmentation, Scene Parsing, semantic flow, Bilinear Interpolation, Symmetry in Segmentation, Featured image pyramid, pixel-wise softmax, PSPNet, FPN, UNet

SyNet, clustering method for segmentation, Distance metrics( Euclidean, Cosine, Hamming, Manhattan, Minkowski, Chebyshev, Jaccard, Haversine, Sorensen-Dice), Linkage Types (Single, Average, Complete, Centroid)

## Unit-VI

06 Hrs.

**Motion Analysis and action recognition:** Introduction to motion analysis, Horn and Shunck method, Lucas-Kanade algorithm for optical flow, Deep learning in optical flow estimation. Motion models. Introduction to action recognition, Action classification, Action localization. Spatio-Temporal Analysis, Dynamic Stereo; Motion parameter estimation. Visual object tracking methods and its examples, multiple objects tracking methods, Tomasi and Kanade Motion factorization algorithm, Applications of feature point tracking: mosaicing, video stabilization, structure from motion.

### Evaluation Scheme:

#### Theory :

#### Continuous Assessment (A):

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### Continuous Assessment (B):

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### End Semester Examination (C):

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Image Processing and Computer Vision-II Laboratory (PCCS7020L)

---

**Practical Scheme**

Practical : 02 Hrs./week

Credit : 01

**Examination Scheme**

Teacher Assessment : 25 Marks

Total : 25 Marks

---

**Course Objectives:**

To become familiar with CNN, YOLO, GAN, Transfer Learning and U-Net associated with image processing.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Implement basic object detection using YOLO and different CNN models on image dataset.	L3	Apply
CO2	Demonstrate face recognition by hybrid image formation for identification of facial expression classification and detection.	L4	Analyze
CO3	Implement image color conversion and deep fake detection using GAN.	L3	Apply
CO4	Construct transfer learning and U-Net by applying Image classification and Segmentation.	L3	Apply

# List of Laboratory Experiments

---

## Suggested Experiments:

1. Object Detection (CNN): Cancer Cells Detection using Medical Image Processing.
2. Object Detection (CNN): Comparative analysis of different CNN models on Image Dataset.
3. Object Detection (YOLO): Identifying vehicle from a Road Traffic CCTV video Footage.
4. Face Recognition: Facial Key Point Detection, Face verification, Hybrid image formation for identification of facial expression classification and detection.
5. GAN: Converting Black and white image into Colored image.
6. GAN: Deep fake Detection.
7. Transfer Learning: Document Extraction from a pre-defined format.
8. Transfer Learning: Satellite Image classification and Segmentation.
9. Image Segmentation: Image Categorization for a given Vision Dataset.
10. Motion Analysis: Spatio-Temporal Analysis for Body Postures.
11. Mini Project

Subject Teacher can select any six experiments from the given list or add new experiments. At least one experiment on each: CNN, YOLO, GAN, Transfer Learning, U-Net should be implemented.

## Evaluation Scheme:

### Laboratory:

#### Continuous Assessment (A):

Laboratory work will be based on PCCS7020T with minimum 06 experiments to be incorporated. The distribution of marks for term work shall be as follows:

1. Performance in Experiments: 05 Marks
2. Journal Submission: 05 Marks
3. Viva-voce: 05 Marks
4. Subject Specific Lab Assignment/Case Study: 10 Marks

The final certification and acceptance of term work will be subject to satisfactory performance of laboratory work and upon fulfilling minimum passing criteria in the term work.

# Applied Data Science Laboratory (PCCS7030L)

---

**Teaching Scheme**

Practicals : 02 Hrs./week

Credits : 01

**Examination Scheme**

Teacher Assessment : 50 Marks

Total : 50 Marks

---

**Prerequisite:** Machine Learning and Data Engineering**Course Objectives:**

To bridge the gaps between industry and academia. Give the exposure of production system and applied data science.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Relate to production systems available in the industry.	L5	Evaluate
CO2	Debug various problems occurred in a data science production system.	L4	Analyze

# Course Contents

---

1. Converting Business problem into Data Science Problem: 02 Hrs
  - (a) Bridging the Qualitative-to-Quantitative Gap in Data Science
  - (b) Right Data Available with the Right Level of Granularity
  - (c) Repeatability and Reproducibility: Consistency in Labelled Data for Accurate AI Systems
  
2. Agile Methodology: 04 Hrs
  - (a) Work Breakdown structure for Agile Models
  - (b) Scrum/XP modelling of Data Science Projects
  - (c) Agile Tools for Project Management
  
3. Data Preparation Best Practice: 02 Hrs
  - (a) Gathering suitable data for Data Science problem
  - (b) Determine all Key Performance Indicators (KPIs)
  - (c) Business stakeholders POC Dashboard
  
4. Data Modelling: 04 Hrs
  - (a) Selection of appropriate tool
  - (b) Data Modelling with Incremental Data
  - (c) Data Modelling with Noisy Data.
  - (d) Data Modelling with different data formats
  
5. Model Building Best Practice: 02 Hrs
  - (a) One hot encoding
  - (b) Selecting right metrics to evaluate the model
  - (c) Identify and minimize Data Leakage
  
6. Modelling and Optimisation Trade-off: 02 Hrs
  - (a) Need of Optimisation
  - (b) Different methods of Optimization
  - (c) Development
  - (d) Rest APIs
  
7. Data Science Project Architecture: 02 Hrs

- (a) Functions of MLOps/DevOps
  - (b) Difference between MLOps and DevOps
  - (c) Collaboration, Scalability and Reusability
8. Project Deployment: 04 Hrs
- (a) Flask
  - (b) Docker
  - (c) Kubernetes
9. A/B Testing: 02 Hrs
- (a) Formulate Hypothesis
  - (b) Create Test Group
  - (c) Compare Results

Based on the given topics subject teachers can prepare 10 experiments consisting of each section.

### **Evaluation Scheme:**

#### **Laboratory:**

#### **Continuous Assessment (A):**

Laboratory work will be based on PCCS7030L with minimum 10 experiments to be incorporated. The distribution of marks for term work shall be as follows:

1. Performance in Experiments: 10 Marks
2. Journal Submission: 10 Marks
3. Viva-voce: 10 Marks
4. Subject Specific Lab Assignment/Case Study: 20 Marks

The final certification and acceptance of term work will be subject to satisfactory performance of laboratory work and upon fulfilling minimum passing criteria in the term work.

# Parallel Computing (PECS7041T)

---

**Teaching Scheme**

Lectures : 03 Hrs./week

Credits : 03

**Examination Scheme**

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

**Prerequisite:** System Fundamentals

**Course Objectives:**

To familiarize students with the fundamental concepts, techniques and tools of parallel computing.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand different structures of Parallel Computers.	L4	Analyze
CO2	Apply parallel algorithms in problem solving.	L3	Apply

# Course Contents

---

## Unit-I

08 Hrs.

**Introduction:** Introduction to Parallel computing, Abstract model of serial & parallel computation, pipelining, data parallelism, control parallelism, scalability, topologies in processor organization, parallel computing design consideration, parallel algorithms & parallel architectures, speedup and efficiency, supercomputers.

## Unit-II

06 Hrs.

**System Architecture:** Shared memory multiprocessors (UMA-Uniform memory Access), Distributed memory multiprocessors (NUMA- Non-Uniform memory Access), SIMD, Systolic processor, Cluster computing, Grid computing, Multicore Systems.

## Unit-III

12 Hrs.

**Parallel Algorithms:** Introduction to parallel algorithms, parallel algorithm models, Decomposition Techniques, characteristics of tasks & interactions, mapping techniques for load balancing, methods for containing interaction overheads. Matrix multiplication, parallel reduction, parallel sorting: bubble, quick sort, Graph algorithm: Minimum spanning tree (prim's algorithm), Fast Fourier transform: serial algorithm, transpose algorithm.

## Unit-IV

08 Hrs.

**Parallel Programming:** Parallel programming models, point to point communication, synchronous and asynchronous communication, shared memory programming, message passing programming, MPI, PVM, Threads.

## Unit-V

05 Hrs.

**Applications of Parallel Programming:** Issues and challenges, scope of parallel computing, applications in data mining, computer security and cryptography, medicine and human organ modelling.

### **Evaluation Scheme:**

**Theory :**

#### **Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### **Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### **End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Parallel Computing Laboratory (PECS7041L)

## Practical Scheme

Practical : 02 Hrs./week

Credit : 01

## Examination Scheme

Teacher Assessment : 25 Marks

Total : 25 Marks

## Course Objectives:

The course gives an overview of the architectures and communication networks employed in parallel computers. The course covers the foundations for development of efficient parallel algorithms, including examples from relatively simple numerical problems, sorting, and graph problems.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand the concepts Parallel Computers.	L4	Analyze
CO2	Develop parallel algorithms for shared address space platform using multithreading.	L3	Apply
CO3	Implement the parallel algorithms like sorting and Graph algorithm.	L3	Apply
CO4	Develop Parallel Programs using OpenMp.	L6	Create

# List of Laboratory Experiments

---

## Suggested Experiments:

1. To implement the parallel construct in OpenMP that creates a parallel region in a C++ code.
2. To write an OpenMP program for illustrating the Fork Join model.
3. To implement SPMD (Single Instruction Multiple Data) parallel program in OpenMP.
4. To write a simple OpenMP program to demonstrate the sharing of loop iteration by number of threads. (Take chunk size of 10).
5. To write an OpenMP program for finding prime numbers.
6. To write OpenMp program to demonstrate sharing of section work by performing arithmetic operations on one dimensional array.
7. To write OpenMP program to perform dot product of two one dimensional arrays.
8. To implement the program for Matrix addition and Matrix multiplication using OpenMp.
9. To implement the program for sorting algorithms (Bubble sort, Quick4 sort) in OpenMP.
10. To implement the program to create Minimum Spanning Tree by using Prims algorithm.

Minimum eight experiments from the above suggested list or any other experiment or mini project based on syllabus will be included, which would help the learner to apply the concept learnt.

## Evaluation Scheme:

### Laboratory:

#### Continuous Assessment (A):

Laboratory work will be based on PECS7041T with minimum 08 experiments to be incorporated.

The distribution of marks for term work shall be as follows:

1. Performance in Experiments: 05 Marks
2. Journal Submission: 05 Marks
3. Viva-voce: 05 Marks
4. Subject Specific Lab Assignment/Case Study: 10 Marks

The final certification and acceptance of term work will be subject to satisfactory performance of laboratory work and upon fulfilling minimum passing criteria in the term work.

# Advanced Computational Linguistics(PECS7042T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

**Prerequisite:** Knowledge of

1. Machine Learning- I and II
2. Computational Linguistics

## Course Objectives:

To teach machine learning and deep Learning techniques to build Computational models for real world applications.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Apply classification techniques on linguistic data.	L3	Apply
CO2	Apply machine Learning and deep learning techniques to build language model.	L3,L6	Apply,Create
CO3	Develop applications based on natural language processing.	L6	Create

# Course Contents

---

## Unit-I

06 Hrs.

**Text Classification:** Text classification definition and datasets, Generative text classifiers (naive Bayes) Discriminative text classifiers (logistic regression), Bag-of-words Generative Classifier, BOW Discriminative Model , Multi-class Classification: Softmax, Gradient Descent, Statistical significance testing, Dataset understanding and creation.

## Unit-II

08 Hrs.

**Language models using Deep Learning Architectures:** : Language Modelling Problem Definition, Count-based Language Models, Measuring Language Model Performance: Accuracy, Likelihood, and Perplexity, Log-linear Language Models, Recurrent Networks: RNNs as Language, RNNs for Sequence Classification, Stacked and Bidirectional RNNs, Managing Context in RNNs: LSTMs and GRUs, Self-Attention Networks: Transformers, Transformers as Autoregressive Language Models.

## Unit-III

09 Hrs.

**Machine Translation and Encoder-Decoder Models:** Encoder-Decoder with RNNs, Conditioned Generation and Search, Ensembling, Evaluation, Types of Data to Condition On Attention mechanism , Beam Search, Encoder-Decoder with Transformers, Some practical details on building MT systems ,MT Evaluation ,Bias and Ethical Issues Improvements to Attention, Specialized Attention Varieties.

## Unit-IV

08 Hrs.

**Multi-task, Multi-domain, and Multi-lingual Learning:** Pre-training Methods: Simple overview of multi-task learning, Sentence embeddings, BERT and variants, Other language modelling objectives Multi-task, Multi-domain, and Multi-lingual Learning: Multi-task Learning, Domain Adaptation and Robustness, Multi-lingual Learning Prompting, Sequence-to-sequence Pre-training: Prompting Methods, Sequence-to-sequence Pre-training, Prompt Engineering, Answer Engineering, Multi-prompt Learning, Prompt-aware Training Method.

## Unit-V

06 Hrs.

**Information Extraction:** Relation Extraction, Relation Extraction Algorithms, Extracting Times, Extracting Events and their Times, Template Filling.

**Question Answering:** Information Retrieval, IR-based Factoid Question Answering, Entity Linking, Knowledge-based Question Answering, Using Language Models to do QA, Classic QA Models, Evaluation of Factoid Answers.

## Evaluation Scheme:

### Theory :

#### Continuous Assessment (A):

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### Continuous Assessment (B):

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### End Semester Examination (C):

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Advanced Computational Linguistics Laboratory (PECS7042L)

---

## Practical Scheme

Practical : 02 Hrs./week

Credit : 01

## Examination Scheme

Teacher Assessment : 25 Marks

Total : 25 Marks

---

## Course Objectives:

To provide the knowledge of operations involved in Natural Language Processing in order to implement complex applications like Spam classifier, Fake News Classifier, Information Retrieval System, Spelling Correction, Text Summarization and Question Answering System.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Use Natural Language Processing to solve language related tasks.	L3	Apply
CO2	Develop various applications based on natural language processing.	L6	Create

# List of Laboratory Experiments

---

## Suggested Experiments:

1. Implement a Spam classifier using Nave Bayes classifier
2. Implement a Sentiment Analysis on linguistic data
3. Implement Fake News Classifier using LSTM-Deep Learning Model
4. Implement Information Retrieval for extracting Text from Webpages and Image
5. Implement Language translator using Encoder Decoder model
6. Implement Document Classifier on multi-category dataset
7. Implement text Summarization using BERT
8. Implement Spelling Check, Spelling Correction and Auto complete using Language models
9. Implement Question Answering System using Deep Learning
10. Mini Project

Minimum eight experiments from the above suggested list or any other experiment or mini project based on syllabus will be included, which would help the learner to apply the concept learnt.

## Evaluation Scheme:

### Laboratory:

#### Continuous Assessment (A):

Laboratory work will be based on PECS7042T with minimum 08 experiments to be incorporated.

The distribution of marks for term work shall be as follows:

1. Performance in Experiments: 05 Marks
2. Journal Submission: 05 Marks
3. Viva-voce: 05 Marks

# IoT Network Enterprise(PECS7043T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

## Prerequisite: Knowledge of

1. Analog and Digital Communication,
2. Embedded Systems and RTOS.

## Course Objectives:

1. Comprehend and differentiate between wired & wireless networks and understand the TCP/IP suite.
2. Differentiate & evaluate existing power management mechanisms for power constrained applications in IoT.
3. Differentiate & discriminate between existing wireless topologies, technologies & protocols as per requirement.
4. Comprehend the security challenges for IoT Domain & evaluate existing SaaS, PaaS and IaaS services.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Outline application & link layer services for wired and wireless applications.	L2	Understand
CO2	Design & optimize sensors, power modules and actuation for constrained environment applications.	L6	Create
CO3	Comprehend and evaluate the mechanism needed for network security of application environment.	L5	Evaluate
CO4	Demonstrate the use of SaaS, PaaS and IaaS services.	L2	Understand

# Course Contents

---

## Unit-I

14 Hrs.

**Introduction to Computer Networks:** Network Protocol Stack- OSI & TCP/IP Model, IoT Enterprise Architecture Switches, Routers & Gateways, IP Addressing, Sub-netting & Routing (OSPF, RIP, EIGRP & BGP). ARP, DHCP, MODBUS-TCP, SMTP (POP3 & IMAP), HTTPS, DNS DDNS & FTP Protocols.

## Unit-II

06 Hrs.

**Sensors Networks:** Definition, Types of Sensors, Types of Actuators, Examples and Working, IoT Development Boards: Arduino IDE and Board Types, RaspberriPi Development Kit, RFID Principles and components, Wireless Sensor Networks: History and Context, The node, Connecting nodes, Networking Nodes, WSN and IoT.

## Unit-III

08 Hrs.

**Wireless Technologies for IoT:** WPAN Technologies for IoT: IEEE 802.15.4, Zigbee, HART, NFC, Z-Wave, BLE, Bacnet, Modbus. IP Based Protocols for IoT: IPv6, 6LowPAN, RPL, REST, AMPQ, CoAP, MQTT. Edge connectivity and protocols.

## Unit-IV

10 Hrs.

**Cybersecurity:** Network Security- Packet Sniffing, ARP and IP Spoofing, Denial of Service attacks, Firewalls and Intrusion Prevention System, Block Ciphers- Data Encryption Standard- DES, Advanced Encryption Standard- AES & RSA Algorithm.  
Cryptographic Hashes & Message Digest- MD5, SHA, CMAC, HMAC.  
Internet Security Protocols- SSL, TLS and IPsec.

## Unit-V

04 Hrs.

**Cloud Services:** Virtualization-Taxonomy & Implementation of levels of Virtualization, Cloud Computing Architecture-Exploring AWS components: EC2, and S3 services.

## Text Books:

1. Ames Kurose, Keith Ross, "Computer Networking: A Top - Down Approach", 6<sup>th</sup> Edition, 2017.
2. Arshdeep Bahga and Vijay Madiseti, "Internet of Things: A Hands-on Approach", Universities Press, 1<sup>st</sup> Edition, 2015.

## Reference Books:

1. Raj Kamal, "Internet of Things: Architecture and Design Principles", McGraw Hill Education, 1<sup>st</sup> Edition, 2017
2. David Hanes, Gonzalo Salgueiro, "IoT Fundamentals Networking Technologies, Protocols and Use Cases for Internet of Things", Cisco Press, 1<sup>st</sup> Edition, 2017.

### **Evaluation Scheme:**

#### **Theory :**

#### **Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### **Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### **End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# IoT Network Enterprise Laboratory (PECS7043L)

---

**Practical Scheme**

Practical : 02 Hrs./week

Credit : 01

**Examination Scheme**

Teacher Assessment : 25 Marks

Total : 25 Marks

---

**Course Objectives:**

1. Illustrate networking devices and protocols.
2. Identify various AWS services.
3. Develop Virtual machine and MQTT protocol for IoT applications.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Demonstrate the working of network devices and different protocols.	L2	Understand
CO2	Implement MQTT protocol.	L3	Apply
CO3	Explain various AWS services.	L5	Evaluate
CO4	Create and run a Virtual Machine on a hosted Hypervisor Oracle Virtualbox	L6	Design

# List of Laboratory Experiments

---

## Suggested Experiments:

1. Device Functionalities using Cisco Packet Tracer - Implementing Hubs, Switches & Routers.
2. IP addressing & Multi-path routing using Wired & Wireless Protocols (RIP & OSPF).
3. Understanding Load Balancing & Server Load, Ethernet delay using Riverbed Modeler.
4. Implementing MQTT (Smart utility meter - Paho MQTT client & Mosquitto Broker) with Raspberry Pi.
5. Implementing LoRa with MQTT & using AWS services as broker-storage.
6. Using YABE, BACnet & MQTT box to report IAQ sensor data How to write reports for functional testing of IoT gateways.
7. Cybersecurity: Using Wireshark & Nmap for packet tracing in promiscuous & non-promiscuous mode using Packet Filters and demonstrate ARP Spoofing and Port Scanning Reconnaissance tools.
8. Implement a hashing-cryptography mechanism using PyCryptodome.
9. Create and run a Virtual Machine on a hosted Hypervisor Oracle Virtualbox.
10. Explore AWS EC2, S3 & Network Security Services provided by AWS.

Minimum eight experiments from the above suggested list or any other experiment or mini project based on syllabus will be included, which would help the learner to apply the concept learnt.

## Evaluation Scheme:

### Laboratory:

### Continuous Assessment (A):

Laboratory work will be based on PECS7043T with minimum 08 experiments to be incorporated.

The distribution of marks for term work shall be as follows:

1. Performance in Experiments: 05 Marks
2. Journal Submission: 05 Marks
3. Viva-voce: 05 Marks
4. Subject Specific Lab Assignment/Case Study: 10 Marks

The final certification and acceptance of term work will be subject to satisfactory performance of laboratory work and upon fulfilling minimum passing criteria in the term work.

# Adversarial Machine Learning(PECS7044T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

## Prerequisite: Knowledge of

1. Mathematics for Intelligent System
2. Machine Learning-I
3. Information Security

## Course Objectives:

Introduces students to adversarial attacks on machine learning models and defense against the attacks. The particular focus is on adversarial examples in deep learning models, due to their prevalence in modern machine learning applications. The course also provides an overview of adversarial attacks against machine learning models used in cybersecurity applications, including malware detection and classification, network intrusion detection, spam filtering, URL detection.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Outline the different categories of adversarial attacks and defenses against conventional machine learning models and deep learning models.	L4	Analyze
CO2	Identify the unique characteristics of adversarial machine learning attacks in the cybersecurity domain.	L3	Apply
CO3	Understand the basics of adversarial privacy attacks and privacy-preserving defense methods.	L2	Understand

# Course Contents

---

## Unit-I

06 Hrs.

**Machine Learning Preliminaries:** Supervised Learning, Supervised Learning in Adversarial Settings, Unsupervised Learning, Unsupervised Learning in Adversarial Settings, Reinforcement Learning in Adversarial Settings, Categories of Attacks on Machine Learning.

**Deep Learning Overview:** Machine learning basics, Introduction to deep learning, Elements of neural networks (NNs), Training NNs, NN architectures.

**Introduction to Adversarial Machine Learning:** Adversarial Machine Learning Taxonomy and History, Statistical Machine Learning, A Framework for Secure Learning: Analyzing the Phases of Learning, Framework, Security Analysis, Exploratory Attacks, Causative Attacks.

## Unit-II

04 Hrs.

**Causative Attacks on Machine Learning:** Availability Attack Case Study: SpamBayes, The SpamBayes Spam Filter, Threat Model for Spam Bayes, The Reject on Negative Impact (RONI) Defense.

**Causative Attacks on Machine Learning:** Integrity Attack Case Study: PCA Detector, PCA Method for Detecting Traffic Anomalies, Corrupting the PCA Subspace, Corruption-Resilient Detectors.

## Unit-III

12 Hrs.

**Evasion Attacks:** Evasion Attacks against White box: Fast gradient sign method (FGSM) attack. Projected gradient descent (PGD) attack, DeepFool attack.

**Black box adversarial attacks:** Query based attacks, Transfer based attacks (or transferability attacks, Attacks on Real Models.

**Defenses Against Evasion Attacks:** Adversarial examples detection, Gradient masking/obfuscation, Robust optimization.

## Unit-IV

12 Hrs.

**Adversarial Machine Learning in Cyber Security:** Malware Detection and Classification: Machine Learning in cybersecurity, Taxonomy of AML attacks in cybersecurity, Malware detection and classification, Adversarial attacks on ML-based malware classifiers, Malware Detection and Classification.

**Network Intrusion Detection:** Network intrusion detection, Datasets for network intrusion detection, Anomaly detection with Machine Learning, Adversarial attacks on ML-based NIDS.

## Unit-V

05 Hrs.

## **Adversarial Machine Learning Challenges:**

Discussion and Open Problems, Unexplored Components of the Adversarial Game, Development of Defensive Technologies

## **Text Books:**

1. Anthony D. Joseph, Blaine Nelson, "Adversarial Machine Learning", Cambridge University Press, 2019, ISBN: 978-1-107-04346-6.

## **Evaluation Scheme:**

### **Theory :**

#### **Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### **Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

**End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Adversarial Machine Learning Laboratory (PECS7044L)

---

**Practical Scheme**

Practical : 02 Hrs./week

Credit : 01

**Examination Scheme**

Teacher Assessment : 25 Marks

Total : 25 Marks

---

**Course Objectives:**

1. Define the basics adversarial attacks on machine learning models
2. Understand the key concept of adversarial attacks against machine learning models used in cyber security applications
3. Explain the concept of network intrusion detection, spam filtering, URL detection etc.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Implement FGSM and PGD.	L3	Apply
CO2	Analyze Attacks on ML systems Network Intrusion Detection, Malware Detection.	L4	Analyze
CO3	Build Mini Project based on attacks on ML.	L6	Create

# List of Laboratory Experiments

---

## Suggested Experiments:

1. Implement non-targeted white-box evasion attacks against the deep learning models: Fast Gradient Sign Method (FGSM), and Projected Gradient Descent (PGD).
2. Implement targeted white-box evasion attacks against the deep learning models.
3. Implement a PGD attack on the DL model ResNet50, and investigate if the adversarial examples transfer to the other conventional ML models.
4. Implement a non-targeted PGD attack on the logistic regression model for the set of 120 images.
5. Implement adversarial defenses for white-box evasions attacks against deep learning-based classification models.
6. Get familiar with ML classification models used in cybersecurity applications and implement adversarial attacks against such models.
7. Attacks on ML systems for Network Intrusion Detection
8. Attacks on ML systems for Malware Detection
9. ML systems for Spam Filtering
10. Mini Project

Minimum eight experiments from the above suggested list or any other experiment or mini project based on syllabus will be included, which would help the learner to apply the concept learnt.

## Evaluation Scheme:

### Laboratory:

#### Continuous Assessment (A):

Laboratory work will be based on PECS7044F with minimum 08 experiments to be incorporated. The distribution of marks for term work shall be as follows:

1. Performance in Experiments: 05 Marks
2. Journal Submission: 05 Marks
3. Viva-voce: 05 Marks
4. Subject Specific Lab Assignment/Case Study: 10 Marks

The final certification and acceptance of term work will be subject to satisfactory performance of laboratory work and upon fulfilling minimum passing criteria in the term work.

# Product Life Cycle Management(OECS7051T)

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

**Prerequisite:** Knowledge of basic concepts of Management

## Course Objectives:

1. To familiarize the students with the need, benefits and components of PLM.
2. To acquaint students with Product Data Management & PLM strategies.
3. To give insights into new product development program and guidelines for designing and developing a product.
4. To familiarize the students with Virtual Product Development.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Gain knowledge about phases of PLM, PLM strategies and methodology for PLM feasibility study and PDM implementation.	L2	Understand
CO2	Illustrate various approaches and techniques for designing and developing products.	L3	Apply
CO3	Apply product engineering guidelines / thumb rules in designing products for moulding, machining, sheet metal working etc.	L3	Apply
CO4	Acquire knowledge in applying virtual product development tools for components, machining and manufacturing plant.	L2	Understand

# Course Contents

---

## Unit-I

10 Hrs.

**Introduction to Product Lifecycle Management (PLM):** Product Lifecycle Management (PLM), Need for PLM, Product Lifecycle Phases, Opportunities of Globalization, Pre-PLM Environment, PLM Paradigm, Importance & Benefits of PLM, Widespread Impact of PLM, Focus and Application, A PLM Project, Starting the PLM Initiative, PLM Applications

**PLM Strategies:** Industrial strategies, Strategy elements, its identification, selection and implementation, Developing PLM Vision and PLM Strategy, Change management for PLM

## Unit-II

08 Hrs.

**Product Design:** Product Design and Development Process, Engineering Design, Organization and Decomposition in Product Design, Typologies of Design Process Models, Reference Model, Product Design in the Context of the Product Development Process, Relation with the Development Process Planning Phase, Relation with the Post design Planning Phase, Methodological Evolution in Product Design, Concurrent Engineering, Characteristic Features of Concurrent Engineering, Concurrent Engineering and Life Cycle Approach, New Product Development (NPD) and Strategies, Product Configuration and Variant Management, The Design for X System, Objective Properties and Design for X Tools, Choice of Design for X Tools and Their Use in the Design Process

## Unit-III

08 Hrs.

**Product Data Management (PDM):** Product and Product Data, PDM systems and importance, Components of PDM, Reason for implementing a PDM system, financial justification of PDM, barriers to PDM implementation

**Virtual Product Development Tools:** For components, machines, and manufacturing plants, 3D CAD systems and realistic rendering techniques, Digital mock-up, Model building, Model analysis, Modelling and simulations in Product Design, Examples/Case studies

## Unit-IV

08 Hrs.

**Integration of Environmental Aspects in Product Design:** Sustainable Development Design for Environment, Need for Life Cycle Environmental Strategies, Useful Life Extension Strategies, End-of-Life Strategies, Introduction of Environmental Strategies into the Design Process, Life Cycle Environmental Strategies and Considerations for Product Design.

## Unit-V

08 Hrs.

**Life Cycle Assessment and Life Cycle Cost Analysis:** Properties, and Framework of Life Cycle Assessment. Phases of LCA in ISO Standards. Fields of Application and Limitations of Life Cycle

Assessment, Cost Analysis and the Life Cycle Approach, General Framework for LCCA, Evolution of Models for Product Life Cycle Cost Analysis.

### **Text Books:**

1. John Stark, "Product Lifecycle Management: Paradigm for 21st Century Product Realization", Springer-Verlag, 2004.
2. Guido La Rosa, Antonino Risitano, Taylor & Francis, "Product Design for the environment-A life cycle approach", Fabio Giudice, 2006.

### **Reference Books:**

2. Michael Grieve, "Product Lifecycle Management: Driving the next generation of lean thinking", Tata McGraw Hill, 2006.
3. Francois Villeneuve, Luc Mathieu, Max Giordano, "Product Life-Cycle Management: Geometric Variations", Wiley, 2010.

### **Evaluation Scheme:**

#### **Theory :**

#### **Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### **Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### **End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Management Information System (OECS7052T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

**Prerequisite:** Knowledge of basic concepts of Management

## Course Objectives:

1. The course is blend of Management and Technical field.
2. Discuss the roles played by information technology in today's business and define various technology architectures on which information systems are built.
3. Define and analyze typical functional information systems and identify how they meet the needs of the firm to deliver efficiency and competitive advantage.
4. Identify the basic steps in systems development.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain how information systems Transform Business.	L2	Understand
CO2	Identify the impact information systems have on an organization.	L3	Apply
CO3	Describe IT infrastructure and its components and its current trends.	L2	Understand
CO4	Understand the principal tools and technologies for accessing information from databases to improve business performance and decision making.	L2	Understand
CO5	Identify the types of systems used for enterprise-wide knowledge management and how they provide value for businesses.	L3	Apply

# Course Contents

---

## Unit-I 05 Hrs.

**Foundation Concepts:** Information Systems in Business, Functional Area Information System, The Components of Information Systems, Impact of IT on organizations and society, Organizational Strategy, Information systems for strategic advantage.

## Unit-II 08 Hrs.

**Information Technologies:** Hardware and Software

**Computer Systems:** End User and Enterprise Computing

**Computer Peripherals:** Input, Output, and Storage Technologies

**Application Software:** End User Applications

**System Software:** Computer System Management

**Data Resource Management:** Technical Foundations of Database Management, Managing Data Resources, Big data, Data warehouse and Data Marts, Knowledge Management

**Networks:** The Networked Enterprise (Wired and wireless), Pervasive computing, Cloud Computing models

## Unit-III 08 Hrs.

**MIS Tools and applications for Decision making:** ERP and ERP support of Business Process Reengineering

**Business intelligence (BI):** Managers and Decision Making, BI for Data analysis and Visualization

**Artificial Intelligence Technologies in Business**

## Unit-IV 06 Hrs.

**Security and Ethical Challenges:** Security, Ethical, and Societal Challenges of IT Security Management of Information Technology.

## Unit-V 07 Hrs.

**Social Computing (SC):** Web 2.0 and 3.0, SC in business-shopping, Marketing, Operational and Analytic CRM, E-business and E-commerce B2B B2C, Mobile commerce.

## Unit-VI 08 Hrs.

**Information System within Organization:** Acquiring Information Systems and Applications: Various System development life cycle models.

**Enterprise and Global Management of Information Technology:** Managing Information Technology, Managing Global IT.

## Reference Books:

1. James A OBrien, George M., Ramesh Behl, "Management Information Systems", 11<sup>th</sup> Edition, Tata McGraw Hill, 2019.

## Evaluation Scheme:

### Theory :

#### Continuous Assessment (A):

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### Continuous Assessment (B):

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### End Semester Examination (C):

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Operations Research (OECS7053T)

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

**Prerequisite:** Basic Knowledge of Algebra, Probability and Statistics

## Course Objectives:

1. To formulate a real-world decision problem as a mathematical programming model.
2. To learn the mathematical tools that are employed to solve mathematical programming models.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Convert a real-world problem in to a Linear Programming Problem and analyse the solution obtained using Simplex method or other algorithms.	L4	Analyze
CO2	Identify real-world problems as Transportation Problem and Assignment Problem and Solve the decision problem by choosing appropriate algorithm.	L3	Apply
CO3	Identify the decision situations which vary with time and analyse them using principle of dynamic programming to real life situations.	L3	Apply
CO4	Explain reasons of formation of queues, classify various queuing systems and apply parameters defined for various queuing systems for decision making in real life situations.	L2	Understand
CO5	Understand the concept of decision making in situation of competition and recommend strategies in case of two-person zero sum games.	L2	Understand
CO6	Describe concept of simulation and apply Monte Carlo Simulation technique to systems such as inventory, queuing and recommend solutions for them.	L2	Understand
CO7	Understand need for right replacement policy and determine optimal replacement age.	L2	Understand

# Course Contents

---

## Unit-I

10 Hrs.

**Introduction to Operations Research:** Concept of decision making. Definition of OR. Formulation of decision problem as OR model, Concept of Optimization

**Linear Programming Problem:** Mathematical Formulation. Finding optimal solution - Graphical method, Simplex Method, Big M-method, Two Phase Method. Duality, Primal Dual construction, Symmetric and Asymmetric Dual. Dual Simplex Method.

## Unit-II

08 Hrs.

**Assignment Problems:** Mathematical Formulation, Finding optimal solution - Hungarian Method

**Transportation problem:** Mathematical Formulation, Finding initial basic feasible solution North-west corner rule, row minima, column minima, least cost method and Vogels approximation method. Optimality test: the stepping stone method and MODI method. Improving the solution.

## Unit-III

06 Hrs.

**Dynamic Programming:** Bellmans Principle of optimality - Applications of dynamic programming- Employment smoothening problem, capital budgeting problem, shortest path problem, cargo loading problem

## Unit-IV

10 Hrs.

**Queuing Models:** Characteristics of queuing models. Single Channel Single and multi phase servers, Poisson arrivals, exponential service time - with infinite population and finite population models with infinite and finite capacity.

Multichannel Single phase server - Poisson arrivals, exponential service time with infinite population.

**Game Theory:** Introduction. Minimax & Maximin Criterion and optimal strategy. Solution of games with saddle points, rectangular games without saddle points -  $2 \times 2$  games, dominance principle.

Approximate methods - Iterative method,  $m \times 2$  &  $2 \times n$  games -Graphical method and method of sub-games. Expressing game as LPP.

## Unit-V

08 Hrs.

**Simulation:** Definition. Types of simulation models. Monte Carlo simulation technique. Applications of simulation - Inventory and Queuing problems. Simulation Languages.

**Replacement Models:** Replacement of items that deteriorate with time - when money value is not counted and counted, Replacement of items that fail suddenly individual and group replacement policy

## **Text Books:**

1. Sharma J. K., "Operations Research", Trinity Press.
2. Gupta P. K., Hira D. S., "Operations Research", S. Chand Limited.

## **Reference Books:**

1. Taha, H.A. "Operations Research - An Introduction", Prentice Hall
2. Ravindran, A, Phillips, D. T and Solberg, J. J., "Operations Research: Principles and Practice", John Willey and Sons
3. Hiller, F. S. and Liebermann, G. J., "Introduction to Operations Research", Tata McGraw Hill
4. Pradeep Prabhakar Pai, "Operations Research Principles and Practice", Oxford University Press
5. R. Panneerselvam, "Operations Research", PHI Publications.
6. A. M. Natarajan, P. Balasubramani, A. Tamilarasi, "Operations Research", Pearson Education.
7. Kanti Swarup, P. K. Gupta and Man Mohan, "Operations Research", Sultan Chand & Sons.

## **Evaluation Scheme:**

### **Theory :**

#### **Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### **Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### **End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Cyber Security and Laws(OECS7054T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

**Prerequisite:** Knowledge of basic concepts of security

## Course Objectives:

1. To understand and identify different types cybercrime and cyber offences.
2. To recognized Indian IT Act 2008 and its latest amendments.
3. To learn various types of security standards compliances.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand the different types of cybercrime and security issues E Business.	L2	Understand
CO2	Analyses different types of cyber threats and techniques for security management.	L4	Analyze
CO3	Explore the legal requirements and standards for cyber security in various countries to regulate cyberspace.	L4	Analyze
CO4	Impart the knowledge of Information Technology Act and legal frame work of right to privacy, data security and data protection.	L2	Understand

# Course Contents

---

## Unit-I

12 Hrs.

**Introduction to Cybercrime:** Cyber Crime, Cyber Law, Cyber Security, History of Cyber Crime, Hacking, Data Theft, Cyber Terrorism, Virus & Worms, Email Bombing, Pornography, online gambling, Forgery, Web Defacements, Web Jacking, Illegal online Selling, Cyber Defamation, Software Piracy, Electronics/ Digital Signature, Phishing, Password Cracking, Key loggers and Spywares, Steganography, DoS and DDoS attacks, SQL Injection, Buffer Over Flow, Attacks on Wireless Networks, Phishing Identity Theft (ID Theft)

**Cyber offenses:** How criminal plan the attacks, Social Engineering, Cyber stalking, Cyber caf and Cybercrimes, Botnets, Attack vector

## Unit-II

08 Hrs.

**Cyber Threats Analysis:** Knowledge of Dynamic and Deliberate Targeting

Knowledge of Indications and Warning

Knowledge of Internal Tactics to Anticipate and/or, Emulate Threat Capabilities and Actions

Knowledge of Key Cyber Threat Actors and their Equities

Knowledge of Specific Target Identifiers and Their Usage

**Cyber Security Management:**

Knowledge of Emerging Security Issues, Risks, and Vulnerabilities

## Unit-III

06 Hrs.

**Electronic Business and legal issues:**

Evolution and development in Ecommerce, Policy Frameworks for Secure Electronic Business, paper vs paper less contracts, E-Commerce models- B2B, B2C, E security, E-Payment Mechanism; Payment through card system, E-Cheque, E-Cash, E-Payment Threats & Protections, Security for E-Commerce.

## Unit-IV

08 Hrs.

**Indian IT Act:** Cyber Crime and Criminal Justice, Penalties, Adjudication and Appeals Under the IT Act, 2000, IT Act. 2008 and its Amendments

**Security aspect in cyber Law:** The Contract Aspects in Cyber Law, The Security Aspect of Cyber Law, The Intellectual Property Aspect in Cyber Law, The Evidence Aspect in Cyber Law, The Criminal Aspect in Cyber Law

## Unit-V

08 Hrs.

**Security Industries Standard Compliances:**

IT Security v/s IT Compliance, Cyber Security Standards, critical security controls for cyber security, GRC (Governance, Risk Management, and Compliance), SOX, GLBA, HIPAA, ISO/IEC 27001, NIST Cyber Security Framework (CSF), PCI-DSS.

OWASP Top Ten Project, GDPR (General Data Protection Regulation), NIST (National Institute of Standards and Technology), CIS Controls (Center for Internet Security Controls)

### Evaluation Scheme:

**Theory :**

**Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

**Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

**End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Personal Finance Management(OECS7055T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

**Prerequisite:** Basic Knowledge of Algebra, Probability and Statistics

## Course Objectives:

1. To create awareness and educate consumers on access to financial services.
2. To make the students understand the basic concepts, definitions and terms related to direct taxation.
3. To help the students compute the Goods and Service Tax (GST) payable by a supplier after considering the eligible input tax credit.
4. To familiarise the students with microfinance for accelerating the expansion of local microbusinesses.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Use a framework for financial planning to understand the overall role finances play in his/her personal life.	L3	Apply
CO2	Compute income from salaries, house property, business/profession, capital gains and income from other sources.	L3	Apply
CO3	Compute the amount of CGST, SGST and IGST payable after considering the eligible input tax credit.	L3	Apply
CO4	Understand how Microfinance can help in financial inclusion.	L2	Understand

# Course Contents

---

## Unit-I 07 Hrs.

**Overview of Indian Financial System:** Characteristics, Components and Functions of Financial System. Financial Instruments and Financial Markets, Financial inclusion. **Introduction to Personal Finance:** Person Financial Planning in Action, Money Management Skills, Taxes in Your Financial Plan, Savings and Payment Services. **Consumer Credit:** Advantages, Disadvantages, Sources and Costs.

## Unit-II 07 Hrs.

**Personal Financial Management:**

**Loans:** Home, Car, Education, Personal, Loan against property and Jewel loan. **Insurance:** Types of Insurance ULIP and Term; Health and Disability Income Insurance, Life Insurance.

**Investment:** Investing Basics and Evaluating Bonds, Investing in Stocks and Investing in Mutual Funds, Planning for the Future.

## Unit-III 08 Hrs.

**Income Tax:**

**Income Tax Act Basics:** Introduction to Income Tax Act, 1961

**Heads of Income and Computation of Total Income and Tax Liability:** Heads of Income and Computation of Total Income under various heads, Clubbing Provisions, Set off and Carry forward of Losses, Deductions, Assessment of Income and tax liability of different persons.

**Tax Management, Administrative Procedures and ICDS:** TDS, TCS and Advance Tax Administrative Procedures, ICDS.

## Unit-IV 10 Hrs.

**Goods and Services Tax:** GST Constitutional framework of Indirect Taxes before GST (Taxation Powers of Union & State Government); Concept of VAT: Meaning, Variants and Methods; Major Defects in the structure of Indirect Taxes prior to GST; Rationale for GST; Structure of GST (SGST, CGST, UTGST & IGST); GST Council, GST Network, State Compensation Mechanism, Registration.

**Levy and Collection of GST:** Taxable event- "Supply" of Goods and Services; Place of Supply: Within state, Interstate, Import and Export; Time of supply: Valuation for GST- Valuation rules, taxability of reimbursement of expenses; Exemption from GST: Small supplies and Composition Scheme: Classification of Goods and Services

## Unit-V 10 Hrs.

**Introduction to Micro finance:** Micro-Finance: Definitions, Scope & Assumptions, Types of Microfinance, Customers of Micro-finance, Credit Delivery Methodologies, SHG concept, origin, Formation & Operation of Self Help Groups (SHGs).

**Models in Microfinance:** Joint Liability Groups (JLG), SHG Bank Linkage Model and GRAMEEN Model: Achievements & Challenges

**Institutional Mechanism:** Current Challenges for Microfinance, Microfinance Institutions (MFIs): Constraints & Governance Issues, Institutional Structure of Microfinance in India: NGO-MFIs, NBFC-MFIs, Co-operatives, Banks, Microfinance Networks and Associations: Demand & Supply of Microfinance Services in India, Impact assessment and social assessments of MFIs.

8. S K Mishra. "Simplified Approach to GST Goods and Services Tax", Education Publishing.
9. Todd A Watkins, "Introduction To Microfinance", World Scientific Publishing Company.

### Evaluation Scheme:

**Theory :**

**Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

**Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

**End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Energy Audit and Management(OECS7056T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

## Course Objectives:

1. To understand the importance of energy security for sustainable development and the fundamentals of energy conservation.
2. To identify and describe the basic principles and methodologies adopted in energy audit of a utility
3. To introduce performance evaluation criteria of various electrical and thermal installations to facilitate the energy management.
4. To relate the data collected during performance evaluation of systems for identification of energy saving opportunities.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	To identify and describe present state of energy security and its importance.	L2, L3	Understand, Apply
CO2	To identify and describe the basic principles and methodologies adopted in energy audit of a utility.	L2, L3	Understand, Apply
CO3	To describe the energy performance evaluation of some common electrical installations and identify the energy saving opportunities.	L2	Understand
CO4	To describe the energy performance evaluation of some common thermal installations and identify the energy saving opportunities.	L2	Understand
CO5	To analyze the data collected during performance evaluation and recommend energy saving measures.	L4	Analyze

# Course Contents

---

## Unit-I

05 Hrs.

**Energy Scenario:** Present Energy Scenario, Energy Pricing, Energy Sector Reforms, Energy Security, Energy Conservation and its Importance, Energy Conservation Act- 2001 and its Features. Basics of Energy and its various forms, Material and Energy balance.

## Unit-II

10 Hrs.

**Energy Audit:** Definition, Energy audit- need, Types of energy audit, Energy management (audit) approach-understanding energy costs, Bench marking, Energy performance, matching energy use to requirement, Maximizing system efficiencies, Optimizing the input energy requirements, Fuel and energy substitution. Elements of monitoring & targeting, Energy audit instruments. Technical and economic feasibility, Classification of energy conservation measures. Safety considerations during energy audit.

**Financial analysis techniques:** Simple payback period, NPV, Return on investment(ROI) Internal rate of return (IRR).

## Unit-III

10 Hrs.

**Energy Management and Energy Conservation in Electrical System:** Electricity billing, Electrical load management and maximum demand Control; Power factor improvement, Energy efficient equipments and appliances, star ratings. Energy efficiency measures in lighting system, lighting control: Occupancy sensors, daylight integration, and use of intelligent controllers. Energy conservation opportunities in water pumps, compressor, fan and blower. industrial drives, induction motors, motor retrofitting, soft starters, variable speed drives

## Unit-IV

10 Hrs.

**Energy Management and Energy Conservation in Thermal Systems:** Review of different thermal loads; Energy conservation opportunities in: Steam distribution system, Steam leakages, Steam trapping, Condensate and flash steam recovery system. Waste heat recovery, use of insulation-types and application. Energy conservation opportunities in: Boiler system. Refrigeration system and HVAC system.

## Unit-V

07 Hrs.

**Energy conservation in Buildings:** Energy Conservation Building Codes (ECBC): Green Building, LEED rating, Application of Non-Conventional and Renewable Energy Sources, Energy sources and energy management in electric vehicles.

## Reference Books:

1. Geofry Stokes, "Handbook of Electrical Installation Practice", Blackwell Science.
2. Anil Valia, "Designing with light: Lighting Handbook", Lighting System.

## Evaluation Scheme:

### Theory :

#### Continuous Assessment (A):

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### Continuous Assessment (B):

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### End Semester Examination (C):

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Disaster Management and Mitigation Measures(OECS7057T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

## Course Objectives:

1. To provide basic understanding hazards, disaster and various types and categories of disaster occurring around the world.
2. To identify extent and damaging capacity of a disaster.
3. To study and understand the means of losses and methods to overcome /minimize it.
4. To understand roles and responsibilities of individual and various organization during and after disaster.
5. To appreciate the significance of GIS, GPS in the field of disaster management.
6. To understand the emergency government response structures before, during and after disaster

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Know natural as well as manmade disaster and their extent and possible effects on the economy.	L2	Understand
CO2	Know the institutional framework and organization structure in India for disaster management and get acquainted with government policies, acts and various emergency laws.	L2	Understand
CO3	Get to know the simple do's and don'ts in such extreme events and build skills to respond accordingly.	L2, L3	Understand, Apply
CO4	Understand the importance of disaster prevention and various mitigation measure with the exposure to disasters hotspots across the globe.	L2	Understand

# Course Contents

---

## Unit-I

10 Hrs.

**General Information about Disaster:** Brief concept of Hazards, definition and types of Disasters Natural, Man-made, and hybrid. Groups of Disasters Natural and Technological, global Scenario, Significance of studying various aspects of disasters, effects of disasters, Indias vulnerability to disasters, Impact of disaster on National development.

Study of Natural disasters:

Flood, drought, cloud burst, Earthquake, Landslides, Avalanches, Volcaunic eruptions, Mudflow, Cyclone, Storm, Storm Surge, climate change, global warming, sea level rise, ozone depletion etc.

Study of Human/Technology Induced Disasters:

Chemical, Industrial and Nuclear disasters, Internally displaced persons, road and train accidents Fire Hazards, terrorism, militancy, Role of growing population and subsequent industrialization, urbanization and changing lifestyle of human beings in frequent occurrences of manmade disasters.

## Unit-II

08 Hrs.

**Disaster Management:** Brief Introduction, Disaster management cycle, Evolution of Disaster and Disaster management in India, Disaster management acts, policies and guidelines, laws of emergencies etc.

Prior, During and Post disaster management activities: Preparedness, strengthening emergency centers, Logistics, optimum resource management, emergency response and relief, Training, Public awareness, Research, Reconstruction of essential services and livelihood restoration.

## Unit-III

08 Hrs.

**Institutional framework and Mechanism for disaster management in India:** Institutions in India for dealing with various disasters, Organizational structure, functions and responsibilities of National Institute of Disaster Management (NIDM) and National disaster management authority (NDMA) in India, roles and responsibilities of central and state government during and after disaster, NGOs involved in disasters and their task, Jobs carried out by armed forces, Financial Relief During disaster (State, National and International Disaster Assistance)

## Unit-IV

08 Hrs.

**Disaster risk reduction and Mitigation Measures:** Need of disaster prevention and mitigation, mitigation guiding principles, challenging areas, structural and non-structural measures for disaster risk reduction.

Mitigation measures for flood, earthquake, cyclone monitoring, air quality, water quality, climate change, land use, winter storms and aquatic biology etc.

Use of information management, GIS, GPS and remote sensing Mitigation measure. Do's and don'ts in case of disasters and effective implementation of relief aids.

## Unit-V

08 Hrs.

**Case studies on disaster (National /International):** Case study discussion of Hiroshima Nagasaki (Japan), India Tsunami (2004) , Bhopal gas tragedy, Kerala and Uttarakhand flood disaster, Cyclone Phailin (2013), Fukushima Daiichi nuclear disaster (2011), 26th July 2005 Mumbai flood, Chernobyl meltdown and so on. (Discuss case studies on disaster with respect to reason for the disaster, incidents, effects of disaster, present scenario and safety measures taken)

13. (Learners are expected to refer reports published at national and international level and updated information available on authentic web sites)

## **Evaluation Scheme:**

### **Theory :**

#### **Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### **Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### **End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Science of Well-being (OECS7058T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

## Course Objectives:

1. To create consciousness about importance of holistic health and physical as well as mental well-being.
2. To make learners aware of the concepts of Happiness, Gratitude, Self-Compassion, Empathy etc.
3. To introduce the learners to the means of mental and physical well-being, ill effects of mal-practices like alcoholism, smoking etc.
4. To equip the learners to manage and cope up with stress in their daily living.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Describe concepts of holistic health and well-being, differentiate between its true meaning and misconceptions and understand the benefits of well-being.	L2	Understand
CO2	Recognize meaning of happiness, practice gratitude and self-compassion and analyze incidents from ones own life.	L4	Analyze
CO3	Understand the causes and effects of stress, identify reasons for stress in ones own surrounding and self.	L1,L2	Remember, Understand
CO4	Recognize the importance of physical health and fitness, assess their life style and come up with limitations or effectiveness.	L5	Evaluate
CO5	Inspect ones own coping mechanism, assess its effectiveness, develop and strategize for betterment and execute it.	L4	Analyze

# Course Contents

---

## Unit-I

06 Hrs.

**Health and well-being:** The concept of health, dimensions of health, the notion of well-being, various facets of well-being, relation between health and well-being. Concept of holistic health, its principles and importance, concept and benefits of holistic care, misconceptions about holistic health approach, the application of a true holistic approach to our well-being.

## Unit-II

08 Hrs.

**Concepts of happiness:** Happiness: what is it and how do we measure it? Philosophical perspectives on happiness, Happiness: Nature or Nurture? Happiness in the modern world: impediments and accelerators, Narrow vs. Broad Band Approaches to Happiness, Benefits of Happiness, Self-Compassion and Gratitude. Misconceptions of happiness.

## Unit-III

10 Hrs.

**Stress and mental health/well-being:** Nature and concept of stress, meaning and definitions of stress, types of stress, meaning of stressors, types of stressors, symptoms of stress, effects of stress, different models of stress.

Sources of stress and how does stress cause illness, various sources of stress, delineate between external and internal sources of stress, differentiate between continuous and discrete stressors, the effects of these stressors on health and well-being, diversity of stressors and their health consequences, relation between stress and illness from different perspectives association between stress related physiological mechanisms and different illnesses.

## Unit-IV

10 Hrs.

**Physical Well-being / Health management:** concept of health behaviours, dimensions of health behaviours. Health enhancing behaviors: Exercise and Weight control, application and importance of these health enhancing behaviours. Health protective behaviors and illness management: concept of illness management, effectiveness of illness management. Concept of Nutrition, Role of Nutrition, Components of Nutrition, concept of Malnutrition, Health compromising behaviours: Alcoholism, Smoking and its effects on health.

## Unit-V

08 Hrs.

**Dealing with Difficult Times / Coping mechanisms:** The concept of chronic stress, Health and safety risks of chronic stress, Forms and Treatment of chronic stress, Coping with Acute and Chronic stress, theories of the stress-illness link, role of stress in mental disorders.

Concept of coping, Ways of coping and stress management, basic knowledge about stress management,

various techniques of stress management, stress management programs. Mental strengths and virtues, Hope, Optimism, Resilience concept, pathways and models, Meditation and Self-introspection.

### **Text Books:**

### **Evaluation Scheme:**

#### **Theory :**

#### **Continuous Assessment (A):**

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### **Continuous Assessment (B):**

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### **End Semester Examination (C):**

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Research Methodology(OECS7059T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

**Prerequisite:** Basic Knowledge of Probability and Statistics.

## Course Objectives:

1. To understand Research and Research Process.
2. To acquaint learners with identifying problems for research and develop research strategies.
3. To familiarize learners with the techniques of data collection, analysis of data and interpretation.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Prepare a preliminary research design for projects in their subject matter areas.	L2, L3	Understand, Apply
CO2	Accurately collect, analyze and report data.	L4	Analyze
CO3	Present complex data or situations clearly.	L2	Understand
CO4	Review and analyze research findings.	L4	Analyze
CO5	Write report about findings of research carried out.	L3	Apply

# Course Contents

---

## Unit-I

07 Hrs.

**Basic Research Concepts:** Meaning of research, Objectives of research, Types of research, Significance of research Research process

## Unit-II

10 Hrs.

**Research Methodology:** Identification of research problem, Literature review, Formulation of hypothesis, Formulation of Research design.

## Unit-III

10 Hrs.

**Research and Sample Design:** Meaning of research and sample design, Need of research design, Features of good research design, Important concepts, Different research designs, Types of sampling designs.

## Unit-IV

10 Hrs.

**Data Collection and Data Analysis:** Types of data, Methods for collecting data: Experiments and surveys, Collection of primary and secondary data, Hypothesis testing and interpretation of Data

## Unit-V

05 Hrs.

**Interpretation and Report Writing:** Interpretation and drawing conclusions on the research, Preparation of the report, Ethical Issues

## Evaluation Scheme:

### Theory :

#### Continuous Assessment (A):

Subject teacher will declare Teacher Assessment criteria at the start of semester.

#### Continuous Assessment (B):

1. Two term tests of 15 marks each will be conducted during the semester.
2. Best of the marks scored in both the tests will be considered for final grading.

#### End Semester Examination (C):

1. Question paper based on the entire syllabus, summing up to 65 marks.
2. Total duration allotted for writing the paper is 3 hrs.

# Public Systems and Policies(OECS70510T)

---

## Teaching Scheme

Lectures : 03 Hrs./week

Credits : 03

## Examination Scheme

Term Test : 15 Marks

Teacher Assessment : 20 Marks

End Sem Exam : 65 Marks

Total Marks : 100 Marks

---

**Prerequisite:** Basic Knowledge of Social science and Current affairs.

## Course Objectives:

1. To analyze the transformations in public systems with emphasis on current initiatives and emerging challenges in the field.
2. To understand public systems in a fast changing environment in the global context.
3. To provide an in-depth understanding of the ills prevailing in the society and aids to identify the solutions for them.
4. To explain public policy and its operations with special focus on policy relating to Government finance.
5. To analyze and evaluate the impact of the public policy on firms and economy at large.

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand the importance of public systems in a fast-changing environment in the global context.	L2	Understand
CO2	Analyze the transformations in public systems with emphasis on current initiatives and emerging challenges in the field.	L4	Analyze
CO3	Explain public policy and its operations with special focus on policy relating to Government finance.	L2	Understand
CO4	Make policies and know about the happenings in the world, in the nation and those in their locality.	L3	Apply
CO5	Analyze and evaluate the impact of the public policy on firms and economy at large and work under various fields as policymakers.	L4	Analyze

# Course Contents

---

## Unit-I 10 Hrs.

**Introduction and Overview of Public Systems:** Ideology of Public Systems; Mechanistic and Organic view of Society and Individuals, The Legal Framework; Federal Government; State and Local Governments, Government growth; The size of Government.

## Unit-II 06 Hrs.

**Public Sector in the Economics Accounts:** Public Sector in the circular flow; Public Sector in the National Income Accounts.

## Unit-III 08 Hrs.

**Public Choice and Fiscal Politics:** Direct Democracy; Representative Democracy; The Allocation Function; The Distribution Function; The Stabilization Function; Coordination of Budget Functions; The Leviathan Hypothesis.

## Unit-IV 12 Hrs.

**Introduction and Overview of Public Policy:** Markets and Government; Social goods and Market failure, Public expenditure and its evaluation; Cost Benefit Analysis, Public policy and Externalities, Taxation Policy and its impact, Income distribution, redistribution and social security issues Fiscal & Budgetary Policy, Fiscal Federalism in India.

## Unit-V 06 Hrs.

Case Studies in Expenditure Policy: Public Services  
A) National Defense B) Highways C) Outdoor Recreation D) Education

# Project Stage-II (PJCS7060L)

---

## Practical Scheme

Practical : 08 Hrs./week

Credit : 04

## Examination Scheme

Teacher Assessment : 25 Marks

End Sem Exam : 25 Marks

Total : 50 Marks

---

## Course Objectives:

- To implement the solution as per the problem statement.
- To develop the team building, writing, logical reasoning and management skills.
- To provide the connections between the designs and concepts across different disciplinary boundaries.
- To encourage students to become independent personnel, critical thinkers and lifelong learners

## Course Outcomes:

CO	Course Outcomes	Blooms Level	Blooms Description
CO1	Apply engineering knowledge to produce solution of a problem considering cultural, social, environmental, and economic factors using appropriate tool and method.	L1	Analyze
CO2	Demonstrate project based learning that allows students to transfer existing ideas into new applications.	L2	Understand
CO3	Develop an ability to work in teams and manage the conduct of the research study.	L3	Apply
CO4	Integrate different perspectives from relevant disciplines which help them to get internships, jobs and admission for higher studies.	L3	Apply
CO5	Present the research in the form of technical writing, understand what constitutes to plagiarism and how to use proper referencing styles.	L2	Understand

**Syllabus:**

Project-I work done in VI semester shall be continued as Project-II in semester VII.

Students should complete remaining implementation of ideas given in synopsis/Abstract of semester VI.

Students / group must plan their execution of project, so that project work should be completed before end of semester.

Project-II involves fabrication, design, experimentation, data analysis within realistic constraints such as economic, environmental, social, ethical, health and safety, manufacturability, and sustainability. The stage also includes testing, possible results and report writing.

Each project group is required to maintain log book for documenting various activities of Project-II and submit group project report at the end of Semester-VII in the form of Hard bound.

Domain knowledge (any beyond) needed from the various areas in the field of mechanical engineering for the effective implementation of the project.

The above areas can be updated based on the technological innovations and development needed for specific project.

**Guidelines:**

The main purpose of this activity is to improve the students technical skills, communication skills by integrating writing, presentation and teamwork opportunities.

Each group will be reviewed twice in a semester and marks will be allotted based on the various points mentioned in the evaluation scheme.

In the first review of this semester, each group is expected to complete 70% of project.

In the second review of this semester, each group is expected to complete 100% of project.

The students may use this opportunity to learn different computational techniques towards development of a product.

Interaction with alumni mentor will also be appreciated for the improvement of project.

**Assessment Criteria:**

- At the end of the semester, after confirmation by the project guide, each project group will submit project completion report in prescribed format for assessment to the departmental committee (including project guide).
- Assessment of the project (at the end of the semester) will be done by the departmental committee (including project guide).
- The candidate must bring the Project Stage-I report and the final report completed in all respects while appearing for End Semester Examination.
- Oral examination should be conducted by Internal and External examiners. Students have to

### Prescribed project report guidelines:

Every group should prepare hard bound report (preferable LaTeX) of about minimum 40 pages on the work carried out by a batch of students in respect of the project work done during semester-VII.

Project Report should include appropriate content for:

- Title
- Abstract
- Introduction
- Problem identification and project objectives
- Literature Survey
- Related Theory
- Project design and Implementation details
- Case study/Analysis/Design Methodology
- Project Outcomes
- Result and Conclusion
- Future scope
- References

**Assessment criteria for the departmental committee (including project guide) for Continuous Assessment:**

Guide will monitor weekly progress and marks allocation will be as per Table 2.

Table 1: Log Book Format

Sr	Week (Start Date:End Date)	Work Done	Sign of Guide	Sign of Coordinator
1				
2				

Table 2: Continuous Assessment Table

Sr	Exam Seat No	Name of Student	Student Attendance	Log Book Maintain	Literature Review	Depth of Understanding	Report	Total
			5	5	5	5	5	25

**Assessment criteria for the departmental committee (including project guide) for End Semester Exam:**

Each group will be reviewed twice in a semester by faculty guide and faculty coordinator based on the following criteria:

- Project progress
- Documentation/Technical paper writing
- Key findings
- Validation of results
- Product Development

Each review consists of 25 marks. Average of the marks scored in both the two reviews will be considered for final grading. The final certification and acceptance of TW ensures the satisfactory performance on the above aspects.

Table 3: Evaluation Table

Sr	Exam Seat No	Name of Student	Project Selection	Design/ Methodology	Fabrication/ Modeling/ Simulation	Result Verification	Presentation	Total
			5	5	5	5	5	25

## Internship

Internships offer valuable educational and career development opportunities by providing students with practical experience in their field of study. In Semester – VIII, students have two options for their internship: Industry Internship and In-house Internship.

### **1. Industry Internship**

**Objectives:** The industry internship aims to achieve the following objectives:

1. Expose technical students to the industrial environment, allowing them to gain real-world experience and develop into competent professionals.
2. Provide opportunities to learn and enhance the practical technical skills required for professional roles.
3. Familiarize students with current technological developments relevant to their field of study.
4. Encourage the application of technical knowledge in real industrial situations.
5. Develop skills in writing technical reports and projects.
6. Introduce students to the responsibilities and ethics of the engineering profession.
7. Familiarize students with various materials, processes, products, and quality control practices.
8. Promote academic, professional, and personal growth.
9. Facilitate connections between students and potential future employers.
10. Foster an understanding of the social, economic, and administrative factors influencing industrial organizations and their working environments.
11. Develop an understanding of employee psychology, habits, attitudes, and problem-solving approaches.

#### **Industry Internship Guidelines:**

- The Training and Placement (T&P) cell of the institute will arrange internships for students in industries/organizations after the seventh semester.
- Students are expected to accept internship offers regardless of the company, job profile, location, or stipend offered.
- Alternatively, students can individually apply by submitting “Student Internship Program Application” (available on Institute Website) for industry internships, adhering to the prescribed guidelines as follows:
  1. Only T&P department granted internship will be considered.

2. The internship duration should be of minimum 12 Weeks.
3. Each student needs to take prior permission from T&P department before proceeding for any internship opportunity on his/her own.
4. Each student will be monitored twice (virtually/through online meetings) during the internship period in the presence of an industry mentor and the departmental faculty mentor and the concerned TPC.
5. If any student wants to withdraw from the Internship, he/she can only be allowed within two weeks of joining the same. Such students will have to continue the semester VIII academic activities regularly along with In-house internship.

**Expected Activity in Industry Internship:**

- Students may choose to work on innovation or entrepreneurial activities resulting in start-ups or undergo internships with Industry/NGO/ Government organizations/Micro/ Small/ Medium enterprises to prepare for the industry.
- Every student is required to prepare a file containing documentary proofs of the activities done by him / her. The evaluation of these activities will be done twice (virtually/through online meetings) during the internship period by the committee constituted by the Head of the Department which shall include an industry mentor, faculty mentor and Department T&P Coordinator (TPC). The assessment criteria for continuous assessment is as per Table 4.

Table 4. Continuous Assessment for Industry Internship

Internship Objectives and Goals (30 Marks)	Internship Experience Skills Gained/Enhanced (30 Marks)	Professional Development and Growth (30 Marks)	Internship Report (30 Marks)	Presentation (30 Marks)

- The ESE will be jointly evaluated by an industry mentor, faculty member and department T&P coordinator (TPC). The evaluation criteria is as per Table 5.

Table 5. Evaluation Criteria of Industry Internship

Internship Objectives and Goals (30 Marks)	Internship Experience Skills Gained/Enhanced (30 Marks)	Professional Development and Growth (30 Marks)	Internship Report (30 Marks)	Presentation (30 Marks)

8. Evaluation Scheme:

**I. Continuous Assessment:**

- a. A logbook (as per Table 6) of the work done must be maintained by each group.
- b. Each in-house internship activity will be reviewed twice in the semester. In the first review (as per Table 7), at least 40% work shall be completed including the topic identification / introduction/ scope of the work. literature survey, problem definition and objectives. The remaining 60% of work shall be completed in the second review (as per Table 8) including implementations, key findings, publications &/patenting &/copyright &/ product development etc.

**II. End Semester Examination:**

End semester examination (as per Table 9) will be jointly evaluated by the faculty mentor and an external examiner appointed by the IIOD in consultation with the COE.

9. Assessment Formats:

Table 6: Log Book Format

S.N.	Week (Start Date: End Date)	Work Done	Sign of in-house mentor	Sign of Coordinator

Table 7: First Review

Topic Identification & Validation (20 Marks)	Literature Survey (20 Marks)	Problem Definition (20 Marks)	Objectives (15 Marks)

Table 8: Second Review

Implementation (20 Marks)	Publications (20 Marks)	Report (20 Marks)	Presentation (15 Marks)

Table 9: End Semester Examination

Topic Identification & Validation (30 Marks)	Literature Survey & Problem Definition (30 Marks)	Objectives & Implementation/ Product Development (30 Marks)	Presentation (30 Marks)	Report, Publications/ Patent/IPR documents (30 Marks)

### **Industry Internship Report:**

- Upon completion of the internship, students should prepare a comprehensive report that reflects their observations and learnings during the internship period. Students can consult their Industrial Supervisor, Faculty Mentor, or T&P Coordinator/Officer for guidance on selecting special topics and problems for the report.
- The internship report will be evaluated based on the following criteria:
  - i. Adequacy and purposeful write-up.
  - ii. Variety and relevance of learning experiences.
  - iii. Practical applications and connections with the fundamental theories and concepts covered in the course (semester I to VII).

### **6. In-house Internship**

The in-house internship provides students with research-oriented opportunities to cultivate a research mindset. It serves as an extension of the project completed in VI and VII semesters (Project Stage-I & II) or offers new objectives provided by the department or research guide.

1. The in-house internship can be pursued individually or as a group activity.
2. If extending a project from Stage II, at least one student in the group must have participated in Stage I & II.
3. If working on the topic offered by the department or in-house mentor, a group of fresh students can form a team.
4. The maximum group size is limited to four students.
5. In case of extension of project stage II, the outcomes should be in the form of product development/technology transfer along with patent and copyright / one research publication (UGC care listed journal/conference). Students can work jointly with any government funding agency or industry. In such cases, a detailed project report shall be submitted after verification by the in-house mentor and industry/funding agency mentor/authority. In case of standalone/non-sponsored activity, i.e. without any funding agency/industry collaboration, the detailed project report shall be submitted after verification by the in-house mentor.
6. If pursuing a Topic offered by the department or in-house mentor, the outcome of the in-house internship should include the publication of a research paper, preferably in an SCI/Scopus/UGC care listed/indexed Journal/Conference. The detailed project report must be submitted and verified by the in-house mentor.
7. All the designated work shall be submitted to the department in the form of a report in hardbound as well as soft copy.
