

Shirpur Education Society's
R. C. Patel Institute of Technology,
Shirpur

An Autonomous Institute

Affiliated to DBATU, Lonere (M.S.),
Approved By AICTE, New Delhi and Govt. of Maharashtra
(DTE: EN - 5172)
Accredited by NAAC 'A' Grade, Bangalore.

Course Curriculum Structure
Electronics & Telecommunication Engineering
Second Year B. Tech
Batch: 2024-2028
With Effect from Academic Year 2025-2026

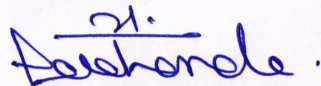

Shahada Road, Near Nimzari Naka, Shirpur, Maharashtra 425405

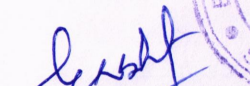

www.rcpit.ac.in

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Mathematics for Telecommunication Engineering (RCP23EPC201)	

Prerequisite:

- Mathematics-I
- Mathematics-II

Course Objectives:

- To build the strong foundation in Mathematics of learner needed for the field of Electronics and Telecommunication Engineering.
- To provide learner with mathematics fundamentals necessary to formulate, solve and analyze complex engineering problems.
- To prepare student to apply reasoning informed by the contextual knowledge to engineering practice.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Demonstrate an ability to use vector algebra and vector calculus and its assimilation into matrix theory.	L3	Apply
CO2	Apply the concept of eigen values and eigen vectors, Cayley- Hamilton theorem and diagonalization and Quadratic forms to solve problem related to matrices and their applications	L3	Apply
CO3	Apply mathematical theories to follow Fourier series expansion of functions which satisfy Dirichlet conditions.	L3	Apply
CO4	Apply the knowledge of analytic functions to obtain functions, conformal mapping, bilinear transformations.	L3	Apply

Mathematics for Telecommunication Engineering (RCP23EPC201)

COURSE CONTENTS

Unit-I **Vector Algebra, Vector Differentiation & Vector Integral** **9 Hrs.**

Vector differentiation, Gradient of scalar point function, Divergence and Curl of vector point function Properties: Solenoidal and irrotational vector fields, conservative vector field. Vector Integral: Green's theorem in a plane, Gauss divergence theorem and Stokes' theorem.

Unit-II **Matrix theory** **9 Hrs.**

Eigenvalues and Eigenvectors, properties of Eigenvalues and Eigenvectors, Cayley- Hamilton theorem, Examples based on verification of Cayley-Hamilton theorem, Similarity of matrices, Diagonalization of matrices, Function of square matrix, Quadratic forms over real field, Reduction of quadratic form to a diagonal, canonical form, Rank, index and signature of quadratic form, class value of quadratic forms, definite, Semi-definite and indefinite.

Unit-III **Fourier Series** **7 Hrs.**

Introduction: Orthogonal and orthonormal set of functions, Introduction of Dirichlet conditions, Euler's formulae. Fourier Series of Functions: Exponential, trigonometric functions of any period $2L$. Even and odd functions, half range sine and cosine series. Complex form of Fourier series.

Unit-IV **Complex Variable** **6 Hrs.**

Analytic Function: Necessary and sufficient conditions (No Proof), Cauchy Riemann equation Cartesian form (No Proof) Cauchy Riemann Equation in polar form (with Proof), Milne Thomson Method and its application, Harmonic function, orthogonal trajectories. Mapping: Conformal mapping, Bilinear transformations, cross ratio, fixed points.

Unit-V **Introduction to Probability and Random Variable** **4 Hrs.**

Joint probability, Independence of events, Definition of Random Variable. Discrete and Continuous random variables, probability mass function, probability density function, probability distribution function, Expectation, Variance and Moments of random Variable, Binomial, Poisson and Normal (Gaussian) distributions. (No Proofs) Operations on One and Multiple Random Variable: Functions of a random variable and their distribution and density functions, Pairs of random variables, Joint CDF, Joint PDF, Independence.

Unit-VI**Classification of signals****7 Hrs.**

Continuous and discrete time, periodic and aperiodic, symmetric (even) and asymmetric (odd), energy and power, causal and anti-causal signal. Deterministic and non-deterministic signals.

Text Books

1. Dr. B. S. Grewal, Higher Engineering Mathematics, Khanna Publication, 43rd Edition, 2020.
2. B. V. Ramana, Higher Engineering Mathematics, Tata Mc-Graw Hill Publication, 6th Edition, 2018.

Reference Books

1. Erwin Kreyszig, Advanced Engineering Mathematics, Wiley Eastern Limited, 10th Edition, 2015.
2. Wylie and Barret, Advanced Engineering Mathematics, Tata Mc-Graw Hill, 6th Edition, 1995.
3. Dennis G. Zill Warren S. Wright, Advanced Engineering Mathematics, Jones and Bartlett Publishers, 1st Edition, 2009.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Electronic Devices & Circuits (RCP23EPC202)	
Electronic Circuit Design - Laboratory (RCP23EPC202L)	

Pre-requisite:

- Basic Electrical Engineering & Digital Electronics
- Electrical Networks
- Physics

Course Objectives:

- To understand operation of semiconductor devices.
- To understand DC analysis and AC models of semiconductor devices.
- To apply concepts for the design of Amplifiers.
- To verify the theoretical concepts through laboratory and simulation experiments.
- To implement mini projects based on concept of electronics circuit concepts.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain the current voltage characteristics of semiconductor devices.	L2	Understand
CO2	Analyze DC circuits and relate AC models of semiconductor devices with their physical operation.	L4	Analyze
CO3	Design and analysis of amplifier and oscillator circuits.	L6	Create
CO4	Evaluate frequency response to understand behaviour of Electronics circuits.	L5	Evaluate

Electronic Circuit Design - Laboratory (RCP23EPC203)

List of Laboratory Experiments: (Any Eight)

1. BJT Biasing.
2. Single stage Common Emitter Amplifier
3. Two stage amplifiers.
4. Frequency Response of RC Coupled Common Emitter amplifier.
5. Single Stage Common Source (CS) Amplifier using MOSFET.
6. Darlington Emitter Follower
7. SCR Characteristics
8. Complementary symmetry Class-B Push Pull Power amplifier
9. Negative Feedback Amplifier
10. RC Phase Shift Oscillator
11. LC Oscillator.
12. Simulation of amplifier circuits.

Minimum eight experiments from the above suggested list or any other experiment based on syllabus will be included, which would help the learner to apply the concept learnt.

Text Books

5. Boylestad and Nashelesky, Electronic Devices and Circuits Theory, Pearson Education, 11th Edition, 2013.
6. J B. Gupta, Electronic Devices and Circuits, Katson Education Series, 6th Edition, 2016.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Digital System Design (RCP23EPC203)	
Digital System Design – Laboratory (RCP23EPC203L)	

Pre-requisite

- Basic Electrical Engineering
- Digital Electronics

Course Objectives:

- To introduce signed binary number representation.
- To introduce methods for minimizing logical expressions.
- To outline the formal procedure to design combinational logic circuits.
- To introduce flip flops and outline the formal procedure to sequential circuits.
- To illustrate concept of programmable devices.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Relate working of logic families and implement functions using logic gates.	L2	Understand
CO2	Minimize logic expressions using various reduction techniques.	L4	Analyze
CO3	Design combinational logic circuits using logic gates and implement the circuit by carrying out required investigations and debugging techniques.	L5	Evaluate
CO4	Design flip-flops using logic gates and use them to realize different sequential circuits and implement the circuit by carrying out required investigations and debugging techniques.	L5	Evaluate
CO5	Classify semiconductor memory and design combinational circuits using PLD.	L3	Apply

Digital System Design – Laboratory (RCP23EPC203L)

List of Laboratory Experiments: (Any Eight)

1. Verify different logic gates
2. Simplification of Boolean functions.
3. Verify Universal gates and design EXOR and EXNOR gates using Universal gates.
4. Implement Half adder, Full adder, Half subtractor and Full subtractor circuits.
5. Implement BCD adder using four-bit binary adder IC-7483.
6. Implement logic equations using Multiplexer IC 74151
7. Flip flops conversion JK to D, JK to T and D to TFF.
8. Design synchronous MOD N counter using IC-7490.
9. Verify encoder and decoder operations.
10. Implement digital circuits to perform binary to Gray and Gray to binary operations.
11. Verify truth table of different types of flip flops.

Any other experiment based on syllabus may be included, which would help the learner to understand topic/concept.

5. Donald P. Leach, Albert Paul Malvino, Gautam Saha, Digital Principles and Applications, The McGraw Hill, 7th Edition (2011).

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Python Programming Laboratory (RCP23EMD201L)	

Prerequisite:

- C Programming

Course Objectives:

- Python programming basics, Functions in Python and files handling.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Describe the various data types, control statements, conditional statements	L2	Understand
CO2	Understand different File handling and exception handling operations using Python.	L2	Understand
CO3	Describe functions in Python.	L2	Understand
CO4	Describe list, Tuples, dictionary and set	L2	Understand

Python Programming Laboratory (RCP23ELMD301)

COURSE CONTENTS

Unit-I	Input / Output, Variables, and Datatypes	6 Hrs.
	<ul style="list-style-type: none">▪ Getting started with Python,▪ Print text and numbers using single print▪ Introducing Output / Printing▪ Printing on multiple lines▪ Introduction to variables and datatypes▪ Boolean data type and negative numbers▪ Quiz on variables▪ Type conversion	
	Operators and Strings	
	<ul style="list-style-type: none">▪ Arithmetic Operators▪ Relational Operators▪ Logical Operators▪ Precedence and Associativity▪ Introduction to Strings▪ String Indexing and Slicing▪ Quiz on Strings	
Unit-II	User Input and Control Flow	6 Hrs.
	<ul style="list-style-type: none">▪ Take user input▪ User input: Practice▪ Intro to if /else▪ Quiz on Conditions▪ Combining Conditions - AND / OR	
	Loops	
	<ul style="list-style-type: none">▪ While loops▪ loops▪ Loops Practice▪ Quiz on loops▪ Break / continue▪ Nested Loops	
Unit-III	Files Directories & Flow control	6 Hrs.
	<ul style="list-style-type: none">▪ Learn to Debug Common Errors▪ Practice Debugging	
	Lists and Tuples	
	<ul style="list-style-type: none">▪ Introduction to Lists▪ Quiz on Lists▪ List Operations▪ Learn about tuples	

14. use if & else statements
15. use Elif statement
16. execute while loop/for loop
17. use Break Statement / Continue Statement
18. use Nested Loops
19. use various list operations - append, insert, remove, pop
20. use function in python
21. Write a class
22. access and Modify Private Data Members - Using Getter and Setter
23. Define a class with attribute type and Print type method
24. Pass objects as parameters to functions or methods
25. Use of Method Overloading

Any other experiment based on syllabus may be included which would help the learner to understand topic/concept.

The Oral / Practical examination will be based on the entire syllabus including, the practicals performed during laboratory sessions.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Product Life Cycle Management (RCP23XOE211)	

Prerequisite:

- Basic Management knowledge

Course Objectives

- To familiarize the students with the need, benefits and components of PLM.
- To acquaint students with Product Data Management & PLM strategies.
- To give insights into new product development program and guidelines for designing and developing a product.
- To familiarize the students with Virtual Product Development.
- To acquaint students with the need of Environmental aspects in PLM & its implementation

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Describe the phases of PLM, PLM strategies and methodology for PLM feasibility study and PDM implementation.	L2	Understand
CO2	Demonstrate various approaches and techniques for designing and developing products.	L3	Apply
CO3	Demonstrate knowledge in applying virtual product development tools.	L3	Apply
CO4	Demonstrate knowledge in implementation of Environmental aspects in PLM.	L3	Apply

Product Life Cycle Management (RCP23XOE211)

COURSE CONTENTS

Unit-I Introduction to Product Lifecycle Management (PLM) 9 Hrs.

Introduction to Product Lifecycle Management (PLM):

Product Lifecycle management (PLM), Need for PLM, Product Lifecycle Phases, Opportunities of Globalization, Pre-PLM Environment, PLM Paradigm, Importance & Benefits of PLM, Widespread Impact of PLM, Focus and Application, A PLM Project, Starting the PLM Initiative, PLM Applications.

PLM Strategies: Industrial strategies, Strategy elements, its identification, selection and implementation, Developing PLM Vision and PLM Strategy, Change management for PLM.

Unit-II Product Design and Development 8 Hrs.

Product Design and Development:

Product Design and Development Process, Engineering Design, Organization and Decomposition in Product Design, Typologies of Design Process Models, Reference Model, Product Design in the Con- text of the Product Development Process, Relation with the Development Process Planning Phase, Relation with the Post design Planning Phase.

Unit-III Methodological Evolution of Product Design 10 Hrs.

Methodological Evolution of Product Design:

Concurrent Engineering, Characteristic Features of Concurrent Engineering, Concurrent Engineering, Life Cycle Approach, Characteristic Features of Life Cycle Approach. The Design for X System, Objective Properties and Design for X Tools, Choice of Design for X Tools and Their Use in the Design Process. New Product Development (NPD) and Strategies, Product Configuration and Variant Management.

Integration of Environmental Aspects in Product Design:

Sustainable Development Design for Environment, Need for Life Cycle Environmental Strategies, Useful Life Extension Strategies, End-of-Life Strategies, Introduction of Environmental Strategies into the Design Process, Life Cycle Environmental Strategies and Considerations for Product Design, Tools and techniques for integrated design, Implementation of international standards.

Unit-IV Product Data Management (PDM) 7 Hrs.

Product Data Management (PDM):

Product and Product Data, PDM systems and importance, Components of PDM, Reason for implementing a PDM system, financial justification of PDM, barriers to PDM implementation.

Virtual Product Development Tools:

For components, machines, and manufacturing plants, 3D CAD systems and realistic rendering techniques, Digital mock-up, Model building, Model analysis, Modelling and simulations in Product Design, Examples/Case studies.

Unit-V Engineering Methods for product Duration design & evaluation 8 Hrs.

Engineering Methods for product Duration design & evaluation:

Durability of Products and Components, Design for Fatigue, Infinite Life Approach, Design for Finite Life.

Product Recovery Planning & Analysis:

Approach to the Recovery Problem, Method for Recovery Cycles Planning, Calculation Models for Recovery Cycles Planning, Basic procedure, Determinant Factors for Recovery, Effective Component Reusability, Recovery Fractions, Extension of Useful Life.

Text Books:

1. John Stark, "Product Lifecycle Management: Paradigm for 21st Century Product Realization", Springer-Verlag, 2004, ISBN: 1852338105.
2. Fabio Giudice, Guido La Rosa, Antonino Risitano, "Product Design for the environment-A life cycle approach", Taylor and Francis, 2006.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Management Information System (RCP23XOE212)	

Course Objectives

- The course is blend of management and technical field.
- Discuss the roles played by information technology in today's business and define various technology architectures on which information systems are built.
- Define and analyze typical functional information systems and identify how they meet the needs of the firm to deliver efficiency and competitive advantage.
- Identify the basic steps in systems development.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain the fundamental concepts of the management information systems used in business.	L2	Understand
CO2	Describe IT infrastructure and its components and its current trends.	L2	Understand
CO3	Use the tools and technologies for accessing information from databases to improve business performance and decision making.	L3	Apply
CO4	Identify and explain the security and ethical challenges in MIS along with the measures to be taken.	L2	Understand
CO5	Select a suitable social computing platform for the given requirements that integrates AI and IoT.	L3	Apply
CO6	Explain the processes involved in the information system within the organization includes information acquisition and enterprise and global management technologies.	L2	Understand

Management Information System (RCP23XOE212)

COURSE CONTENTS

Unit-I **Foundation Concepts** **5 Hrs.**

Foundation Concepts

Definition and scope of Management Information Systems (MIS) in business, Functional area information system, The components of information systems, Impact of IT on organizations and society, Business Process: BPR and BPI. Business Pressure, Organizational responses. Competitive Advantage and Strategic IS's.

Unit-II **Information Technology Infrastructure** **6 Hrs.**

Information Technology Infrastructure Overview of IT infrastructure, Hardware and software, Computer systems: End user and enterprise, Computing computer peripherals: Input, output, and storage technologies, Application software: End user applications, System software: Computer system management, Data resource management: Technical foundations of database management, Managing data resources, Big data, Data warehouse and data marts, Knowledge management, Net- works: The networked enterprise (wired and wireless), Pervasive computing, Cloud computing models

Unit-III **MIS Tools and applications for Decision making** **10 Hrs.**

MIS Tools and applications for Decision making

ERP and ERP support of Business intelligence (BI): Managers and Decision Making. Decision Support System (DSS): types, components, Data mining. Executive information system. Role of AI in decision making. Role of predictive analytics and data visualization in business

Unit-IV **Security and Ethical Challenges** **8 Hrs.**

Security and Ethical Challenges

Information security fundamentals, Key principles of information security , Common threats and vulnerabilities in MIS , Security measures and controls, Access control mechanisms: authentication, authorization, and accounting (AAA), Encryption techniques and cryptographic protocols , Ethical, and societal challenges of IT , Legal and regulatory framework, Privacy Policies

Unit-V **Social Computing (SC)** **7 Hrs.**

Social Computing (SC)

Web 2.0 and 3.0: static and dynamic platform, integration with AI and IoT , SC in business-shopping: leveraging social media platforms, Social listening and sentiment analysis, Social computing in Customer Relationship Management (CRM) , Marketing, operational and

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Operations Research (RCP23XOE213)	

Prerequisite:

- Basic Knowledge of Algebra
- Probability and Statistics

Course Objectives

- Formulate a real-world problem as a linear programming problem and able to solve.
- Understand the optimisation tools that are needed to solve linear programming problems.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Analyze real-world optimization problems by formulating them as Linear Programming Problems (LPP) and interpreting optimal solutions using the Simplex Method	L4	Analyze
CO2	Solve Linear Programming Problems using transportation and assignment models.	L3	Apply
CO3	Apply Decision Theory to determine the optimal course of action among available alternatives under conditions of certainty, risk, and uncertainty.	L3	Apply
CO4	Apply Game Theory for decision-making in conflicting situations involving one or more opponents (players).	L3	Apply
CO5	Analyze and solve complex problems by breaking them into smaller sub problems using Dynamic Programming models through recursive or iterative approaches	L4	Analyze

Operations Research (RCP23XOE213)

COURSE CONTENTS

Unit-I	Introduction to Operations Research	12 Hrs.
---------------	--	----------------

Introduction to Operations Research:

Introduction, Structure of the Mathematical Model, Limitations of Operations Research.

Linear Programming:

Introduction, Linear Programming Problem, Requirements of LPP, Mathematical Formulation of LPP, Graphical method, Simplex Method, Penalty Cost Method or Big M-method, Two Phase Method.

Unit-II	Transportation Problem	8 Hrs.
----------------	-------------------------------	---------------

Transportation Problem:

Formulation, solution, unbalanced Transportation problem. Finding basic feasible solutions North- west corner rule, least cost method and Vogels approximation method. Optimality test: MODI method.

Assignment Problem:

Introduction, Mathematical Formulation of the Problem, Hungarian Method Algorithm, Processing of n Jobs Through Two Machines and m Machines, Graphical Method of Two Jobs m Machines Problem Routing Problem

Unit-III	Decision Theory	7 Hrs.
-----------------	------------------------	---------------

Decision Theory:

Steps in Decision Theory approach, Decision-making Environment, Decision making under condition of certainty, Decision making under condition of uncertainty, Decision making under condition of risk, Maximum likelihood criterion.

Unit-IV	Game Theory	7 Hrs.
----------------	--------------------	---------------

Game Theory:

Competitive games, rectangular game, saddle point, Minimax / Maximin method of optimal strategies, value of the game. Solution of games with saddle points, dominance principle. Rectangular games without saddle point mixed strategy for 2 X 2 games.

Unit-V	Dynamic programming	8 Hrs.
---------------	----------------------------	---------------

Dynamic programming:

Characteristics of dynamic programming. Dynamic programming approach for Priority Management employment smoothening, capital budgeting, Stagecoach/Shortest Path, cargo loading and Reliability problems.

Text Books:

1. Operations Research - An Introduction: Taha, H. A., Pearson Education, 2022.
2. Operations Research, Gupta, P. K. and Hira, D. S., S. Chand Publications, 2014.

Reference Books:

1. Operations Research: Introduction to Models and Methods, Boucherie, R. J., Tijms, H. and Braaksma, A., 2021.
2. Introduction to Operations Research: Hiller, F. S. and Liebermann, G. J., McGrawHill Higher Education, 2010.
3. Operations Research: Principles and Practice: Ravindran, A., Phillips, D. T. and Solberg, J. J., Wiley India Pvt. Limited, 2009

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Personal Finance Management (RCP23XOE214)	

Course Objectives

- To create awareness and educate consumers on access to financial services.
- To make the students understand the basic concepts, definitions and terms related to direct taxation.
- To help the students compute the Goods and Service Tax (GST) payable by a supplier after considering the eligible input tax credit.
- To familiarize the students with micro finance for accelerating the expansion of local microbusinesses

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain the Indian financial system.	L2	Understand
CO2	Apply a financial planning framework to illustrate the role of finances in personal life.	L3	Apply
CO3	Calculate income from salaries, house property, business/profession, capital gains, and input tax credit sources.	L3	Apply
CO4	Calculate the amount of CGST, SGST, and IGST payable after considering eligible input tax credit.	L3	Apply
CO5	Explain how microfinance contributes to financial inclusion.	L2	Understand

Personal Finance Management (RCP23XOE214)

COURSE CONTENTS

Unit-I	Overview of Indian Financial System	8 Hrs.
---------------	--	---------------

Overview of Indian Financial System:

Characteristics, Components and Functions of Financial System. Financial Instruments and Financial Markets, Financial inclusion.

Introduction to Personal Finance

Personal Financial Planning in Action, Money Management Skills, Taxes in Your Financial Plan, Savings and Payment Services. Consumer Credit: Advantages, Disadvantages, Sources and Costs.

Unit-II	Personal Financial Management	8 Hrs.
----------------	--------------------------------------	---------------

Loans:

Home, Car, Education, Personal, Loan against property and Jewel loan.

Insurance:

Types of Insurance ULIP and Term; Health and Disability Income Insurance, Life Insurance.

Investment:

Investing Basics and Evaluating Bonds, Investing in Stocks and Investing in Mutual Funds, Planning.

Unit-III	Income Tax	9 Hrs.
-----------------	-------------------	---------------

Income Tax Act Basics

Introduction to Income Tax Act, 1961 Heads of Income and Computation of Total Income and Tax Liability- Heads of Income and Computation of Total Income under various heads, Clubbing Provisions, set off and carry forward of Losses, Deductions, Assessment of Income and tax liability of different persons.

Tax Management, Administrative Procedures and ICDS -

TDS, TCS and Advance Tax Administrative Procedures, ICDS.

Unit-IV	Goods and Services Tax	9 Hrs.
----------------	-------------------------------	---------------

GST Constitutional framework of Indirect Taxes before GST (Taxation Powers of Union & State Government); Concept of VAT: Meaning, Variants and Methods; Major Defects in the structure of Indirect Taxes prior to GST; Rationale for GST; Structure of GST (SGST, CGST, UTGST & IGST); GST Council, GST Network, State Compensation Mechanism, Registration.

Levy and Collection of GST

Taxable event "Supply" of Goods and Services; Place of Supply: Within state, Interstate, Import and Export; Time of supply: Valuation for GST- Valuation rules, taxability of

reimbursement of expenses; Exemption from GST: Small supplies and Composition Scheme:
Classification of Goods and Services

Unit-V **Introduction to Microfinance** **8 Hrs.**

Micro-Finance: Definitions, Scope & Assumptions, Types of Microfinances, Customers of Micro-finance, Credit Delivery Methodologies, SHG concept, origin, Formation & Operation of Self-Help Groups (SHGs).

Models in Microfinance - Joint Liability Groups (JLG), SHG Bank Linkage Model and GRAMEEN Model: Achievements & Challenges.

Institutional Mechanism

Current Challenges for Microfinance, Microfinance Institutions (MFIs): Constraints & Governance Issues, Institutional Structure of Microfinance in India: NGO MFIs, NBFC MFIs, Co-operatives, Banks, Microfinance Networks and Associations; Demand & Supply of Microfinance Services in India, Impact assessment and social assessments of MFI

Reference Books:

Public Systems and Policies (RCP23XOE215)	

Prerequisite:

- Basic Knowledge of Social science and Current affairs.

Course Objectives

- To explain public policy and its operations with special focus on policy relating to Government finance.
- To analyze and evaluate the impact of public policy on firms and the economy at large.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain the importance of public systems in a fast-changing environment in the global context	L2	Understand
CO2	Analyze the transformations in public systems with emphasis on current initiatives and emerging challenges in the field	L4	Analyze
CO3	Explain public policy and its operations with special focus on policy relating to Government finance	L2	Understand
CO4	Analyze the impact of public policy on firms and the economy at large and work under various fields as policymakers	L4	Analyze
CO5	Apply analytical skills through Expenditure Policy in public services case studies.	L3	Apply

Public Systems and Policies (RCP23XOE215)

COURSE CONTENTS

Unit-I	Introduction and Overview of Public Systems	10 Hrs.
---------------	--	----------------

Introduction and Overview of Public Systems: Ideology of Public Systems; Mechanistic and Organic view of Society and Individuals, The Legal Framework; Federal Government; State and Local Governments, Government growth; The size of Government.

Unit-II	Public Sector in the Economics Accounts	6 Hrs.
----------------	--	---------------

Public Sector in the Economics Accounts: Public Sector in the circular flow; Public Sector in the National Income Accounts.

Unit-III	Public Choice and Fiscal Politics	8 Hrs.
-----------------	--	---------------

Public Choice and Fiscal Politics: Direct Democracy; Representative Democracy; The Allocation Function; The Distribution Function; The Stabilization Function; Coordination of Budget Functions; The Leviathan Hypothesis.

Unit-IV	Introduction and Overview of Public Policy	9 Hrs.
----------------	---	---------------

Introduction and Overview of Public Policy:

Markets and Government; Social goods and Market failure, public expenditure and its evaluation; Cost Benefit Analysis, Public policy and Externalities, Taxation Policy and its impact, Income distribution, redistribution and social security issues Fiscal and Budgetary Policy, Fiscal Federalism in India.

Unit-V		9 Hrs.
---------------	--	---------------

Case Studies in Expenditure Policy: Public Services: A) National Defence B) Highways C) Outdoor Recreation D) Education.

Reference Books:

1. Banking and Financial Sector Reforms in India, by Asha Singh, M.S. Gupta, Serials Publication.
2. Indian Banking Sector: Essays and Issues (1st) , by M.S. Gupta & J.B. Singh, Serials Publication.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Fundamentals of Biomedical Instruments (RCP23XOE216)	

Prerequisite:

- Basic knowledge of Human Anatomy
- Basic knowledge of Electronics

Course Objectives

- To understand the basic principles and working of various medical instruments.
- To familiarize the learners with the various medical imaging modalities, their operating principles, instrumentation and clinical applications

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Describe and associate the different physiological processes taking place within the human body.	L2	Understand
CO2	Identify the use of biomaterials and apply principles of various transducers & sensors.	L3	Apply
CO3	Demonstrate the working principle of various medical instruments.	L3	Apply
CO4	Demonstrate principles used in imaging modalities and analysis.	L3	Apply
CO5	Describe different processes used in telemetry and telemedicine.	L2	Understand

Fundamentals of Biomedical Instruments (RCP23XOE216)

COURSE CONTENTS

Unit-I	Basic Human Physiology	7 Hrs.
---------------	-------------------------------	---------------

Cell: Electrical activity of excitable cells (Structure and functions of cell. Polarization and depolarization of cell)

Cardiovascular System: Heart, Conductive tissues of heart, Cardiac cycle, Heart Valves, System and Pulmonary Circulation, Transmission of Cardiac Impulse, Blood Pressure, ECG (Einthovens Tri- angle, Various leads and Waveforms).

Muscle Physiology: Muscle physiology and aspects of skin resistance. Generation of EMG

Nervous System: Different parts, their functions. Reflex actions and reflex arc, Function of Sympathetic and Parasympathetic nervous system. Generation of EEG

Unit-II	Biomaterial, Transducers and Sensors	10 Hrs.
----------------	---	----------------

Biomaterials used in fabrication of bio devices and implants: Polymeric, Composite biomaterials, Metallic biomaterials, and Ceramic biomaterials. Bio potential electrodes: Electrode tissue interface, Electrode electrolyte interface Electrodes used for ECG, EEG & EMG. Transducers & sensors: temperature transducer, pulse sensor, glucose sensor, respiration sensor , Introduction of biomaterials, Classification of biomaterials

Unit-III	Overview of Medical Instruments	8 Hrs.
-----------------	--	---------------

Classification, application and specifications of diagnostic, therapeutic and clinical laboratory equipment , Method of operation of these Bio Medical Instruments , ECG , EEG,EMG

Unit-IV	Imaging Modalities and Analysis	9 Hrs.
----------------	--	---------------

Radio graphic techniques, Computer Tomography, MRI, PET, SPECT , Ultrasonography , Endoscopy , Thermography, Retinal Imaging , Imaging application in Biometric systems, Analysis of digital images

Unit-V	Telemetry & Telemedicine	8 Hrs.
---------------	-------------------------------------	---------------

Introduction to Biotelemetry, Physiological parameters compliant to biotelemetry, Components of Biotelemetry system , Applications of telemetry in medical field (ECG, EEG & EMG)

Text Books:

IPR & Patenting (RCP23XOE217)	

Course Objectives

- To promote the knowledge of intellectual property laws of India and international treaties.
- To encourage innovation.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Classify the appropriate Intellectual Property Right (IPR) category for a given project or innovation.	L2	Understand
CO2	Differentiate the fundamentals of the patents, copyrights, and design registrations.	L4	Analyze
CO3	Prepare applications for protecting various forms of intellectual property rights.	L3	Apply
CO4	Examine effective communication with national and international IP organizations to pursue IP protection.	L4	Analyze

IPR & Patenting (RCP23XOE217)

COURSE CONTENTS

Unit-I Introduction to Intellectual Property Rights (IPR) 6 Hrs.

Concept meaning of IP and IPR, General principles of intellectual property rights, Need for intellectual property, Categories of IPR instruments - Patents, Trademarks, Copyrights, Industrial Designs, Plant variety protection, Trade secrets, Geographical Indications etc., Ownership, assignment, licenses, infringement, validity period, International treaties on IPR.

Unit-II Copyright and Design 9 Hrs.

The Indian Copyright Act, 1957, Meaning of copyrights and rights of copyrighted works, Types of copy-right, Process of filing a copyright application, Introduction to Designs Law Definitions, Registration of designs and procedure.

Unit-III Basics of Patents 9 Hrs.

The Indian Patent Act and The Indian Patent Rules, Conditions of patentability, Patentable and non-patentable inventions, Types of patent applications and patent specification, Inventors and Applicants, Category of applicants - natural person, small entity, start up and others, Patent databases and prior art search, International Patent Classification code.

Unit-IV Patent Application Drafting 9 Hrs.

Application, Specification, Claims drafting: Independent and dependent claims drafting, Process patent and product patent claims, Abstract, Drawings, Declaration as to inventor ship, Statement and under-taking.

Drafting response to communications from patent office.

Reading and understanding examination reports, Drafting response.

Unit-V Procedure for Filing a Patent Application, Timelines and Fees 9 Hrs.

Application for grant of patent, Forms and Fees, Request for (early) publication and / or (early) examination, Patent examination and hearing, Pre-grant and post-grant opposition.

Semester Project -I (RCP23XSC201P)	

Course Objectives:

- Students are expected to design, simulate/implement a project based on the knowledge acquired from current semester subjects.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Analyze a survey of several available literatures in the preferred field of study.	L4	Analyze
CO2	Describe various/alternate approaches to complete a project.	L2	Understand
CO3	Apply a collaborative project environment by interacting and dividing project work among team members.	L3	Apply
CO4	Use technical communication skills to present project work in the form of a technical report/paper.	L3	Apply
CO5	Apply teamwork and project management skills to plan, execute, and manage the research study.	L3	Apply

Semester Project:

The purpose of introducing semester project at second year level is to provide exposure to students with a variety of projects based on the knowledge acquired from the semester subjects. This activity is supposed to enrich their academic experience and bring enough maturity in student while selecting the project. Students should take this as an opportunity to develop skills in implementation, presentation and discussion of technical ideas/topics. Therefore, proper attention shall be paid to the content of semester project report which is being submitted in partial fulfilment of the requirements of the Second Year and it is imperative that a standard format be prescribed for the report.

Each student shall work on project approved by departmental committee approved by the Head of Department, a group of 03 to 05 students (max allowed: 5 students in extraordinary cases, subject to the approval of the department committee and the Head of the department) shall be allotted for each Semester Project. Each group shall submit at least 3 topics for the Semester Project. The departmental committee shall finalize one topic for every group. Semester Project Title or Theme should be based on knowledge acquired during semester.

The project work shall involve sufficient work so that students get acquainted with different aspects of knowledge acquired from semester subjects.

Student is expected to:

- Select appropriate project title based on acquired knowledge from current semester subjects.
- Maintain Log Book of weekly work done (please see attached log book format Table 1).
- Report weekly to the project guide along with log book.

Table 1: Log Book Format

Sr. No	Week (Start Date: End Date)	Work Done	Sign of Guide	Sign of Coordinator
1				

Assessment Criteria:

- At the end of the semester, after confirmation by the project guide, each project group will submit project completion report in prescribed format for assessment to the departmental committee (including project guide).
- Assessment of the project (at the end of the semester) will be done by the departmental committee (including project guide).

Prescribed project report guidelines:

Size of report shall be of minimum 25 pages. Project Report should include appropriate content for:

- Introduction
- Literature Survey
- Related Theory
- Implementation details
- Project Outcomes
- Conclusion
- References

Assessment criteria for the departmental committee (including project guide) for Continuous Assessment:

Guide will monitor weekly progress and marks allocation will be as per Table 2.

Table 2: Continuous Assessment Sheet

Sr No	Exam Seat No	Name of Student	Student Attendance	Log Book Maintain	Literature Review	Depth of Understanding	Report	Total
			5	5	5	5	5	25

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-III
Professional and Business Communication Tutorial (RCP23XHS233T)	

Pre-requisite:

- Basic course in Effective Communication Skills

Course Objectives:

- To inculcate professional and ethical attitude at the workplace.
- To enhance communication and interpersonal skills.
- To develop effective presentation skills.
- To hone written skills for technical documentation.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Apply group discussion techniques in professional situations.	L3	Apply
CO2	Use employability skills to optimise career opportunities.	L3	Apply
CO3	Employ storytelling techniques for corporate presentations.	L3	Apply
CO4	Prepare technical documents using appropriate style, format, and language.	L6	Create
CO5	Analyze the concept of professional ethics.	L4	Analyze
CO6	Demonstrate interpersonal skills in professional and personal situations.	L3	Apply

Professional and Business Communication Tutorial (RCP23XHS233T)

COURSE CONTENTS

The course is designed to equip students with essential skills, crucial for navigating the contemporary job market successfully and fostering a positive work environment through effective communication and collaboration. The assignments comprise of a combination of interactive activities, discussions, case studies and real-world simulations, to help students, not only to ace job interviews and professional interactions, but also to contribute positively to the ethical and productive functioning of any organization. For the project work, students must prepare and present a well-researched and persuasive business proposal, in groups, integrating the skills and knowledge acquired throughout the course

Unit-I	Group Discussion	1 Assignment
---------------	-------------------------	---------------------

Purpose of a GD, types of GD, criteria for evaluating GD, Dos and Don'ts of GD

Activity: The students will be divided into groups of 8-12 and each group will be given a topic/case to discuss within a given time frame. Each student will submit a write-up on their observations of the GD.

Unit-II	Employment Skills	2 Assignment
----------------	--------------------------	---------------------

Resume Writing: Types of resumes, structure, content, and formatting of resume

Activity: The students will prepare and submit their individual resume according to the professional requirements.

Interview Skills: Types and modes of interview, Preparation for interview, Dos and Don'ts of interview, frequently asked questions during interview

Activity: The students will submit a write-up on the FAQs and participate in mock interviews.

Unit-III	Corporate Story Telling	1 Assignment
-----------------	--------------------------------	---------------------

Elevator pitch, product stories, event stories, stories in presentations, storytelling in SOPs and inter- views, storytelling to manage conflict or to motivate.

Activity: The students will be divided into groups of 8-12 and asked to give a team presentation using storytelling technique and submit the hardcopy of the ppt.

Unit-IV	Technical Writing and Documentation	1 Assignment
----------------	--	---------------------

Business Proposal Writing:

Types of business proposals, format of proposal, language and style, presentation of proposal Meeting Documentation: Planning layout of meetings, observing meeting decorum, drafting notice, agenda, and minutes of meeting

Activity: The students will be divided into groups of 8-12 and each group will conduct a mock meeting based on an agenda and submit a write up of the meeting documentation.

Unit-V **Professional Ethics** **1 Assignment**

Effective work habits, accountability, integrity, and excellence

Activity: The students will be divided into groups of 8-12 and each group will analyse a case involving an ethical issue and submit the write up.

Unit-VI **Interpersonal Skills** **2 Assignment**

Team Building: Difference between group and team, importance of teamwork, strategies to be a good team player

Activity: The students will be divided into groups of 8-12 and each group will be assigned a task to be accomplished as a team, for which they will submit the write up. Leadership: Types of leadership, leadership styles, case studies

Activity: Each student will submit a write up involving a leader they admire, analysing various aspects of his leadership style.

Time Management: Importance of time management, cultural views of time, 80/20 rule, time wasters, setting priorities and goals.

Activity: Each student will submit a write up about a case involving time management.

Note: Batch wise tutorial work of minimum eight assignments from the above suggested list or any other assignments based on the syllabus will be included, which would help the learner to apply the concepts learnt.

Economics and Financial Management (RCP23XHS234)	

Course Objectives:

- To describe the relationships among variables to analyse economic issues
- To Explain the function of the market and prices as an allocative mechanism.
- To identify key macroeconomic indicators and measures of economic change, growth and development
- To understand basic concepts of financial management and their application in investment and financing decisions
- To explore the relationship between Financial Management and Financial Statements.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Analyse individual decision making, how prices and quantities are determined in product and factor markets, microeconomic and macroeconomic outcomes.	L4	Analyze
CO2	Analyse the performance and functioning of government, RBI, markets, and institutions in the context of social and economic problems.	L4	Analyze
CO3	Analyse the current economic status of India at global levels and provision in budget to address economic issues at national level.	L4	Analyze
CO4	Describe an understanding of the overall role and importance of the finance function.	L2	Understand
CO5	Analyse financial performance and make appropriate inferences.	L4	Analyze

Economics and Financial Management (RCP23XHS234)

COURSE CONTENTS

Unit-I Introduction to Economics 6 Hrs.

Fundamentals of Economics, Definition and scope of economics, the nature of the economic problem, finite resources and unlimited wants, definitions of the factors of production and their rewards, definition of opportunity cost, the influence of opportunity cost on decision making.

Microeconomics and Macroeconomics The role of markets in allocating resources, the market system, introduction to the price mechanism, Demand, Supply and Price determination, Price elasticity of demand and supply (PED),

Unit-II Role of Government and RBI 4 Hrs.

Money, Banking, Households, Firms, economies and diseconomies of scale, Market Structure, Fiscal Policy, Monetary Policy, Economic Growth, causes and consequences of recession, causes of economic growth, measurement of economic growth inflation and deflation, living standards, indicators of living standards

Unit-III Government Policies 5 Hrs.

Last 20 years Journey of Indian Economy, Measures taken to grow Indian Economy, Meaning of India is the world's fifth-largest economy by nominal GDP and the third-largest by purchasing power parity (PPP), On a per capita income basis, India ranked 139th by GDP (nominal) and 127th by GDP (PPP) (Data reference year 2023), Comparison of top 5 largest economies in world, Discuss key points of India latest union budget and its impact on Indian economy and citizens, Meaning of Initiatives like Make in India, Digital India, Skill India etc. and expected impact on Indian Economy

Unit-IV Overview of Financial Management 5 Hrs.

Fundamentals of financial management, principles and functions of the financial management, Strategy, methods, and techniques of the financial management, Overview of financial instruments, financial markets, financial Institutions

Unit-V Overview of Financial Statements 8 Hrs.

Balance Sheet, Profit and Loss Account, and Cash Flow Statement; Purpose of Financial Ratio Analysis; Liquidity Ratios; Efficiency or Activity Ratios; Profitability Ratios; Capital Structure Ratios; Stock Market Ratios;

Text Books

1. Datt & Sundharam's Indian Economy by Gaurav Datt & Biswajit Nag, S. Chand Publications, 73rd Edition, 2024

	Sem-III
Community Engagement Service (RCP23XEL201L)	

Pre-requisite:

- Fundamental of core branches
- Communication Skill

Course Objectives:

- To sensitise the student / learner into recognising community level problems & challenges and give them an opportunity to engage in activities for solving the same.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Implement knowledge understandings acquired from one's academic study/ field/ discipline for community level education, information dissemination by participation and engagement in community welfare activities	L3	Apply
CO2	Appraise commitment to community engagement activities that reinforce a sense of belongingness and gratitude towards societal causes.	L5	Evaluate
CO3	Demonstrate diversity in communities and cultures by adopting a change in approach and attitude as evidence of unconditional acceptance.	L3	Apply
CO4	Assess the effectiveness of working in a team by demonstrating the co-existence of the roles of a sincere worker and an effective leader.	L5	Evaluate

Community Engagement Service (RCP23XEL201L)

COURSE CONTENTS

Unit-I	Open Activities	6 Hrs.
---------------	------------------------	---------------

Participation in: blood donation camps organizer / donor, day-long tree plantation or afforestation/ seed dispersal / cleanliness (water bodies, surrounding etc.) drives. Literacy drives for children / youth / adults. One day hand holding activities in work-shop conduct for under privilege kids in the areas of basic science, math, technical skill demonstration and building.

Unit-II	Technical (Program core related)	8 Hrs.
----------------	--	---------------

Cyber-crime, security awareness and vulnerabilities sensitization, information dissemination and awareness sessions in indicated focus areas. Promotion and Sensitization for Sustainable living focusing on solar power, water recycling, e-waste responsible disposal, waste recycling etc. in indicated focus areas.

Focus areas: residential societies, schools, under-privileged areas, governments /private offices, and similar other establishments.

Field Survey: Reporting on proactively conducted survey in the areas of resource management for water, vegetables, electricity, crops etc.

Activities to be performed: Among the listed activities students are expected to complete one open activity mandatorily, and one technical (program core) OR field survey activity. The activities mentioned are exemplary in nature and any other additional activity of similar nature too can be undertaken by the learners, provided it is approved and endorsed by the faculty mentor / head of the department.

Suggested Activities:

1. Undertaking cyber safety / security awareness sensitization drive / program especially for un- initiated students / individuals in schools / colleges / residential complex / offices etc.

Typical suggested tabulation.

Participant No.	Name	Age	School/ College/ Residence/ office	Email	Contact Number	Awareness Level	Remarks

2. Energy / Power assessment for establishments (societies, schools, colleges, residential complex, shops etc.) involving computing power devices ratings, power consumption over operating period, calculating energy cost from tariff card / rates for every group of appliances / devices or equipment. Typical suggested tabulation pattern.

Device/Appliance Group	Number of appliances /devices	Power Rating (kW)	Operating Hours (h/day)	Energy Consumption (kWh/day)	Tariff Rate (Rs. /kWh)	Energy Cost (Rs.)
Lighting Fixtures						
Ceiling Fans						
Air Conditioner (AC)						
Security Systems						
Water Pump						

3. Traffic light monitoring viz-e-viz average traffic density on road. Analysing the data and commenting on results. Evaluating and comparing impact on road repairs related lane blockage and proportional recommendation for lights timing variations. Typical suggested tabulation pattern

Sr. No.	Timestamp	Traffic Density	Traffic Light Status	Road Repair Status	Remarks

4. Help compute green footprint of select number of household (per member) - say 10 houses of 3+ members. This is for evaluating dependence upon non green energy sources and habits and changes in lifestyle for attempts at their reductions. Learners are encouraged to use typically available online carbon-footprint calculators. The table herewith maybe used for reference calculations.

House No.	House hold Name	Number of Members	Energy Usage (kWh)	Water Usage (liters)	Waste Production (kg)	Transportation Habits	Green Foot print

5. Compulsion of having a bore well for non-potable water supply in city residential complexes is a modern-day rule. Increased pace of re-development, as well as number of occupants in given area, has resulted in increased number of bore wells being dug within and outside city limits. Reduced yield, quality and quantity of water adds to the recurring maintenance cost of bore wells, especially in the city areas. Poor water recharge systems along-with depleting open soil cover area in wake of wall-to-wall of concrete carpet aggravate the problem. Study, analyse and report a residential society's capacity of water

requirement, present day bore wells in action, approximate yield, maintenance cost and frequency, bore well flushing iterations in wake of redevelopment in neighbourhood. A typical tabulation mechanism for inferences can be as below:

Bore well No.	Location	Depth (ft)	Yield (Litters/Day)	Water Quality	Maintenance Cost (Rs.)	Remarks

6. Detection of Adulteration in food / fruits / vegetables / milk / mava /saffron etc. or contamination of potable drinking water. Ex. Adulteration in fruits could be apple waxing, injecting chemicals in watermelon, pomegranate etc. to give it a bright red color, artificial ripening of mangos etc. For a given activity, samples from more than one area, specifically from mofussil /interiors / ‘gaothans etc., may be obtained, to evaluate sample purity or extent of adulteration. Learners are encouraged to use online resources provided by ‘Food Safety and Standards Authority of India (fssai), for handholding in requisite procedures.

ACTIVITY ENDORSEMENT CERTIFICATE

Date:

Community engagement service is a mandatory course, of two credits, introduced at second year of engineering under the autonomous structure of the institute.

Course objective: To sensitize the student / learner into recognizing social problems & challenges and give them an opportunity to engage in activities for solving the same.

Course outcomes:

1. Knowledge application: Applies knowledge understandings acquired from one's academic study/ field/ discipline for community level education, information dissemination by participation and engagement in community welfare activities.
2. Commitment for cause: Identify and experience commitment for community engagement activities that reinforce sense of belongingness and gratitude towards societal cause.
3. Diversity: Witness diversity in communities and cultures and demonstrate change in approach/ attitude as an evidence of unconditional acceptance.
4. Team: Recognize, experience and value effectiveness of working in a team, demonstrating co- existence of the roles - sincere worker and effective leader.

This is to certify that Mr./Ms. _____ bearing PRN No. _____ is a student of S.Y. B.Tech. _____ branch of engineering.

He / She is a bonafide student of R. C. Patel Institute of Technology, Shirpur. He / She is reliable, sincere, hardworking and capable of conducting activity in your premises. We request you to kindly allow for the conduction of the activity and we also solicit your earnest co-operation in the same.

Signature

Department Head:

DISCLAIMER

(This form must be read, signed, and submitted prior to the beginning of the community service activity.)

Student Details	Activity Details
Name	
PRN No.	Date
Program	Time
Class/Div.	Address

I, the undersigned _____ accept the following terms and conditions unconditionally:

1. I accept and understand that the community activity identification and selection has been done willingly by me.
2. I undertake to convey that, I am apparently in good health and well-being, and suffer no physical impairment that would or should prevent my participation in the activity.
3. I undertake to bear all related expenses and risk of travel related to the activity and shall not hold any personnel from the institute responsible with regards to claims and / or loss in the process of conduct of activity.
4. I undertake that my parents or legal/local guardians are aware of said activity and agree to above mentioned terms and conditions.

Students name & signature:

Parent or Guardians name & signature:

Guidelines for Assessment of the work

- The review/progress monitoring committee shall be constituted by the Head of the Department. The progress of selected/assigned activities is to be evaluated on a continuous basis, holding at least one review in the semester.
- In the continuous assessment, focus shall also be on each individual student's contribution to the team activity, their understanding and involvement as well as responses to the questions being raised at all points in time.
- Each group needs to submit the following forms to the respective supervisor after conducting both the activities:
 - Activity Conduction Report
 - Participant Feedback (online / offline)
 - Participant Attendance (online / offline)
 - Survey Report
 - Participation certification

Forms for Technical Activity:

1. Activity Conduction Report

Sr. No.	Name of the Activity	
1	Date of Activity	
2	Activity type (Open / Technical)	
3	Activity objectives	
4	Place of Activity	
5	PRN No. and Names of students	
6	Name of the Association	
7	Activity description	
8	No. of participants	
9	Photos (Geo tagged)	

2. Participant feedback (online / offline):

Sr. No.	Indicators	Scale: 1 (Lowest) to 5 (Highest)
1	The objectives of the training were clearly defined.	
2	The content was organized and easy to follow.	
3	This training experience will be useful to me.	
4	The trainer was knowledgeable about the training topics.	
5	The training objectives were met	

Evaluation Scheme:

Continuous Assessment (A): Term Work: - 25 marks, distribution as herewith:

- 1. Rubric for Open Ended Activity (10 marks):** Activity Conduction Report
- 2. Rubric for Technical Activity (15 marks)**

Sr. No.	Performance Indicators (Maximum marks per indicator are given in bracket)	Marks
1	Pre-requisite documents (permission letter, presentation material, permission letters, etc.) [05 marks]	
2	Participant Feedback [05 marks]	
3	Participant attendance [05 marks]	
	TOTAL	

OR

Sr. No.	Performance Indicators (Maximum marks per indicator are given in bracket)	Marks
1	Topic selection	
2	Survey preparation	
3	Field work	
4	Analysis	
5	Report writing	
	TOTAL	

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-IV
Signals and Systems (RCP23EPC251)	
Signals & Systems Tutorial (RCP23EPC251T)	

Pre-requisite

- Engineering Mathematics-II
- Foundation of Signal Processing

Course Objectives:

- To introduce students, the concept and theory of signals and systems needed in Electronics and Telecommunication Engineering fields.
- To introduce students to the basic idea of signals and systems analysis with its characterization in time and frequency domain.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Classify, and perform mathematical operations on various types of signals and systems.	L4	Analyze
CO2	Determine the impulse response and analyse LTI systems in time domain using convolution integral and convolution sum.	L3	Apply
CO3	Analyze the effect of frequency transformation of signals and systems in continuous and discrete time domain.	L4	Analyze
CO4	Apply the concepts of Signals and Systems in different areas of Telecommunication.	L3	Apply

Signals and Systems (RCP23EPC251)

COURSE CONTENTS

Unit-I **Signal and operations** **6 Hrs.**

Introduction to signals: Definition, sampling theorem, sampling of continuous time signals, Nyquist Criterion, concept of aliasing, concept of digital frequency. Continuous and discrete time representation of elementary signals: exponential, sine, step, impulse, ramp, rectangular, triangular, signum, sinc. Operations on signals (time shift, time reversal, time scaling), Introduction to systems: Definition, Classification of systems: static and dynamic, time variant and time invariant, linear and nonlinear, causal and non-causal, stable and unstable systems, Invertible and Non-Invertible Systems.

Unit-II **Continuous Time and Discrete Time Linear Time Invariant (LTI) Systems** **6 Hrs.**

Response of Continuous Time LTI System: Representation of systems using differential equation, Impulse response and convolution integral, properties of convolution, signal responses to CT-LTI system, system stability Impulse, step and, system stability. Response of Discrete Time-LTI System: Representation of systems using difference equation, Impulse response characterization and convolution sum, Properties of convolution summation, Impulse response of DT-LTI system and its properties, step response, system stability.

Unit-III **Fourier Transform (FT)** **6 Hrs.**

Fourier Transform and Inverse Fourier Transform of a periodic continuous and discrete time signals and systems, limitations of CT/DT Fourier Transform and need for Laplace / Z Transform.

Unit-IV **Laplace Transform(LT)** **5 Hrs.**

Review of unilateral and bilateral Laplace Transform, properties, inverse of Laplace Transform, concept of Region of Convergence (ROC), poles and zeros, relation between continuous time Fourier Transform and Laplace Transform. Analysis of continuous time LTI systems using Laplace Transform: Transfer Function, causality and stability of systems

Unit-V **Analysis of Discrete Time Signals and Systems** **5 Hrs.**

Introduction to Z-Transform Need of Z-Transform, definition of unilateral and bilateral Z-Transform, Z- Transform of finite and infinite duration sequences, properties, Inverse Z-Transform, relation between discrete time Fourier Transform and Z-Transform, Z - Transform of standard signals, ROC for Z-Transform, plotting poles and zeros of transfer function. Analysis of discrete time LTI systems using Z-Transform: Transfer Function, causality and stability of systems, relation between Laplace Transform and Z Transform.

Signals & Systems Tutorial (RCP23EPC251T)

Signals & Systems Tutorial:

1. Classification of CT/DT Signals and Systems.
2. I/O operations on CT/DT Signals
3. Sampling and Quantization
4. Analyze Linear Time Invariant (LTI) Continuous Time Systems
5. Perform convolution of continuous and discrete time signals.
6. Fourier Transform
7. Laplace Transform and Inverse Transform
8. Z-Transform and Inverse Transform
9. Analysis of continuous time LTI systems
10. Analysis of discrete time LTI systems

Tutorial Assessment:

Batch wise tutorial work of minimum eight tutorials from the above suggested list or any other tutorial based on syllabus will be included, which would help the learner to apply the concept learnt. Batch wise tutorial sessions are to be conducted on topics which would help the learner to identify/analyze the problem and to apply problem solving techniques learnt.

Text Books

1. A. Nagoor Kani, Signals and Systems, 2nd 2nd Edition, McGraw Hill India, 2018.

Suggested MOOCs:

1. Signals and Systems by Prof. Kushal K. Shah (IISER Bhopal)
<https://archive.nptel.ac.in/courses/108/106/108106163>
2. Principles of Signals Systems by Prof. Aditya K. Jagannatham (IIT Kanpur)
<https://archive.nptel.ac.in/courses/108/104/108104100/>
3. Signals and Systems Laboratory: Virtual Laboratory <http://ssl-iitg.vlabs.ac.in/>

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-IV
Integrated Circuits (RCP23EPC252)	
Integrated Circuits Laboratory (RCP23EPC252L)	

Prerequisite:

- Basic Electrical Engineering & Digital Electronics
- Electronic Devices and Circuits
- Digital System Designs

Course Objectives:

- To understand the concepts, and working principle of integrated circuits.
- To design and analyze different circuits as well as systems for various applications using integrated circuits.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Describe the physical operation of integrated circuits using Op-Amp's	L2	Understand
CO2	Analyse linear and non-linear Op-Amp applications	L4	Analyze
CO3	Design various applications using Op-Amps, Timers, and special IC's.	L6	Create
CO4	Implement different types of applications using various Analog IC's	L3	Apply

Integrated Circuits (RCP23EPC252)

COURSE CONTENTS

Unit-I Introduction to Operational Amplifiers 8 Hrs.

Block diagram of Op-Amp, analysis of basic differential amplifier circuit configurations using MOS- FETs (DIBO, DIUO, SIBO, SIUO), MOSFET differential amplifier with active load, Op-Amp symbol and terminals, ideal Op-Amp and practical Op-Amp characteristics, Op-Amp parameters, open loop and closed loop configurations.

Unit-II Linear and Non-linear Applications of Operational Amplifier 10 Hrs.

Amplifiers: Inverting, non-inverting, buffer, summing, difference, integrator, differentiator, 3-Op-Amp Instrumentation Amplifier, Log and Antilog amplifier. Comparators: Inverting and non-inverting comparator, zero crossing detector, window detector, Inverting and non-inverting Schmitt trigger, Waveform generator: Square wave generator, triangular wave generator. Precision rectifier: Half wave and full wave. Active Filters: First and second order active LPF and HPF.

Unit-III Analog to Digital and Digital to Analog Converters 8 Hrs.

Performance parameters of ADC, single ramp ADC, ADC using DAC, dual slope ADC, successive approximation ADC, flash ADC, Performance parameters of DAC, binary weighted register DAC, R/2R ladder DAC, inverted R/2R ladder DAC.

Unit-IV Special Purpose Integrated Circuits 8 Hrs.

IC 555(timer): Internal block diagram and working principle of IC 555, IC 555 as Astable and Monostable Multivibrator (Design and Working principle), Internal block diagram and working principle of IC 566 (VCO), Internal block diagram and working principle of IC 565 (PLL).

Unit-V Voltage Regulators 8 Hrs.

Three terminal regulators: Functional block diagram, working and design of three terminal fixed (78XX, 79XX series) and three terminal adjustable (LM 317, LM 337) voltage regulators; General purpose voltage regulator: Functional block diagram, working and design of general purpose 723 (LVLC, LVHC, HVLC and HVHC) with current limit and current fold-back protection.

Integrated Circuits Laboratory (RCP23EPC252L)

List of Laboratory Experiments: (Any Eight)

1. Design Inverting and Non-inverting amplifier using Op-Amp (IC 741).
2. Design Integrator and Differentiator using Op-Amp (IC 741).
3. Design Summing /Difference amplifier using Op-Amp (IC 741).
4. Second Order Low Pass filter using Op-Amp (IC 741).
5. Design Square wave and Triangular wave generator using Op-Amp (IC 741).
6. Design Schmitt trigger using Op-amp (IC 741).
7. Design Half wave and Full Wave Precision Rectifier using Op-Amp (IC 741).
8. Design R-2R Ladder DAC using Op-Amp (IC 741).
9. Design Astable Multivibrator using IC 555.
10. Design Voltage Regulator using IC 723.
11. To perform AC and DC analysis of MOSFET based differential amplifier using Spice Tool.
12. Instrumentation Amplifier using Spice Tool.

Minimum 08 experiments from the above suggested list or any other experiment based on syllabus will be included, which would help the learner to apply the concept learnt.

Microcontroller & Applications (RCP23EPC253)	
Microcontroller & Applications Laboratory (RCP23EPC253L)	

Prerequisite:

- Basic Electrical Engineering & Digital Electronics
- Digital System Designs

Course Objectives:

- To develop background knowledge and core expertise in microcontrollers.
- To understand peripheral devices and their interfacing to microcontrollers.
- To write programs for microcontrollers and their applications in Assembly language.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain AVR microcontroller architecture.	L2	Understand
CO2	Develop assembly language programs for AVR microcontroller.	L6	Create
CO3	Design and implement AVR microcontroller-based systems.	L6	Create
CO4	Explain 16-bit and 32-bit microprocessor architecture.	L2	Understand

Microcontroller & Applications Laboratory (RCP23EPC253L)

List of Laboratory Experiments: (Any Eight)

1. Study of the AVR microcontroller development board in detail.
2. a) To add two hexadecimal numbers and show the result, b) To multiply two hexadecimal numbers using MUL instruction, c) To multiply two hexadecimal numbers without using MUL instruction, d) To make an LED/series blink continuously.
3. To implement decade counter, counting from 0 to 9, using single seven segment display.
4. To display the following waveforms at an output port of an AVR micro-controller:
a) Square wave of frequency 3 kHz and 50% duty cycle
b) Step wave of frequency 3 kHz (3 steps)
c) Sawtooth wave
d) Triangular wave
5. Generate square waves of following frequencies using Timer: 1. 10 kHz, Timer mode 1
2. 7 kHz, Timer mode 2
6. Generate square wave of 5 kHz frequency using timer interrupt, 1. Generate square wave of 5 kHz frequency using timer interrupt and simultaneously detect input and corresponding output.
7. Generate square waves of 5 kHz frequency using timer interrupt and simultaneously detect input and corresponding output. Also, simultaneously turn LED 'ON' using external hardware interrupt.
8. Interfacing a relay with suitable AC/DC load.
9. Interfacing display- LED / SSD / LCD and display suitable message
10. Interfacing- Motor (dc-continuous/stepper/servo etc)
11. Ambient temperature displays (using typically LM35 or a suitable sensor)
12. Inter-microcontroller communication using RS-232/SPI/I2C etc protocols.

Batch wise laboratory work of minimum eight experiments from the above suggested list or any other experiment based on syllabus will be included, which would help the learner to apply the concept learnt.

Data Structures and Algorithms (RCP23EMD251)	
Data Structures and Algorithms Laboratory (RCP23EMD251L)	

Prerequisite:

- Structure Programming Using C

Course Objectives:

- To introduce the concept of data structures.
- To design and implement various data structure through abstract data type.
- To develop application using data structure algorithms.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Implement linear data structures using array and linked list.	L3	Apply
CO2	Solve problems using non-linear data structures.	L3	Apply
CO3	Analyze the performance of sorting and searching algorithms	L4	Analyze

Data Structures and Algorithms Laboratory (RCP23EMD251L)

List of Laboratory Experiments (Minimum 08 Experiments)

1. To implement stack.
2. To implement parenthesis checker using stack.
3. To Implement Infix to Postfix conversion.
4. To evaluate prefix and postfix expression.
5. To implement Linear queue.
6. To implement various operations on linked list copy, concatenate, split, reverse, count no. of nodes.
7. To implement various operations on doubly linked list.
8. To implement Stack using Linked List.
9. To implement Queue using Linked List.
10. To implement Sorting algorithms.
11. To implement Searching algorithms.
12. To create a binary tree and traverse it in Inorder, preorder and Postorder.
13. To implement binary search tree.
14. To implement DFS and BFS in graph theory

Text Books

3. Kruse, Leung, Tondo, Data Structures and Program Design in C, 2nd Edition, Pearson Education, 2013.
4. Seymour Lipschutz, Data Structures, Schaum's Outline Series, 1st Edition, Tata McGraw-Hill, 2014.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-IV
Project Management (RCP23XOE261)	

Prerequisite:

- Basic Concept of Management

Course Objectives

- To familiarize the students with the use of a structured methodology/approach for every unique project undertaken, utilizing project management concepts, tools and techniques.
- To appraise the students with the project management life cycle and make them knowledgeable about the various phases from project initiation through closure.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain the project management life cycle, project phases, and the roles and responsibilities of a project manager.	L2	Understand
CO2	Apply project selection criteria to select an appropriate project from available alternatives.	L3	Apply
CO3	Apply project management tools to develop a Work Breakdown Structure (WBS), prepare a basic project schedule, and identify major project risks.	L3	Apply
CO4	Analyze project performance using Earned Value Management techniques and evaluate lessons learned during project execution for future improvement.	L4	Analyze
CO5	Analyze the Waterfall and Agile Scrum methodologies for software development projects.	L4	Analyze

Project Management (RCP23XOE261)

COURSE CONTENTS

Unit-I **Project Management Foundation** **8 Hrs.**

Definition of a project, Project Vs Operations, Necessity of project management, Triple constraints, Project life cycles (typical atypical). Project phases and stage gate process. Role of project manager, Negotiations and resolving conflicts, Introduction to project leadership, ethics in projects, Multicultural and virtual projects, Project management in various organization structures, PM knowledge areas as per Project Management Institute (PMI).

Unit-II **Initiating Projects** **8 Hrs.**

How to get a project started, selecting project strategically, Project selection models (Numeric /Scoring Models and Non-numeric models), Project portfolio process, Project sponsor and creating charter, Effective project team, Stages of team development growth (forming, storming, norming performing), team dynamics.

Unit-III **Project Planning** **9 Hrs.**

Work Breakdown structure (WBS) and linear responsibility chart, Project cost estimation and budgeting, Top down and bottoms up budgeting, Networking and Scheduling techniques, PERT, CPM. Crashing project time & Resource loading and levelling (Only Theory), Project Stakeholders and Communication plan. Risk Management in projects: Risk management planning, Risk identification and risk register, Qualitative and quantitative risk assessment, Probability, and impact matrix. Risk response strategies for positive and negative risks.

Unit-IV **Monitoring and Controlling Projects** **9 Hrs.**

Planning monitoring and controlling cycle, Information needs and reporting, engaging with all stake- holders of the projects, communication and project meetings. Earned Value Management techniques for measuring value of work completed, using milestones for measurement, change requests and scope creep, Project audit, Project Contracting: Project procurement management, contracting and out- sourcing. Closing the Project: Customer acceptance, Reasons of project termination, Various types of project terminations (Extinction, Addition, Integration, Starvation), Process of project termination, completing a final report, doing a lessons learned analysis, acknowledging successes and failures.

Unit-V **Agile project management** **8 Hrs.**

Agile principle, Agile Manifesto, Agile process framework, Characteristics of Agile Approaches and Scrum, Benefits of Agile project management, Implementing Agile project management. Agile Project Planning: Comparison of Agile Project Management with Traditional Waterfall Approach, Project Planning with Scrum, Scrum Artifacts Supporting

Project Planning, Scrum Events for Project Planning. Scheduling with scrum, Techniques for scrum scheduling- Poker estimation. Agile Tools for Tracking Project Progress: Task Boards, Burnup and Burn down Charts.

Text Books:

1. Project Management: A managerial approach, Jack Meredith & Samuel Mantel, 11th Edition, Wiley India. ,
2. Project Management: The Managerial Process, 8th edition, Erik Larson, Clifford Gray, McGraw Hill Education.
3. Agile Project Management, Jim Highsmith, Pearson Education, Low Price Edition, India.

2. Project Management, Gido Clements, Cengage Learning.
3. Project Management, Gopalan, Wiley India.
4. Project Management, Dennis Lock, 9th Edition, Gower Publishing England.
5. Agile Essentials You Always Wanted to Know, Kalpesh Ashar, Vibrant Publishers U.S.A.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-IV
Cyber Security, Policies and Laws (RCP23XOE262)	

Course Pre-requisite:

- Fundamentals of Computers

Course Objectives

- Familiarize with the provisions and implications of the Digital Personal and Data Protection Act, the obligations of data fiduciaries, the rights and duties of data principals, and mechanisms for resolving breaches.
- Equip individuals and organizations with the knowledge and tools to create secure cyber eco systems, strengthen regulatory frameworks, and develop incident response plans.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain the types of cybercrimes and interpret relevant legal frameworks related to digital personal data protection.	L2	Understand
CO2	Apply cybersecurity strategies based on the National Cyber Security Policy to address common security threats.	L3	Apply
CO3	Apply appropriate law enforcement strategies to both, prevent and control cybercrime.	L3	Apply
CO4	Comprehend regulations and strategies pertaining to AI (Artificial Intelligence) and large language models.	L2	Understand

Cyber Security, Policies and Laws (RCP23XOE262)

COURSE CONTENTS

Unit-I **Cyber Crime** **8 Hrs.**

Definition and Origin of the Word, Cyber Crime and Information Security, who are Cyber Criminals, Classification of Cybercrimes, E-mail Spoofing, Spamming, Cyber Defamation, Internet Time Theft, Salami Attack, Salami technique Data Diddling, Forgery, Newsgroup Spam, Online Frauds, Porno- graphic Offenders, Email Bombing, Password Sniffing, Credit Card Frauds.

Unit-II **Cyber Offenses** **8 Hrs.**

How Criminals plan them, Categories of Cyber Crimes, How Criminal Plans the Attack: Active Attacks, Passive Attacks, Social Engineering, Classification of Social Engineering, Cyber Stalking: types of Stalkers, Cyber Cafe and Cyber Crimes, Botnets, Attack Vectors, Cyber Crime and Cloud Computing.

Unit-III **Indian IT Act .** **9 Hrs.**

Cyber Crime and Criminal Justice, Penalties, Adjudication and Appeals Under the IT Act, 2000, IT Act. 2008 and its Amendments Security aspect in Cyber-Law, The Contract Aspects in Cyber Law, The Security Aspect of Cyber Law, Security Standards: SOX, GLBA, HIPAA, NIST Cyber Security Framework (CSF).

Unit-IV **India's Digital Personal and Data Protection Act (2023)** **8 Hrs.**

Preliminary, Obligations of Data Fiduciary, Rights and Duties of Data Principal, Special Provisions, Data Protection Board of India, Powers, Functions and Procedure to Be Followed by Board, Appeal and Alternate Dispute Resolution, Penalties and Adjudication.

Unit-V **India's AI Regulation and Strategy** **9 Hrs.**

Privacy, Security and Artificial Intelligence, Differential Privacy, Security in AI. National Artificial Intelligence Strategy, Principles for Responsible AI, Information Technology (Intermediary Guidelines and Digital Media Ethics Code-2021), Draft National Data Governance Framework Policy (NDGFP), Rules against Deep fakes, Due diligence advisory for AI, AI regulations framework (June 2024).

Text Books

1. Cyber Security: Understanding Cyber Crimes, Computer Forensics and Legal Perspectives by Nina Godbole, Sunit Belapur, Wiley-2011.
2. Understanding Cybersecurity Management in Decentralized Finance: Challenges, Strategies, and Trends by Gurdip Kaur, Springer-2023.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-IV
Advanced Operations Research (RCP23XOE263)	

Prerequisite:

- Operation Research
- Mathematics (Calculus)

Course Objectives

- To develop an ability to analyse the structure and mathematical model of various complex system occurring in manufacturing system, service system, and business applications.
- To develop knowledge of the mathematical structure of linear and nonlinear optimization models.
- To develop an understanding of the techniques used to solve linear and nonlinear optimization models using their mathematical structure.
- To develop an understanding of the use of modelling languages for expressing and solving optimization models.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Apply Duality theory to solve linear programming problem and analyse optimum solution.	L3	Apply
CO2	Construct linear integer programming models and apply the O.R. algorithms and techniques to solve linear integer programming problems.	L3	Apply
CO3	Determine best satisfying solution under a varying quantity of resources and priorities of the goals.	L5	Evaluate
CO4	Set up decision models and solve nonlinear programming-unconstrained optimization problems.	L3	Apply
CO5	Set up decision models and solve nonlinear programming-constrained optimization problems.	L3	Apply

Advanced Operations Research (RCP23XOE263)

COURSE CONTENTS

Unit-I **Dual Linear Programs** **6 Hrs.**

Primal, dual, and duality theory - The dual simplex method -The primal-dual Algorithm- Duality applications. Post optimization problems: Sensitivity analysis.

Unit-II **Integer Programming** **7 Hrs.**

Pure and mixed integer programming problems, Solution of Integer programming problems Gomory's all integer cutting plane method and mixed integer method, branch and bound method, Zero-one programming.

Unit-III **Goal Programming** **7 Hrs.**

Concept of Goal Programming, GP model formulations, Graphical method of GP, The simplex method of GP, Application areas of GP.

Unit-IV **Nonlinear Programming- Unconstrained optimization** **11 Hrs.**

Minimization and maximization of convex functions- Local & Global optimum- Convergence-Speed of convergence. one-dimensional unconstrained optimization Newton's method Golden-section search method , multidimensional unconstrained optimization Gradient method steepest ascent (descent) method Newton's method .

Unit-V **Nonlinear Programming- Constrained optimization** **11 Hrs.**

Constrained optimization with equality and inequality constraints. Constrained optimization: Lagrangian method - Sufficiency conditions - Kuhn-Tucker optimality conditions Rate of convergence - Engineering Applications Quadratic programming problems-convex programming problems.

Corporate Finance Management (RCP23XOE264)	

Course Objectives

- Overview of Indian financial system, instruments and market.
- Basic concepts of value of money, returns and risks, corporate finance, working capital and its management.
- Knowledge about sources of finance, capital structure, dividend policy.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Describe Indian finance system.	L2	Understand
CO2	Apply concepts of time value money and risk returns to product, services and business	L3	Apply
CO3	Explain corporate finance and working capital management	L2	Understand
CO4	Apply Investment and finance decisions.	L3	Apply
CO5	Apply dividend decisions	L3	Apply

Corporate Finance Management (RCP23XOE264)

COURSE CONTENTS

Unit-I	Overview of Indian Financial System	9 Hrs.
---------------	--	---------------

Characteristics, Components and Functions of Financial System. Financial Instruments: Meaning, Characteristics and Classification of Basic Financial Instruments Equity Shares, Preference Shares, Bonds-Debentures, Certificates of Deposit, and Treasury Bills. Financial Markets: Meaning, Characteristics and Classification of Financial Markets Capital Market, Money Market and Foreign Currency Market. Financial Institutions: Meaning, Characteristics and Classification of Financial Institutions Commercial Banks, Investment-Merchant Banks and Stock Exchanges.

Unit-II	Concepts of Returns and Risks	8 Hrs.
----------------	--------------------------------------	---------------

Measurement of Historical Returns and Expected Returns of a Single Security and a Two-security Portfolio; Measurement of Historical Risk and Expected Risk of a Single Security and a Two- security Portfolio. Time Value of Money: Future Value of a Lump Sum, Ordinary Annuity, and Annuity Due; Present Value of a Lump Sum, Ordinary Annuity, and Annuity Due; Continuous Compounding and Continuous Discounting.

Unit-III	Overview of Corporate Finance	9 Hrs.
-----------------	--------------------------------------	---------------

Objectives of Corporate Finance; Functions of Corporate Finance-investment Decision, Financing Decision, and Dividend Decision.: Working Capital Management: Concepts of Meaning Working Capital; Importance of Working Capital Management; Factors Affecting an Entity's Working Capital Needs; Estimation of Working Capital Requirements; Management of Inventories; Management of Receivables; and Management of Cash and Marketable Securities.

Unit-IV	Capital Budgeting	8 Hrs.
----------------	--------------------------	---------------

Meaning and Importance of Capital Budgeting; Inputs for Capital Budgeting Decisions; Investment Appraisal Criterion Accounting Rate of Return, Payback Period, Discounted Payback Period, Net Present Value (NPV), Profitability Index, Internal Rate of Return (IRR), and Modified Internal Rate of Return (MIRR)

Unit-V	Capital Structure	8 Hrs.
---------------	--------------------------	---------------

Factors Affecting an Entity's Capital Structure; Overview of Capital Structure Theories and Approaches Net Income Approach, Net Operating Income Approach; Traditional Approach, and Modigliani-Miller Approach. Relation between Capital Structure and Corporate Value;

Concept of Optimal Capital Structure Dividend Policy: Meaning and Importance of Dividend Policy; Factors Affecting an Entity's Dividend Decision; Overview of Dividend Policy Theories and Approaches Gordon's Approach, Walter's Approach, and Modigliani-Miller Approach.

Text Books:

1. Financial Management, Theory Practice 8th Edition (2011), by Prasanna Chandra: Tata Mc- Graw Hill Education Private Limited, New Delhi.
2. Indian Financial System, 9th Edition (2015) by M. Y. Khan; Publisher: McGraw Hill Education, New Delhi.
3. Financial Management, 11th Edition (2015) by I. M. Pandey; Publisher: S. Chand (G/L) Company Limited, New Delhi.

Reference Books:

1. Fundamentals of Financial Management, 13th Edition (2015) by Eugene F. Brigham and Joel F. Houston; Publisher: Cengage Publications, New Delhi.

Corporate Social Responsibility (RCP23XOE265)	

Course Objectives

- To make students understand the concept, theories and application of CSR for the Development of the Society.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain and critique the concept of CSR and its evolution, understanding its relevance and impact on stakeholders in both business and societal contexts.	L2	Understand
CO2	Apply ethical theories and frameworks to real-world CSR issues, demonstrating an understanding of ethical decision-making processes in business scenarios.	L3	Apply
CO3	Interpret CSR-related legislation and compliance requirements in India, particularly the Companies Act 2013, and assess how these laws shape corporate behaviour and responsibilities.	L2	Understand
CO4	Apply the key drivers of CSR in India, understanding market pressures, civil society influence, and regulatory frameworks, while assessing case studies of successful CSR initiatives.	L3	Apply
CO5	Use CSR strategies and community engagement programs that align with sustainable development goals, emphasising corporate volunteering, stakeholder engagement, and public-private partnerships.	L3	Apply

Corporate Social Responsibility (RCP23XOE265)

COURSE CONTENTS

Unit-I Introduction to Corporate Social Responsibility (CSR) 8 Hrs.

Understanding the concept of CSR, Historical evolution and development of CSR, Importance and benefits of CSR for businesses and society, Stakeholder theory and its relevance to CSR.

Unit-II Ethical Foundations of CSR 8 Hrs.

Ethical theories relevant to CSR (Utilitarianism, Deontology, Virtue Ethics), Ethical decision-making frameworks in business, Corporate governance and ethics, Ethical issues in supply chain management .

Unit-III CSR-Legislation in India and the World 9 Hrs.

Section 135 of Companies Act 2013, Scope for CSR Activities under Schedule VII, Appointment of Independent Directors on the Board, and Computation of Net Profits Implementing Process in India

Unit-IV The Drivers of CSR in India 9 Hrs.

Market based pressure and incentives, civil society pressure, the regulatory environment in India Counter trends, Review of current trends and opportunities in CSR, Review of successful corporate initiatives and challenges of CSR. Case Studies of Major CSR Initiatives Corporate Social Responsibility and Public-Private Partnership (PPP)

Unit-V Social Responsibility and Community Engagement 8 Hrs.

Social issues and challenges in contemporary society, Corporate philanthropy and community development initiatives, Stakeholder engagement strategies, Corporate volunteering and employee engagement programs, CSR as a strategic business tool vital for sustainable development

Text Books

1. Andrew Crane, Dirk Matten," Corporate Social Responsibility: Definition, Core Issues, and Recent Developments" Oxford University Press.
2. O. C. Ferrell, John Fraedrich, Linda Ferrell," Business Ethics: Ethical Decision Making Cases", Cengage Learning. Corporate Social Responsibility in India, Sanjay K Agarwal, Sage Publications, 2008.

Bioinformatics (RCP23XOE266)	

Course Objectives

- To provide an overview of bioinformatics and its significance in modern biological research.
- To enable students to apply bioinformatics methods in practical scenarios for biological data analysis and interpretation.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Describe the structure and function of cells, organelles, and biomolecules	L2	Understand
CO2	Explain the types of data stored in bioinformatics databases and their relevance to biological research.	L2	Understand
CO3	Discuss genomic databases and understand the structure and content of protein databases.	L2	Understand
CO4	Explain system biology concepts and molecular evolution.	L2	Understand
CO5	Apply knowledge of cellular and molecular biology concepts to analyze a biological problem.	L3	Apply

Bioinformatics (RCP23XOE266)

COURSE CONTENTS

Unit-I Foundations of Molecular and Cellular Biology 8 Hrs.

Introduction to molecular biology: DNA, RNA, proteins, and their roles in cellular processes
Cell structure and function: Organelles, membrane structure, and cellular transport
Cell cycle regulation: phases of the cell cycle, checkpoints, and cell cycle control mechanisms .

Unit-II Genetics and Genomics 8 Hrs.

Mendelian genetics: Inheritance patterns, Punnett squares, and genetic crosses
Chromosome structure and organization: karyotyping, gene mapping, and genetic linkage
Introduction to genomics: genome structure, organization, and variation
Techniques in molecular genetics: PCR, DNA sequencing, and gene cloning.

Unit-III Genomic and Protein Databases 9 Hrs.

Types of genomic databases such as GenBank, Ensemble, and UCSC Genome Browser,
Understand the structure and content of protein databases such as UniProt and Protein Data Bank (PDB),
Searching, Retrieving, and Analysing Genomic and Protein data from online databases.

Unit-IV Systems Biology 9 Hrs.

Introduction to Systems Biology: Modelling biological systems and network analysis,
Bioinformatics tools for systems biology and modelling complex biological processes.
Principles of molecular evolution: Mutation, Selection, and genetic drift. Phylogenetic analysis:
Tree construction, sequence alignment, and molecular clock.

Unit-V Applications and Case Studies 8 Hrs.

Applications of Bioinformatics in Medicine, Agriculture, and Biotechnology, Case Studies (Integrating Cellular and Molecular Biology with Bioinformatics) and Research Examples, Ethical and Legal Issues in Bioinformatics, Future Trends and Emerging Technologies in Bioinformatics.

Text Books:

1. Bioinformatics for Dummies, Jean-Michel Claverie and Cedric Notredame, For Dummies. (2019)
2. Bioinformatics Algorithms: An Active Learning Approach by Phillip Compeau and Pavel Pevzner, Active Learning Publishers (2019).

Reference Books

Human Resource Management (RCP23XOE267)	

Course Objectives

- To introduce the students with basic concepts, techniques and practices of the human resource management.
- To provide opportunity of learning Human resource management (HRM) processes, related with the functions, and challenges in the emerging perspective of today's organizations.
- To familiarize the students about the importance of the labour relations in the organization.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain the changing environment of the HRM and the role of the HR managers.	L2	Understand
CO2	Explain and analyze the recruitment process and the application of the IT.	L4	Analyze
CO3	Examine the importance of the training and development	L2	Understand
CO4	Explain and determine the pay plans, performance appraisal and compensation.	L2	Understand
CO5	Explain the importance of the labour relation, the employee security and collective bargaining.	L2	Understand

Text Books

1. Pattanayak, Biswajeet, Human Resource Management, 6th Edition, PHI Learning Pvt. Ltd., 1 Jul 2020.
2. Gary Dessler, Human Resource Management, 16th Edition, Pearson Publications, 2020.

Digital Marketing Management (RCP23XOE268)	

Course Objectives

- Explain the evolution and technology of digital marketing, including underlying frameworks.
- Understand digital business strategy and emerging business structures.
- Cover digital marketing planning, operations setup, and implementation of search campaigns, alongside emerging concepts like Big Data, IoT, SMB, B2B marketing, and SoLoMo.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Describe the digital marketing framework, models, and consumer behaviour.	L2	Understand
CO2	Apply digital marketing strategies to promote a given product/service.	L3	Apply
CO3	Illustrate the terminology and concepts for developing web-specific media plans.	L3	Apply
CO4	Interpret concepts related to digital campaign management and revenue generation models.	L2	Understand
CO5	Apply global digital marketing technologies/tools to assess future trends.	L3	Apply

Digital Marketing Management (RCP23XOE268)

COURSE CONTENTS

Unit-I	Introduction to Digital Marketing	8 Hrs.
---------------	--	---------------

Emergence of Digital Marketing as a tool, media consumption drivers for new marketing environment, applications and benefits of digital marketing. Digital Marketing Framework Delivering enhanced customer value, market opportunity analysis and digital services development, ASCOR framework Digital Marketing Models Creation Factors impacting digital marketplace, value chain digitization, business models. The Consumer for Digital Marketing, Consumer behaviour on the internet, evolution of consumer behaviour models, managing consumer demand, integrated marketing communications (IMC)

Unit-II	Digital marketing Strategy Development	12 Hrs.
----------------	---	----------------

Elements of assessment phase, macro-micro environmental analysis, marketing situation analysis. Digital Marketing Internal Assessment and Objectives Planning Analyzing present offerings mix, marketing mix, core competencies analysis and internal resource mapping. Digital presence analysis, digital marketing objectives development and review. Digital Marketing Strategy Definition Understanding digital business strategy and structures, consumer development strategy, offering mix for Digital, digital pricing models, managing promotional channels and developing the extended Ps- People, process, programs and performance. Digital marketing Strategy Roadmap Developing digital marketing strategy roadmap, the 6s digital marketing implementation strategy, marketing across the product life cycle.

Unit-III	Digital Marketing Planning and Setup	8 Hrs.
-----------------	---	---------------

Understanding digital media planning terminology and stages, steps to creating marketing communications strategy, introduction to search marketing, display marketing, social media marketing. Digital Marketing Operations Setup Basics of lead generation and conversion marketing, website content development and management, elements of user experience, web usability and evaluation.

Unit-IV	Digital marketing Execution	8 Hrs.
----------------	------------------------------------	---------------

Basic elements of digital campaign management, search execution, display execution, social media execution, content marketing. Digital marketing Execution Elements Digital revenue generation models, managing service delivery and payments, managing digital implementation challenges like e commerce, internal external and consumer specific challenges.

Unit-V**Digital Business Present and Future****6 Hrs.**

Digital Marketing Global Landscape, digital marketing overview global spend, advertising spend, and technology/tools landscape. Data technologies (Big data and IOT) impacting marketing, segment based digital marketing and SoLoMo the next level of hyperlocal marketing.

Text Books

1. Fundamentals of Digital Marketing by Puneet Singh Bhatia, Pearson Education Limited,2017
2. Digital Marketing by Seema Gupta- McGraw Hill Education, 2022

Reference Books

1. Digital Marketing Excellence: Planning, Optimizing and Integrating Online Marketing by Dave Chaffey and P. R. Smith, 5th Edition, Taylor Francis, 2017.
2. Digital Marketing: Strategy, Implementation and Practice- 6th Edition by Dave Chaffey Fiona Ellis-Chadwick, Pearson Education Limited,2019
3. Digital marketing by Vandana Ahuja, Oxford University Press, 2015.
4. The Art of Digital Marketing by Ian Dodson, John Wiley Sons, 2016.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech

Logistics & Supply Chain Management (RCP23XOE269)	

Course Pre-requisite:

- Latest trend of information technology in retail industry and logistic applications.

Course Objectives

- To develop advanced strategic thinking skills in supply chain management and logistics to effectively analyse and optimize supply networks.
- To attain proficiency in leveraging cutting-edge tools and technologies to enhance supply chain efficiency and supply chain transformation.
- Design and implement collaborative supply chain and sourcing strategies to promote information sharing and optimise coordination.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain the important role of supply chain management in today's business environment.	L2	Understand
CO2	Develop criteria and standards to achieve improved business performance by integrating and optimizing the total logistics and supply-chain process.	L6	Create
CO3	Summarize the value of information-based business logistics systems in improving accuracy and supporting decision-making at all levels of management.	L2	Understand
CO4	Describe current trends in supply chain information technology management.	L2	Understand
CO5	Use available technologies to enhance work performance and support supply chain functions, processes, transactions, and communications.	L3	Apply

Logistics & Supply Chain Management (RCP23XOE269)

COURSE CONTENTS

Unit-I **Introduction** **6 Hrs.**

What Is Supply Chain Management? The Development Chain, Global Optimization, Managing Uncertainty and Risk, The Complexity in Supply Chain Management, Key Issues in Supply Chain Management

Unit-II **Network planning** **8 Hrs.**

Introduction, Network Design- Data Collection, Data Aggregation, Transportation Rates, Mileage Estimation, Warehouse Costs, Warehouse Capacities, Potential Warehouse Locations, Service Level Requirements, Future Demand, Model and Data Validation, Solution Techniques, Key Features of a Network Configuration Supply Chain Planning; Inventory Positioning and Logistics Coordination -Strategic Safety Stock.

Unit-III **The Value of Information** **8 Hrs.**

Introduction, The Bullwhip Effect-Quantifying the Bullwhip Effect, The Impact of Centralized Information on the Bullwhip Effect, Methods for Coping with the Bullwhip Effect, Information Sharing and Incentives, Effective Forecasts, Information for the Coordination of Systems, Locating Desired Products, Lead-Time Reduction, Information and Supply Chain Trade-offs-Conflicting Objectives in the Supply Chain, Designing the Supply Chain for Conflicting Goals ,Decreasing Marginal Value of Information.

Unit-IV **Supply chain integration** **8 Hrs.**

Introduction, Push, Pull, and Push-Pull Systems-Push-Based Supply Chain, Pull-Based Supply Chain, Push-Pull Supply Chain Identifying the Appropriate Supply Chain Strategy, Implementing a Push-Pull Strategy The Impact of Lead Time Demand-Driven Strategies The Impact of the Internet on Supply Chain Strategies-what is E-Business, the Grocery Industry , the Book Industry, the Retail Industry and Impact on Transportation and Fulfillment.

Unit-V **Information Technology and Business Process** **6 Hrs.**

Introduction, The Importance of Business Processes, Goals of Supply Chain IT Supply Chain Management System Components, Decision-Support Systems IT for Supply Chain Excellence, Sales and Operations Planning Integrating Supply Chain Information Technology. Implementation of ERP and Decision Support System.

Unit-VI **Technology standards** **6 Hrs.**

Introduction, IT Standards, Information Technology Infrastructure Interface Devices, System Architecture and Electronic Commerce. Service-Oriented Architecture (SOA)-Technology Base: IBM and Microsoft and ERP Vendor Platform: SAP and Oracle. Radio Frequency Identification (RFID)- applications, point of sale data , business benefits and supply chain

Text Books

1. Supply Chain Management-Strategy, Planning, and Operation by Sunil Chopra, Peter Meindl,
2. Pearson Publications 2016
3. Designing and Managing the Supply Chain-Concepts, Strategies, and Case Studies by David Simchi-Levi, Philip Kaminsky, Edith Simchi-Levi, McGraw-Hill/Irwin 2008.

Reference Books

1. Ian Sadler, Logistics and Supply Chain Integration, SAGE Publications, 2007
2. Donald Waters, Supply Chain Management - An Introduction to Logistics, Bloomsbury Publishing, 2019.
3. Dimitris Folinis, E-Logistics and E-Supply Chain Management-Applications for Evolving Business, IGI Global publications, 2013.
4. Martin Christopher, Logistics Supply Chain Management, Pearson Education publications, 2016.

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-IV
Semester Project -II (RCP23XSC251P)	

Course Objectives:

- Students are expected to design, simulate/implement a project based on the knowledge acquired from current semester subjects.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Analyze a survey of several available literatures in the preferred field of study.	L4	Analyze
CO2	Describe various/alternate approaches to complete a project.	L2	Understand
CO3	Apply a collaborative project environment by interacting and dividing project work among team members.	L3	Apply
CO4	Use technical communication skills to present project work in the form of a technical report/paper.	L3	Apply
CO5	Apply teamwork and project management skills to plan, execute, and manage the research study.	L3	Apply

Semester Project:

The purpose of introducing semester project at second year level is to provide exposure to students with a variety of projects based on the knowledge acquired from the semester subjects. This activity is supposed to enrich their academic experience and bring enough maturity in student while selecting the project. Students should take this as an opportunity to develop skills in implementation, presentation and discussion of technical ideas/topics. Therefore, proper attention shall be paid to the content of semester project report which is being submitted in partial fulfilment of the requirements of the Second Year and it is imperative that a standard format be prescribed for the report.

Each student shall work on project approved by departmental committee approved by the Head of Department, a group of 03 to 05 students (max allowed: 5 students in extraordinary cases, subject to the approval of the department committee and the Head of the department) shall be allotted for each Semester Project. Each group shall submit at least 3 topics for the Semester Project. The departmental committee shall finalize one topic for every group. Semester Project Title or Theme should be based on knowledge acquired during semester.

The project work shall involve sufficient work so that students get acquainted with different aspects of knowledge acquired from semester subjects.

Student is expected to:

- Select appropriate project title based on acquired knowledge from current semester subjects.
- Maintain Log Book of weekly work done (please see attached log book format Table 1).
- Report weekly to the project guide along with log book.

Table 1: Log Book Format

Sr. No	Week (Start Date: End Date)	Work Done	Sign of Guide	Sign of Coordinator
1				
2				

Assessment Criteria:

- At the end of the semester, after confirmation by the project guide, each project group will submit project completion report in prescribed format for assessment to the departmental committee (including project guide).
- Assessment of the project (at the end of the semester) will be done by the departmental committee (including project guide).

Prescribed project report guidelines:

Size of report shall be of minimum 25 pages. Project Report should include appropriate content for:

- Introduction
- Literature Survey
- Related Theory
- Implementation details
- Project Outcomes
- Conclusion
- References

Assessment criteria for the departmental committee (including project guide) for Continuous Assessment:

Guide will monitor weekly progress and marks allocation will be as per Table 2.

Table 2: Continuous Assessment Sheet

Sr No	Exam Seat No	Name of Student	Student Attendance	Log Book Maintain	Literature Review	Depth of Understanding	Report	Total
			5	5	5	5	5	25

Assessment criteria for the departmental committee (including project guide) for End Semester Exam:

Departmental committee (including project guide) will evaluate project as per Table 3.

Each group shall present/publish a paper based on the semester project in reputed/peer reviewed Conference/Journal/Techfest/Magazine/ before the end of the semester.

Table 3: Evaluation Sheet

Sr No	Exam Seat No	Name of Student	Project Selection	Design/ Simulation/ Logic	PCB/ hardware/ programming	Result Verification	Presentation	Total
			5	5	5	5	5	25

Program: Electronics and Telecommunication Engineering	S.Y.B. Tech
	Sem-IV
Design Thinking Laboratory (RCP23XHS283L)	

Pre-requisite

- Understanding of product/ process/ software/ service development life cycle.
- Knowledge of agile frameworks (or any similar iterative framework) would be added advantage but will not be mandatory.

Course Objectives:

- To instill an innovative mindset in students to solve the digital-age business, societal and wicked type of problems using design thinking methods and tools, and its application.
- To equip students with techniques to empathize with user, ideate innovative and sustainable solutions for real world problems through iterative approach to design.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Explain the importance of a Human-Centric design approach for developing a solution.	L2	Understand
CO2	Apply innovative ideas to design sustainable solutions for real-world problems.	L3	Apply
CO3	Utilize design thinking principles to solve real-world problems.	L3	Apply

Design Thinking Laboratory (RCP23XHS283L)

COURSE CONTENTS

Unit-I Introduction to Design Thinking 6 Hrs.

Understanding the fundamentals of design thinking, Exploring the history and evolution of design thinking, the importance of empathy in the design thinking process. Conduct market industry research by observing and contextualizing various macro & micro trends. Case Study - conduct their own research on how Design Thinking helped solve some of the biggest and critical problems of our time.

Unit-II Empathize Phase 4 Hrs.

Techniques for conducting user research and gathering insights, creating user personas and empathy maps, Practicing active listening and observation skills. To apply various empathizing techniques on the problem statement selected. Use walk-a-mile immersion and heuristic reviews to first empathize with end users and then to build empathy map and customer journey map.

Unit-III Define Phase 4 Hrs.

Defining problem statements and reframing challenges, Tools for synthesizing research findings, Developing a clear and actionable problem statement. Start building from Persona map and conduct interviews/ Gemba walk to plot user's journeys from start to end. Define the problem space using HMW statement. Now highlight areas of opportunities in the journey map and enlist potential channels/touchpoints as well as stakeholders for proposed solution interventions.

Unit-IV Ideate Phase 4 Hrs.

Generating creative ideas through brainstorming sessions, Techniques for divergent and convergent thinking, Prototyping and experimenting with ideas. Apply suitable ideation technique to quickly generate diverse ideas that could be applied to target problem space, either partially or in full. Brain Writing Build on each other's ideas and constructively & creatively develop better ideas using SCAMPER technique.

Unit-V Prototype and Validation 6 Hrs.

Introduction to prototyping tools and techniques. - Rapid prototyping methods, Testing prototypes with users and gathering feedback, refining solutions based on user insights. Develop user storyboard to layout solution proposition in visual and easily explainable form. Run a quick peer validation. peer-validated the storyboard. Build an interactive digital prototype using any digital rapid prototyping platform and seek user validation.

Unit-VI**Design Thinking for Strategic Innovation****4 Hrs.**

Types of innovations, strategic innovation. Features of strategic innovation. Design thinking and strategic innovation. Practices of integrating design thinking in strategic innovation.

List of assignments/ activities during laboratory:

- Below is a list of assignments/ activities/ experiments that would be carried out by students as a mini project in groups consisting of 3-4 students.
- Problem statement for these assignments/ activities/ experiments will be provided by facilitator/ instructor/ faculty to the class (and teams/ batches within each class).
- This list of experiments will help students learn various design thinking methods and practice the corresponding tools available.

List of assignments/ activities during laboratory:

- To conduct market and industry research and analyze case studies demonstrating the application of design thinking. (Increased understanding of how design thinking has been applied to solve critical problems in various contexts.)
- To exercise empathizing techniques to understand the needs and pain points of a target audience.
- Developing empathy maps and customer journey maps based on collected insights.
- To exercise different tools and techniques (such as affinity diagrams, journey mapping, and user story mapping) for synthesizing research findings.
- Develop user personas to represent different user archetypes and their needs concerning the problem at hand.
- To practice the SCAMPER technique, Brainstorming, and brain-writing as a collaborative ideation technique to create multiple creative ideas/ solutions for the problem at hand.
- Create a mind map to generate a wide range of solutions to a problem at hand.
- To explore different prototyping tools and platforms, such as Adobe XD, Figma, Sketch, and in Vision.
- To Conduct rapid prototyping sessions to build low-fidelity / High fidelity prototypes based on the ideas generated in the Ideation phase and iterate based on feedback received.
- Develop a plan for implementing the final solution, considering factors like scalability and feasibility.
- Conduct usability testing to gather feedback on prototypes. Use A/B testing to compare different versions of a solution and determine which performs better.

Universal Human Values (RCP23XHS284)	

Course Objectives:

- To help students distinguish between values and skills, and understand the need, basic guide- lines, content and process of value education.
- To help students initiate a process of dialog within themselves to know what they really want to be in their life and profession.
- To help students understand the meaning of happiness and prosperity for a human being.
- To facilitate the students to understand harmony at all the levels of human living and live accordingly.
- To facilitate the students in applying the understanding of harmony in existence in their profession and lead an ethical life.
