Shirpur Education Society's

R. C. Patel Institute of Technology, Shirpur

An Autonomous Institute

Affiliated to DBATU, Lonere (M.S.),

Approved by AICTE, New Delhi and Govt. of Maharashtra

(DTE: EN - 5172)

Accredited by NAAC 'A' Grade, Bangalore.

Course Curriculum Structure

First Year B.Tech (All Branches)

First Year B. Tech

Batch: 2023-2024

(With Effect from A.Y. 2023-24)

Shahada Road, Near Nimzari Naka, Shirpur, Maharashtra 425405

Program: Common to All Branches	F.Y.B. Tech
	Sem-I
Mathematics - I (RCP23FCBS101)	
Mathematics - I Tutorial (RCP23FTBS101)	

Pre-requisite: Knowledge of

- Inverse of a matrix, addition, multiplication and transpose of a matrix.
- Algebra of Complex Numbers, Cartesian, polar and exponential form of complex number.

Course Objectives:

- To develop the basic Mathematical skills of engineering students that are imperative for effective understanding of engineering subjects. The topics introduced will serve as basic tools for specialized studies in many fields of engineering and technology.
- To provide hands on experience using C programming to handle real life problems.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Apply principles of basic operations of matrices to find rank and echelon form of matrices to solve system of simultaneous equations.	L3	Apply
CO2	Utilize the principles of complex numbers to evaluate problems involving hyperbolic and logarithmic functions.	L3	Apply
CO3	Demonstrate the expansion of functions using Taylor's and Maclaurin's series for various mathematical applications.	L2	Understand
CO4	Apply the concepts of partial differentiation to determine the maxima and minima of functions involving multiple variables.	L3	Apply
CO5	Apply C programming to compute numerical solutions for linear and simultaneous equations in engineering contexts.	L3	Apply

R. C. Patel Institute of Technology
SFS

Mathematics – I (RCP23FCBS101)

COURSE CONTENTS

Unit-I **Matrices** **8 Hrs.**

Prerequisite: Inverse of a matrix, addition, multiplication and transpose of a matrix

1.1 Types of Matrices: Symmetric, Skew-Symmetric, Hermitian, Skew-Hermitian, Unitary, Orthogonal Matrices. Rank of a matrix using Echelon form

1.2 System of homogeneous and non – homogeneous equations, their consistency and solutions. Linear dependent and independent vectors.

Unit-II **Complex Numbers, Hyperbolic function and Logarithm of Complex Numbers** **12 Hrs.**

Prerequisite: Definition, algebra, polar and exponential form of complex numbers

2.1. Review statement of D'Moivre's Theorem.

2.2. Application of D'Moivre's Theorem: Find expansion of $sin^n\theta$,$cos^n\theta$ in terms of sines and cosines of multiples of θ, expansion of sin nθ, cos nθ in powers of sin θ, cos θ and to find sum of the trigonometric series.

2.3. Roots of complex number.

2.4. Circular functions of complex number and Hyperbolic functions. Inverse Circular and Inverse Hyperbolic functions. Separation of real and imaginary parts of all types of functions.

2.5. Logarithmic functions, Separation of real and Imaginary parts of Logarithmic functions.

Unit-III **Expansion of Function** **4 Hrs.**

Prerequisite: Derivative

3.1. Taylor's Theorem (Statement only), Taylor's series and Maclaurin's series (Statement only). Expansion of standard functions.

Unit-IV **Partial Differentiation** **10 Hrs.**

Prerequisite: Derivative

4.1. Partial Differentiation: Function of several variables, Partial derivatives of first and higher order, Differentiation of composite function, Total differentials and Implicit functions.

R.C. Patel Institute of Technology
SES
Autonomous

4.2. Euler's Theorem on Homogeneous functions with two and three independent variables (with proof). Deductions from Euler's theorem.

Unit-V **Applications of Partial Differentiation** **04 Hrs.**

Prerequisite: Maxima and Minima of single variable function, Partial derivatives

5.1. Maxima and Minima of a function of two independent variables.

5.2. Jacobian's of two and three independent variables.

Unit-VI **Numerical Solutions of Transcendental Equations, System of Linear and Non-Linear Equations, Curve fitting** **4 Hrs.**

Prerequisite: Solution of system of equations

6.1. Solution of Algebraic and Transcendental Equations by: Newton Raphson Method.

6.2. Solution of system of linear algebraic equations by Gauss Seidal Iteration Method.

6.3. Curve fitting: Fitting a straight line, Quadratic curve.

Mathematics - I Tutorial (RCP23FTBS101)

Suggested Tutorials (including C programs)

- Matrices.
- Matrices C program.
- Complex Numbers.
- Hyperbolic and Logarithm of complex no.
- Expansion of Function.
- Partial Differentiation.
- Application of Partial Differentiation.
- Solution of Transcendental Equations by Newton Raphson Method.
- Solution of system of linear algebraic equations by Gauss Seidal Iteration Method.
- Curve Fitting.

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Minimum eight tutorials batchwise (including C programs) from the above suggested list or any other experiment based on syllabus will be included, which would help the learner to apply the concept learnt.

Program: Common to All Branches	F.Y.B. Tech
	Sem-I
Structured Programming using C (RCP23FCES101)	
Structured Programming using C Laboratory (RCP23FLES101)	

Pre-requisite: None

Course Objectives:

- To familiarize with the logic of Computer Programming.
- To provide exposure in developing algorithm, flowchart and thereby writing efficient codes for user defined problem.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Implement the programs in C.	L3	Apply
CO2	Debug the C programs.	L3	Apply

Structured Programming using C (RCP23FCES101)

COURSE CONTENTS

Unit-I **Introduction to Computer, Algorithm and Flowchart** **4 Hrs.**

The Turing Machine architecture, the Von Neumann architecture, Number system. Introduction to operating system components.

System and application software.

Basic constructs of Algorithm and flowchart: Sequence, Decision (Selection) and Repetition.

Compilation process: Syntax and semantic errors, ASCII.

Unit-II **Fundamentals of C-Programming** **4 Hrs.**

Character Set, Identifiers and keywords, Data types, Constants, Variables.

Operators-Arithmetic, Relational and logical, Assignment, Unary, Conditional, Bitwise, Comma, and other operators. Expression, statements, Library Functions, Preprocessor.

Data Input and Output: getchar (), putchar (), scanf (), printf (), gets (), puts (), Structure of C program.

Unit-III **Control Structures** **5 Hrs.**

Decision making with Branching: If statement, If-else Statement, Switch case statement.

Looping: while, do-while, for.

Nested control structure.

Continue statement, Break statement, goto statement.

Unit-IV **Functions and Parameter** **4 Hrs.**

Function -Introduction of Function, defining a Function, accessing a Function, Function Prototype, Passing Arguments to a Function, Designing Recursive function.

Storage Classes –Auto, Extern, Static, Register.

Unit-V **Arrays, String, Structure** **7 Hrs.**

Array-Concepts, Declaration, Definition, accessing array element, One- dimensional and Multidimen-sional array, Passing Arrays to Function.

String- Basics of String, Functions in string.h, user defined function for String handling.

Structure- Declaration, Initialization, structure within structure, Operation on structures, Array of Structure, Structure padding.

Unit-VI **Pointers** **4 Hrs.**

Introduction, Definition and uses of Pointers, Address Operator, Pointer Variables, Double pointer. Pointer Arithmetic.

Call by value, call by Reference.

Pointer to Array and Pointer to Structure.

Structured Programming using C Laboratory (RCP23FLES101)

List of Practical/Experiments/Assignments:

1. Write a program to swap two variables values with and without using third variables. Write algorithm and draw flowchart for the same.
2. Write a program to check odd or even number: (a) using modulus operator (b) using conditional operator.
3. Design and develop a C program to read a year as an input and find whether it is leap year or not. Also consider the end of the centuries. Write algorithm and draw flowchart for the same.
4. Write a C program to find the sum of individual digits of a 3-digit number.
5. Design and develop a flowchart or an algorithm that takes three coefficients (a, b, and c) of a Quadratic equation (ax2 + bx + c=0) as input and compute all possible roots. Implement a C program for the developed flowchart/algorithm and execute the same to output the possible roots for a given set of coefficients with appropriate messages.
6. Write a program to count the number of digits in a given integer.
7. Write a menu driven program to perform simple arithmetic operations based on the user's choice. The user will indicate the operation to be performed using the signs e.g. + for addition, etc. Write an algorithm and draw flowchart for same.
8. Write a program to read a number of more than one digit, reverse the number and display the sum of digits of numbers. Write algorithm and draw flowchart for the same.
9. Write programs to display each of the following patterns. Write algorithm and draw flowchart for the same.

A)
```
1
2 1
3 2 1
```

B)
```
A
A B A
A B C B A
```

R. C. Patel Institute of Technology, Shirpur SES Autonomous

4 3 2 1 A B C D C B A

5 4 3 2 1 A B C D E D C B A

10. Write a C program to find maximum and minimum between two numbers using functions. Write algorithm and draw flowchart for the same.
11. Write C program to find GCD of two integers by using recursive function. Write algorithm and draw flowchart for the same.
12. Write a C program to find both the largest and smallest number in a list of integers. Write algorithm and draw flowchart for the same. Write algorithm and draw flowchart for the same.
13. Develop, implement and execute a C program that reads two matrices A (m x n) and B (p x q) and Compute product of matrices A and B. Read matrix A and matrix B in row major order and in column major order respectively. Print both the input matrices and resultant matrix with suitable headings and output should be in matrix format only.
14. Write a Program for deletion of an element from the specified location from Array.
15. Write a C program using user defined functions to determine whether the given string is palindrome or not.
16. Write C program to count the number of lines, words and characters in a given text.
17. Write a program to swap two numbers using a function. Pass the values to be swapped to this function using the call-by-value method and call-by-reference method. Write algorithm and draw flowchart for the same.
18. Write a C program to find the length of the string using Pointer.
19. Write a program to copy one array to another using pointer.
20. Write a program to compare two strings using pointers.

Program: Common to All Branches	F.Y.B. Tech
	Sem-I & II
Physics (RCP23FCBS102)	
Physics Laboratory & Tutorial (RCP23FLBS102)	

Pre-requisite:

- Foundations of physics and mathematics till HSc or equivalent is necessary to comprehend engineering physics curriculum effectively.

Course Objectives:

- Identify and understand the fundamental physical principles underlying engineering technologies a prerequisite to become successful engineer.
- To provide inclusive knowledge of fundamental physical principles encouraging engineering students to venture in research field.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Relate the scope and foundation of quantum mechanics, quantum computing and its role in development of modern technology.	L2	Understand
CO2	Apply the foundations of Optics and Photonics in precision measurements indispensable for the development of modern communication technology.	L3	Apply
CO3	Assimilate the concepts of Electrodynamics, which are prerequisite in modern developments for signal communications, Antenna Theory etc.	L2	Understand
CO4	Explore basic sensing techniques for physical measurements in modern instrumentation.	L4	Analyze

R. C. Patel Institute of Technology, Shirpur
SES

Physics (RCP23FCBS102)

COURSE CONTENTS

Unit-I **Quantum Physics and Computing** **06 Hrs.**

Prerequisite: Origin of Quantum mechanics and its comparison with classical mechanics, Dual nature of radiation, Photoelectric effect, Davisson-Germer experiment, single slit experiment Introduction (Matter waves, De Broglie hypothesis, Wave Packet). Concept of Phase velocity and group velocity and relation with particle velocity. Heisenberg Uncertainty Principle. Wave function; Physical interpretation of wave function. Schrodinger's time dependent wave equation; time independent wave equation; Particle trapped in one dimensional infinite potential well.

Fundamentals of Quantum Computing (Difference between classical computing & quantum computing, Qubits, Quantum Superposition theorem, Quantum Entanglement theorem, Quantum cryptography)

Unit-II **Optics for Engineers** **08 Hrs.**

Prerequisite: Wave front and Huygens's principle, reflection, refraction, interference, Young's double slit experiment, diffraction

Thin Film Interference: Introduction (division of amplitude), Stoke's relation, Interference in thin film of constant thickness in reflected light, Formation of colors in thin film (point source & extended source); Interference in Wedge shaped film; Formation of Newton's rings; Applications (Antireflection & High reflecting films).

Diffraction: Introduction (distinguish between interference & diffraction), Fresnel & Fraunhofer diffraction, Fraunhofer diffraction at single slit & double slit (qualitative), Diffraction Grating, Absent spectra, Resolving power & Dispersive power of a grating (qualitative), Applications.

Unit-III **Photonics and Fibre Optics** **06 Hrs.**

Prerequisite: Absorption, recombination, energy bands of p-n junction, refractive index of a material, Snell's law, Total internal reflection)

Laser: Spontaneous emission and Stimulated emission; Einstein's coefficients, Metastable state, Resonant cavity, Population inversion, three & four level lasers, types of pumping, Helium Neon laser; Nd:YAG laser, Applications.

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Fiber optics: Structure of an optical fiber, Types: Single mode & Multimode, Step index & Graded index, Numerical Aperture for step index fiber, Modes of propagation, V number, Attenuation, Applications (Optical fibre Transmission).

Unit-IV **Electrodynamics** **04 Hrs.**

Prerequisite: Coulomb's law-force between two-point charges, electric field due to a point charge, electric field due to a dipole, Cartesian cylindrical & Spherical co-ordinate system, Gauss's law for electrostatics & magneto statics Faraday's Law, Ampere's circuital law)
Scalar and Vector fields, Physical significance of gradient, curl and divergence in Cartesian co-ordinate system. Divergence theorem, Stokes theorem. Maxwell's equations (Free space and time varying fields) & Applications.

Unit-V **Physics of Sensors** **04 Hrs.**

Prerequisite: Transducer concept, meaning of calibration, piezoelectric effect, IR waves)
Ultrasonic sensors: Concept of inverse piezoelectricity, Applications Light sensors: (Photodiode, LDR). Hall sensor: (Principle of Hall effect, Applications), IR sensor: (Principle & Applications).

Physics Laboratory & Tutorial (RCP23FLBS102)

Students must perform minimum eight experiments from given list.

1. Determination of Planck's constant using LED.
2. Determination of wavelength using Diffraction grating and Hg source.
3. Determination of wavelength using Diffraction grating and Na source.
4. Determination of width of a slit using single slit diffraction experiment (laser source).
5. Determination of width of a double slit using (laser source).
6. Study of I-V characteristics of Photo diode.
7. Study of ultrasonic distance meter/interferometer.
8. Determination of radius of curvature of a lens using Newton's ring set up.
9. Determination of grating element & no. of lines/cm using Ruler.
10. Simulation experiments on sensors.

R. C. Patel Institute of Technology, Shirpur
SES
SHIRPUR EDUCATION SOCIETY
AUTONOMOUS

11. Determination of grating element or wavelength using Diffraction grating (Laser source).
12. Study of divergence of laser beam.
13. Determination of diameter of wire/hair or thickness of paper using Wedge shape film method.
14. Determination of grating element & no. of lines/cm using CD.
15. Determination of Numerical Aperture of an optical fiber.

Minimum 8 experiments as laboratory work from the above suggested list or any other experiment based on syllabus should be conducted batch wise to develop a rational temperament for scientific observations which lead to constructive inferences essential for technology studies.

Tutorials

A minimum of 8 tutorial sessions on topics covering the entire syllabus should be conducted batchwise for effective interactive sessions focusing on better understanding of the subject.

Program: Computer/DS/ETC/Electrical – Group -A Mech/AIDS/Civil/AIML - Group -B	F.Y.B. Tech Sem-I & II
Computational Engineering Mechanics **(RCP23FCES102)**	
Computational Engineering Mechanics Laboratory **(RCP23FLES102)**	

Pre-requisite:

- Basics of Trigonometry and Matrices.
- Newton's Laws of motion.

Course Objectives:

- To acquaint learners with the concept of equilibrium.
- To familiarize learners to analyze the motion of moving particles/bodies.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Illustrate the effect of force and moment to determine the resultant of force system.	L3	Apply
CO2	Apply the concept of equilibrium systems with the help of free body diagram.	L3	Apply
CO3	Correlate real life application to friction and estimate the Power transmitted by the belt.	L5	Evaluate
CO4	Apply the concept of geometric transformations to find the transformed position of an element/object.	L3	Apply
CO5	Analyze general plane motion of rigid bodies.	L4	Analyze

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Computational Engineering Mechanics (RCP23FCES102)

COURSE CONTENTS

Unit-I **Computation and analysis of System of Forces (Co-planar)** **06 Hrs.**

Concept of force, Principle of transmissibility, Composition and resolution of forces. Moment of force about a point, Varignon's Theorem. Various systems of forces. Couples. Force couple system, Resultant of coplanar force system.

Unit-II **Computation and analysis of Equilibrium Systems** **06 Hrs.**

Conditions of static equilibrium. Free body diagram. Various types of supports and support reactions. Equilibrium of Connected Bodies.

Types of Beams and various types of loads. Determination of reactions at supports for beams.

Unit-III **Computation and analysis of Frictional Forces** **04 Hrs.**

Concept of Static Friction and Dynamic/ Kinetic Friction, Laws of dry friction, Coefficient of Friction, Angle of Friction, Concept of Cone of friction. Angle of Repose.

(Numerical on Block, Wedge and Ladder friction excluded.)

Belt friction, Power transmitted by flat belt drives.

Unit-IV **Robot Kinematics (Part-I): Geometric Transformations** **06 Hrs.**

2D transformations: Translation, Scaling, Rotation; Matrix representation and Homogeneous Coordinates; Composite transformation; Other transformations: Reflection and Shear; Raster method for transformation.

Introduction to 3D Transformations: Translation, Rotation, Scaling and Reflection.

Unit-V **Robot Kinematics (Part-II)** **06 Hrs.**

General Plane motion of Rigid body. The concept of Instantaneous center of rotation (ICR) for the velocity. Velocity analysis of rigid body using ICR.

Introduction to Forward Kinematics and Inverse Kinematics. Applications of Mechanics in Robotics, Machine Learning and AI.

Computational Engineering Mechanics Laboratory

(RCP23FLES102)

Part I- List of Lab experiments

1. Verification of Polygon law of coplanar forces.
2. Verification of law of Moment using Bell crank lever.
3. Determination of Support reaction for beam.

4. Determination of coefficient of friction using Inclined plane.
5. Verification of Lami's theorem using Jib crane.
6. Resultant of non-concurrent non-parallel coplanar force system.
7. Determination of coefficient of restitution for Collision of elastic bodies (Law of conservation of momentum).

Part II- List of Programming Exercises

Introduction to programming software packages (Python/Matlab/Scilab or any other suitable software),

8. Programming exercises on determination of Resultant of Coplanar Force System. (Application of software packages for determination of Resultant.)
9. Programming exercises on determination of Support Reaction. (Application of software packages for analysis of bodies in equilibrium.)
10. Programming exercises on Friction. (Application of software packages for computation of friction forces.)
11. Plotting of Motion Curves. (Application of software packages for plotting of motion curves.)
12. Programming exercises on transformations of basic geometric 2D elements. (Programming for transformations of basic geometric 2D elements.)
13. Simulating Kinematics of Rigid Body. (Application of software packages for simulating Kinematics of Rigid Body.)

Laboratory work should contain total 8 experiments/exercises (Any five from 1 to 7 and any three from 8 to 13).

Basic Electrical Engineering & Digital Electronics (RCP23FCES103)	
Basic Electrical Engineering & Digital Electronics Laboratory & Tutorial (RCP23FLES103)	

Pre-requisite:

- Knowledge of basic physics.
- Knowledge of basic mathematics.

Course Objectives:

- To develop basic understanding of concepts of DC and AC circuits, and analyse their operations using various methods and techniques.
- To get an insight of various digital electronics.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Apply the knowledge of theorems/ laws to analyse the DC circuits	L3	Apply
CO2	Analyse single phase AC circuits.	L4	Analyse
CO3	Demonstrate knowledge of basic number system, logic gates and sequential circuits.	L3	Apply

R. C. Patel Institute of Technology, Shirpur
SES

Basic Electrical Engineering & Digital Electronics

(RCP23FCES103)

COURSE CONTENTS

Unit-I **DC Circuits** **5 Hrs.**

Introduction to ideal and practical voltage and current sources, Kirchhoff's current and voltage laws, Mesh and nodal analysis, Supernode and supermesh analysis.

Unit-II **DC Network Theorems** **6 Hrs.**

Sstar– Delta Transformation, Superposition Theorem, Thevenin's Theorem, Maximum Power Transfer Theorem.

Unit-III **AC Circuits** **10 Hrs.**

Generation and representation of alternating voltage and currents, RMS and Average value Phasor representation, AC through resistance, inductance and capacitance, R-L-C series, parallel circuits, Series resonance, Calculation of power and power factor.

Unit-IV **Logic Gates** **4 Hrs.**

Basic gates, Universal gates, Boolean algebra, De Morgan's theorem.

Unit-V **Latches and Flip flops** **3 Hrs.**

Introduction to latches and flip-flops: RS, JK, T, D flip-flops.

R. C. Patel Institute of Technology, Shirpur
SES

Basic Electrical Engineering & Digital Electronics Laboratory & Tutorial

(RCP23FLES103)

Suggested experiments:

1. Study of basic laboratory instruments. (Compulsory)
2. Mesh and Nodal analysis.
3. Verification of Superposition Theorem.
4. Verification of Thevenin / Norton / Maximum Power Transfer Theorem.
5. Study of R-L and R-C series circuits.
6. R-L-C series resonance circuit.
7. Verification of truth table for gates.
8. Implementation of given logic function using basic gates.
9. Implementation of basic gates using universal gates.

(NOTE: Minimum eight experiments from the above suggested list or any other experiment based on syllabus will be included, which would help the learner to apply the concept learnt.)

List of Tutorials:

1. Mesh analysis
2. Nodal analysis
3. Supermesh analysis
4. Supernode analysis
5. Star – Delta Transformation
6. Superposition Theorem
7. Thevenin's Theorem
8. Maximum Power Transfer Theorem
9. RMS and Average value
10. Phasor representation, Series R-L, Series R-C
11. Series R-L-C, Parallel R-L-C circuits
12. Logic Gates
13. Latches and Flip-flops

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

(Batch wise minimum 8 tutorial sessions are to be conducted on topics which would help the learner to identify/analyse the problem and to apply problem solving techniques learnt.)

SES

Program: Common to All Branches	F.Y.B. Tech
	Sem-I&II
Chemistry (RCP23FCBS103)	
Chemistry Laboratory and Tutorial (RCP23FLBS103)	

Pre-requisite:

- Properties of light and spectrum, wavelength and wave number
- Basic process of polymerization and its properties and types

Course Objectives:

- To obtain a strong hold on basic concepts of Chemistry that form fundamental principles of technology
- To give exposure to recent material development in the field of engineering

Students that successfully complete this course will be able to-

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Recognize new approaches of analysis, which are more convenient, less hazardous and sustainable to perform	L2	Understand
CO2	Describe applications based on nanomaterials and modern polymers in engineering techniques.	L2	Understand
CO3	Analyze the quality of fuel for energy efficiency.	L5	Evaluate
CO4	Recognize properties of materials and alloys with phase transformation.	L2	Understand
CO5	Identify the parameters responsible for water pollution using suitable methods of water treatment.	L1	Knowledge

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Chemistry (RCP23FCBS103)

COURSE CONTENTS

Unit-I **Sustainable approach to Chemistry** **8 Hrs.**

A) Spectroscopic Techniques and Applications

Introduction: Electromagnetic spectrum, its origin, properties and applications. Numericals based on the energy of the photon. Spectroscopy: Principle, classification and types

Relation between electromagnetic spectrum, spectroscopy types and energy changes.

Flame Photometry: Principle, Instrumentation, working, applications, interferences, advantages and disadvantages. Jablonski diagram, Introduction to fluorescence and phosphorescence, Applications of fluorescence.

(B) Green Chemistry

Introduction: Definition, significance. Twelve Principles of Green Chemistry. Conventional and green synthesis of :(i) Carbaryl (ii) Indigo (iii) Adipic acid (iv) Acrylamide Percentage atom economy (Numericals). Green solvent: Supercritical CO_2

Unit-II **Engineering Materials** **5 Hrs.**

A) **Nanomaterials**

Introduction to nanomaterial Fullerenes: Properties and applications

Carbon nanotubes: Types, Properties, Method of preparation (Laser, CVD), Applications

B) **Polymers**

Compounding of plastic, Fabrication of plastic by Compression, Injection, Transfer and Extrusion moulding. Effect of heat on polymers (glass transition temperature), Viscoelasticity Conducting Polymers and application

Unit-III **Fuels and Combustion** **5 Hrs.**

Introduction: Definition, classification, characteristics of a good fuel. Calorific value: Definition, Units, Gross or Higher calorific value and Net or lower calorific value, Dulong's formula and numerical for calculations of Gross and Net calorific values. Analysis of coal-Proximate and Ultimate Analysis (theory and numericals). Combustion: Calculations for requirement of oxygen and air (by weight and by volume) for given fuels. Power alcohol Green fuel: Biodiesel (Synthesis and advantages)

R. C. Patel Institute of Technology, Shirpur
SES

Unit-IV **Phase Rule and Applications** **5 Hrs.**

Phase Rule-Gibb¡fs Phase Rule, Terms involved with examples. One Component System (Water). General characteristics of two component systems. Reduced Phase Rule. Two Component System (Pb- Ag). Eutectic system: Applications and Numericals. Advantages and Limitations of Phase Rule.

Unit-V **Water Technology** **5 Hrs.**

Introduction- Impurities in water. Hardness of water- units, types and numericals. Determination of hardness of water by EDTA method and numericals. Softening of water by Ion Exchange process and numericals. BOD, COD- Definition, significance and numericals.

Chemistry Laboratory (RCP23FLBS103)

Suggested experiments:

1. To determine Chloride content of water by Mohr's Method.
2. To determine total, temporary and permanent hardness of water sample by EDTA method.
3. To determine the pH of different solutions using a pH meter.
4. Determination of percent of Zn/Cu in brass.
5. Molecular weight determination of polymers by Oswald Viscometer.
6. Synthesis of UF, PF, Nylon 66.
7. Determination of COD.
8. Determination of surface Tension of a given liquid at room temperature using Stalgmometer by drop number method.
9. Determination of percent of Fe in Plain carbon steel.
10. Determination of Moisture content of coal.
11. Determination of Ash content of coal.
12. Saponification value of oil.
13. Acid value of oil.
14. To estimate the emf of the Cu-Zn system by Potentiometry.
15. To determine "emax of a given solution by using UV Spectrophotometer.
16. To validate Beer-Lambert law using UV Spectrophotometer/ colorimeter.
17. To determine metal ion concentration using a colorimeter.

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

18. Determination of strength of a given solution (Acid/Base) by using conductometric titration.

19. Construction of concentration cell and determination of emf by potentiometry

Minimum eight experiments from the above suggested list or any other experiment based on syllabus will be included and the same will be conducted batchwise, which would help the learner to apply the concept learnt.

Minimum eight experiments from the above suggested list or any other experiment based on syllabus will be included, which would help the learner to apply the concept learnt.

Tutorials: Minimum eight tutorials based on syllabus will be conducted. Mini project relevant to the subject may be included, which would help the learner to apply the concept learnt.

Text Books

1. Engineering Chemistry- Jain and Jain (DhanpatRai)

Program: Common to All Branches	F.Y.B. Tech
	Sem-I&II
Engineering Graphics (RCP23FCES104*)	
Engineering Graphics Laboratory (RCP23FLES104)	

Pre-requisite:

- Basics of geometrical constructions

Course Objectives:

- Students should be able to visualize the objects.
- They should be able to understand and read drawings.
- To impart and inculcate proper understanding of the theory of projection.
- They should be able to present the same.

Students that successfully complete this course will be able to-

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Recognize the value of engineering graphics, as a language of engineers.	L3	Apply
CO2	Construct orthographic views of lines and basic shapes of solids.	L3	Apply
CO3	Interpret and sketch orthographic and sectional orthographic Views of various machine components.	L3	Apply
CO4	Visualize objects and draw isometric views.	L3	Apply
CO5	Build 2D sketches using Auto CAD.	L3	Apply

Engineering Graphics (RCP23FCES104*)

COURSE CONTENTS

Unit-I **Introduction to Engineering Drawing:** **02 Hrs.**

Types of Lines, Dimensioning Systems as per IS conventions, Types of Projections.

****Introduction to Auto CAD:**

Basic Drawing and Editing Commands. Knowledge of setting up layers. Dimensioning. Hatching, plotting and Printing

Unit-II **Orthographic projections:** **05 Hrs.**

Different views of simple machine parts as per the first angle projection method recommended by I.S.

Full Sectional views of Simple Machine parts.

****Drawing of Orthographic projections using Auto CAD**

Unit-III **Sectional Orthographic projections:** **05 Hrs.**

Concept of sectioning and drawing section lines,

Need for drawing sectional views

Section of simple geometrical solids-cases involving different types of cutting planes

****Drawing of Sectional orthographic projections using Auto CAD**

Unit-IV **Isometric Views :** **08 Hrs.**

Isometric Views/Drawings of blocks (plain and cylindrical. excluding spheres).

****Drawing of Isometric Views using Auto CAD.**

Unit-V **Projection of Solids:** **08 Hrs.**

(Prism- Pyramid, Cylinder & C;one only) Projections of Solids with the axis inclined to HP and VP. (Exclude Spheres, Composite, Hollow solids and frustum). Use change of position or Auxiliary plane method.

****Drawing of Projection of Solid using Auto CAD.**

**** Should be covered during Auto CAD Practical.**

Engineering Graphics Lab (RCP23FLES104)

Suggested Exercises:

1. Orthographic Projections model 1 Using Auto CAD
2. Orthographic Projections model 2 Using Auto CAD
3. Sectional Orthographic Projections model I Using Auto CAD.
4. Sectional Orthographic Projections model 2 Using Auto CAD.
5. Sectional Orthographic Projections model 3 Using Auto CAD.
6. Isometric Views model 1 Using Auto CAD
7. Isometric Views model 2 Using Auto CAD
8. Isometric Views model 3 Using Auto CAD.
9. Projection of solids (Prism and Pyramid only) model I Using Auto CAD.
10. Projection of solids (Prism and Pyramid only) model 2 Using Auto CAD.
11. Layout Planning using AutoCAD for PCB
12. Layout Planning using AutoCAD for Motherboard.

Minimum eight exercises from the above suggested list covering all the topics or any other exercise based on syllabus will be included, which would help the learner to apply the concept learnt.

Program: Common to All Branches	F.Y.B. Tech
	Sem-I&II
Effective Communication Skills (RCP23FCHS101)	
Effective Communication Skills Laboratory (RCP23FLHS101)	

Pre-requisite:

- 1. Basic proficiency in English Language

Course Objectives:

- To acquaint learners with the basics of communication with a focus on LSRW
- To develop the learner's proficiency in public speaking skills
- To enable learners to use the principles of business writing for effective communication
- To impart strategies for personal development

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Use skills related to the various aspects of communication to express ideas with greater clarity	L3	Apply
CO2	Apply appropriate verbal/non-verbal cues in social and workplace situations and overcome the barriers to communication	L3	Apply
CO3	Employ personal development strategies for self-assessment, goal setting and maintaining a professional persona online	L3	Apply

Effective Communication Skills (RCP23FCHS101)

COURSE CONTENTS

Unit-I **Fundamentals of Communication** **10 Hrs.**

Introduction to Theory of Communication: Definition, Objectives, The Process of Communication Methods of Communication Verbal Communication, Non-verbal Communication, Barriers to Communication Physical/Environmental, Mechanical, Linguistic Psychological, Socio-Cultural, Channels of Communication in an Organization, Formal (Upward, Downward and Horizontal), Informal (Grapevine)

Unit-II **Speaking Skills** **04 Hrs.**

Developing Verbal Aptitude: Meaning of Words in Context, Synonyms and Antonyms, Identifying Common Errors, Subject - Verb Agreement, One Word Substitution, Pairs of Confused Words Articles Prepositions. Public Speaking, Planning your speech, Delivery of speech (Vocalics and Body Language) Dealing with stage fear

Unit-III **Reading Skills** **03 Hrs.**

Mechanics of Reading, Undesirable Reading Habits, Types of Reading, Guidelines for Improving Reading Skills, Reading Comprehension, Summarization Techniques

Unit-IV **Listening Skills** **03 Hrs.**

Purpose of Listening, Process of Listening, Barriers to Listening, Techniques for Improving Listening Skills

Unit-V **Writing Skills** **05 Hrs.**

Professional Letter Writing: Seven Cs of Business Correspondence, Parts of a Formal Letter, Complete Block Format, Types of Letters (Request, Grievance and Sales), Email Communication; Popularity of Email, Problems in Email Communication, Techniques for Writing Effective Emails, Email etiquette

Unit-V **Personal Development Planning** **03 Hrs.**

Self- Assessment strategies (SWOT Analysis), Digital Footprints-Maintaining a Professional Persona, Goal Setting

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Effective Communication Skills Laboratory (RCP23FLHS101)

List of Laboratory Assignments/Practical's: (Any Five)

1. Self -Introduction
2. Group Discussion
3. Mock Press
4. Extempore
5. Expansion of an Idea
6. Technical Description of an Object

Any Five Practicals /assignments from above.

	Sem-I/II
Workshop Practice (RCP23FLVS101)	

Pre-requisite:

- Basic Sciences

Course Objectives:

- To explain the concepts of industrial safety and important of working safely.
- To identify tools, work material and measuring instruments useful for fitting, welding, carpentry, sheet metal, plumbing, PCB and house wiring practice.
- To understand various fabrication processes and machine protocols.
- To handle tools and instruments and use them to prepare joints/jobs of specific shape and size.
- To understand the basic concept and structure of computer hardware and networking
- To understand the basic work tools of house wiring and house wiring connection etc.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Apply the fundamentals of manufacturing to identify manufacturing process for given job drawing	L3	Apply
CO2	Select proper job material, tools, equipment and machines required for operations according to the job drawing with safety measures	L4	Analyze
CO3	Plan the sequence of operations required for manufacturing /fabrication of the job as per drawing	L3	Apply
CO4	Acquire hands-on experience and complete job as per job drawing within allotted time adhering to safety norms and set procedures	L5	Create
CO5	Inspect the job dimensions as per job drawing	L4	Analyze

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Workshop Practice (RCP23FLVS101)

COURSE CONTENTS

Group A (Main Group)

Unit-I **Fabrication Processes** **12 Hrs.**

Use of setting of fitting tools for chipping, cutting, filing, making, center punching, drilling, tapping and finishing. Edge preparation for welding jobs, Arc welding for different job like, Lap welding of two plates, butt welding of plates with simple cover, are welding to join plates at right angles.

Use and setting of hand tools likes handsaws, jack planes, chisels and gauges for construction of various joints, wood turning and modern wood turning methods.

Unit-II **PCB** **12 Hrs.**

Design, Layout drawing, Positive and negative film making, PCB etching and drilling, Tinning and soldering technique, Component mounting and circuit testing.

Unit-III **House Wiring** **12 Hrs.**

Electrical safety in the workplace and safe work practices, Protection equipment, measures and tools. Introduction to house wiring, different types of cables, types of power supply, distribution of power supply, electrical wiring symbols. Wiring for two lamps (bulbs) with independent switch controls with or without looping, wiring for staircase lamp.

Unit-IV **Computer Hardware and Networking** **12 Hrs.**

Dismantling of a Personal computer (PC), Identification of components of a PC such as power supply, motherboard, processors, hard disk, memory (RAM, ROM), CMOS battery, CD Drive, monitor, keyboard, mouse, printers, disk drives etc. Assembling of PC, Installation of Operating System (any one), and Device drives, Boot-up sequence, Installation of Application software (at least one). Basic trouble shooting and maintenance. Identification of network components: LAN card, wireless card, switch, hub, router, different types of network cables (straight cables, crossover cables, rollover cables. Basic networking and crimping).

R. C. Patel Institute of Technology, Shirpur
SBS
Autonomous

Group B (General Group)

Unit-V **Sheet Metal** **8 Hrs.**

Introduction to primary technology processes involving bending, punching and drawing, various sheet metal joints, development of joints.

Unit-VI **Pipe Fitting** **8 Hrs.**

Use of plumbing tools, spanners, wrenches, threading dies, demonstration of preparation of a domestic line involving fixing of a water tap and use of coupling, elbow, tee and union etc.

Unit-VII **CNC Machines** **8 Hrs.**

Introduction of CNC Machine tools, working principle, classification, constructional features of CNC Machines, CNC controller, types of motion controls in CNC Machines, application of CNC Machines. Manual part programing for turning and milling.

Unit-VIII **3D Printing** **8 Hrs.**

Introduction to Additive Manufacturing Technologies for engineering applications, 3D printing of a simple custom object using FDM, SLA and SLS technologies (any one).

Unit-VIII **Drone** **8 Hrs.**

Introduction to drone and its applications, Fabrication and testing of mini drone.

Workshop Practice

List of Laboratory Experiments:

1. To study various types of fitting tools and make a Square joint, V joint, T joint, half round joint, dovetail joint from the given two MS pieces (Any one joint)
2. To study various welding techniques and make a V-butt joint or Lap-joint, using the given mild steel pieces by are welding.
3. To make printed circuit board as per the given circuit drawing.
4. To make connection to two lights control by one switch in series or one light control by two-way switches.
5. To study computer hardware and operating system.
6. To study various types of sheet metal tools and make square or rectangular tray.

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

7. To study various types of plumbing tools and make one job containing various pipe fitting.

8. To study various operations of a CNC machining center and make one simple job on CNC turning.

9. To study various 3D printing techniques and make a simple object using any of these technique.

10. To study, fabricate and test mini drones.

Any other experiment based on syllabus may be included, which would help the learner to understand topic/concept.

Text Books

1. Manufacturing Process and Systems, 9th Edition, P.F. Ostwald, John Wiley and Sons INC. UK 2008.
2. Electrical Workshop: Safety, Commissioning, maintenance and testing of electrical equipment, 3rd Edition, R.P. Singh, IK International Publishing House Pvt. Ltd. 2012.

Reference Books

1. Mechanical Workshop Practice, 2nd Edition, K.C. John, PHI Learning Pvt. Ltd. 2014
2. Manufacturing Technology- Vol 1, 4th Edition, P. N. Rao Tata McGraw Hill, 2014.
3. Printed Circuit Boards: Design, fabrication, assembly and testing, 1st Edition, R. S. Khandpur, Tata McGraw Hill 2005.

Evaluation scheme

Term work shall consist of minimum one main job and two group jobs The distribution of marks for term work shall be follows:

Laboratory work (Performance of experiments) : 25 Marks

1. Anyone Job from Group A (Main Group)
2. Any two Jobs from Group B (General Group)

The final certification and acceptance of term work will be subject to satisfactory performance of laboratory work and upon fulfilling minimum passing criteria in the term work.

R. C. Patel Institute of Technology, Shirpur SES

Program: Common to All Branches	F.Y.B. Tech
	Sem-II
Mathematics - II (RCP23FCBS201)	
Mathematics - II Tutorial (RCP23FTBS201)	

Pre-requisite: Knowledge of

- Methods of integration.
- Methods of differentiation.
- Basics of differential equations.

Course Objectives:

- The course is aimed to develop the Mathematical skills of engineering students that are imperative for effective understanding of engineering subjects. The topics introduced will serve as basic tools for specialized studies in many fields of engineering and technology.
- To provide hands on experience in using C programming s to handle real life problems.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Apply the concepts of Beta and Gamma function, DUIS and rectification of plane curves	L3	Apply
CO2	Solve double and triple integrals by applying change of variables and transformation to polar coordinates.	L3	Apply
CO3	Apply the concepts of multiple integrals to calculate the area, volume, and mass of various laminae.	L3	Apply
CO4	Solve first-order and higher-order ordinary differential equations using standard analytical methods.	L3	Apply
CO5	Apply the principles of Numerical Method for solving differential equation and numerical integration analytically and using C.	L3	Apply

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Mathematics - II (RCP23FCBS201)

COURSE CONTENTS

Unit-I **Beta and Gamma Function, Differentiation under Integral sign and Rectification** **12 Hrs.**

Prerequisite: Derivative, Integration

1.1 Beta and Gamma functions and its properties.

1.2 Differentiation under integral sign with constant limits of integration.

1.3 Tracing of curves: Cardioid, Strophoid, Bernoulli's Lemniscate, Astroid, Cycloid, 3D Solids: Sphere, Cone, Cylinder, Paraboloid, Ellipsoid.

1.4 Rectification of plane curves in Cartesian form.

1.5 Rectification of curve in Parametric and Polar forms.

Unit-II **Multiple Integrals** **08 Hrs.**

Prerequisite: Integration

2.1 Introduction, Evaluation of Double Integrals (Cartesian & Polar).

2.2 Evaluation of double integrals by changing the order of integration.

2.3 Evaluation of integrals over the given region (Cartesian & Polar).

2.4 Evaluation of double integrals by changing to polar coordinates (using Jacobian).

2.5 Introduction and evaluation of triple integral using Cartesian coordinate system.

2.6 Evaluation of triple integrals using cylindrical and spherical coordinate systems.

Unit-III **Applications of Multiple Integrals** **05 Hrs.**

Prerequisite: Double Integration and Triple Integration

3.1. Application of double integrals to compute Area and Mass.

3.2. Application of triple integrals to compute Volume.

Unit-IV **Differential Equations of First Order and First Degree** **06 Hrs.**

Prerequisite: Differential Equations, Variable separable form

4.1 Exact differential Equations, Equations reducible to exact form by using four rules of integrating factors.

4.2 Linear differential equations (Review), equation reducible to linear form, Bernoulli's equation.

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Unit-V **Higher Order Linear Differential Equations with Constant Coefficients and Variable Coefficients** **07 Hrs.**

Prerequisite: Unit-IV

5.1 Linear Differential Equation with constant coefficient: complementary function, particular integrals of differential equation of the type f(D)y = X, where X is e^{ax}, sin(ax+b), cos(ax+b), x^m, x^msin ax, x^mcos ax, e^{ax}V, xV.

5.2 Method of variation of parameters (upto 3rd order).

5.3 Cauchy's homogeneous linear differential equation.

Unit-VI **Numerical solution of ordinary differential equations of first order and first degree, Numerical Integration** **04 Hrs.**

Prerequisite: Solution of Differential Equation

6.1 Numerical solution of ordinary differential equation using: (a) Taylor series method, (b) Runge-Kutta method of order four.

6.2 Numerical integration by (a) Trapezoidal rule, (b) Simpson's $1/3^{rd}$ rule, (c) Simpson's $3/8^{th}$ rule (all without proof).

Mathematics - II Tutorial (RCP23FTBS201)

Suggested Tutorials (including C programs)

- Beta and Gamma Functions, DUIS and Rectification.
- Double integration.
- Triple Integration.
- Application of multiple integrals.
- Differential Equation of First Order and First Degree.
- Higher Order Differential Equation.
- Curve Tracing.
- Numerical Integration by Trapezoidal rule.

- Numerical Integration by Simpson's 1/3rd rule.
- Numerical Integration by Simpson's 3/8th rule.
- Ordinary Differential Equation.
- Numerical Solution of Ordinary Differential Equations of first order and first degree.
- Numerical Solution of Ordinary Differential Equations using Runge-Kutta fourth order method.

Minimum eight tutorials batchwise (including C programs) from the above suggested list or any other experiment based on syllabus will be included, which would help the learner to apply the concept learnt.

Text Books

Program: Computer/DS/AIML/ETC/MECH/AIDS Group-A	F.Y.B. Tech Sem-II
Object Oriented Programming using Java (RCP23FCES201/ RCP23FLES201)	

Pre-requisite

- Basics of Programming

Course Objectives

- To make students familiar with basic and Object-Oriented features of Java.
- To expose students to analyze a problem statement, develop suitable logic and implement it in Java.
- To enable students to design and develop GUI applications.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Develop programs by applying Object-Oriented concepts of JAVA to solve real-world problems.	L3	Apply
CO2	Achieve Robustness and Concurrency while developing programs	L3	Apply
CO3	Design Graphical User Interface using Swing	L3	Apply

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Object Oriented Programming using Java (RCP23FCES201)

COURSE CONTENTS

Unit-I Introduction to Java as Object Oriented Programming Language 04 Hrs.

Fundamentals of Java Programming: Overview of procedure and object-oriented programming, Features of Java, Java Virtual Machine.

Principles of OOP: Object, Class, Encapsulation, Abstraction, Inheritance, Polymorphism.

Basic Constructs: Constants, variables and data types, Wrapper classes, Operators and Expressions. Input & Output in Java: command line arguments, BufferedReader class and Scanner class.

Unit-II Branching and Looping 04 Hrs.

Branching and looping: if, if-else, nested if-else, if-else-if ladder, switch-case, break, continue, for loop, while loop, and do-while loop.

Arrays, Strings and Collection Types Arrays, Strings (String and StringBuffer classes) Collections: ArrayList, Vectors

Unit-III Classes and Objects 06 Hrs.

Access specifiers, static and non-static members, Passing and returning variables and references, Method Overloading, Recursion, Array of Objects.

Constructors Constructors: Default, Parameterized Constructors, copy constructor and Constructor overloading.

Unit-IV Inheritance, Interfaces and packages 07 Hrs.

Inheritance and its types, Role of Constructors in inheritance, Method Overriding, super keyword, abstract class and abstract method, final keyword, Static and dynamic binding in Java, finalize method. Interfaces: Implementing multiple inheritance and extending interfaces.

Packages: explore predefined packages, creating user defined packages and importing the same.

Unit-V Exception Handling and Multithreading (Robustness and Concurrency) 05 Hrs.

Error vs Exception, try, catch, finally, throw, throws, creating custom exceptions.

Multithreading: Need of Multithreading, Thread lifecycle, methods of Thread class, creating threads using Runnable interface and Thread class, Thread synchronization.

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Unit-VI **GUI programming in JAVA** **02 Hrs.**

SWING Programming: Swing Components and Containers, Swing Packages, A Simple Swing Application, Designing Swing GUI Application and Event handling.

Object Oriented Programming using Java (RCP23FLES201)

Suggested experiments:

1. Program to demonstrate input using Scanner, Buffered Reader and command line arguments.
2. Programs to demonstrate different decision-making statements.
3. Program to implement Arrays (1D, 2D).
4. Program on String and String Buffer.
5. Program on Collections (ArrayList/ Vectors)
6. Program to create class with members and methods.
7. Programs on static, non-static, recursive and overloaded methods.
8. Program on constructor and constructor overloading.
9. Program on passing and returning object as argument.
10. Program on creating user defined package.
11. Programs on single, multilevel and hierarchical inheritance.
12. Program to demonstrate multiple inheritance using interfaces.(Use super keyword).
13. Program on abstract class.
14. Program on dynamic method dispatch using base class and interface reference.
15. Program to demonstrate try, catch, throw, throws and finally.
16. Program to implement user defined exception.
17. Program to demonstrate concept of multithreading
18. Java programs to understand GUI designing and event handling.

Minimum 10-15 experiments from the above suggested list or any other experiment based on syllabus will be included, which would help the learner to apply the concept learnt.

Program: Computer	F.Y.B. Tech
	Sem- II
Foundation of Computing Technologies (RCP23FCPC2CO)	

Pre-requisite:

- Computer Basics

Course Objectives:

- To have a thorough understanding of basic structure and operations of computer system
- To learn and practice data modelling using the Entity-Relationship and develop database design.
- To introduce basic concepts and functions of different operating systems.
- To understand and identify different types of cyber-crime and cyber offences.
- To introduce fundamentals of Big Data, Data Science, Data Analytics, Data Warehouse and Data Mining.

Students that successfully complete this course will be able to-

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand the basics of computer architecture and organisation.	L2	Understand
CO2	Understand the concept of signals, error detection, wired and wireless networks	L2	Understand
CO3	Design and draw ER diagram for the real-life applications.	L6	Create
CO4	Summarize basic functions and types of Operating System.	L2	Understand
CO5	Understand basics of computer security and different types of cyber threats.	L2	Understand
CO6	Understand fundamentals of big data, data science, data analytics, L2 data warehouse and data mining	L2	Understand

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Foundation of Computing Technologies

(RCP23FCPC2CO)

COURSE CONTENTS

Unit-I **5 Hrs.**

Introduction to Computer Fundamentals

Introduction to Computers: Characteristics, Components, Advantages and Limitations, Classi fication of computers, Software- Classification & Application. Introduction to Computer Architecture & Organization: Introduction, Basic organization of computer architecture; Von Neumann model and Harvard ar chitecture; Data Representation and Arithmetic Algorithms- Addition, Subtraction, Multiplication- unsigned multiplication, Booth's algorithm (Signed multiplication), Division of integers- restoring division, non-restoring division., Types of RAM (SRAM, DRAM, SDRAM, DDR, SSD) and ROM.

Unit-II **Data Communication and Networking** **4 Hrs.**

Communication concepts: Characteristics of Signal (Amplitude, Frequency, Period, Wavelength). Channel Capacity for noiseless channel (Nyquist Law) and noisy channel (Shannon's Law). Data Rate versus Baud Rate, Error detection: Parity–based, CRC-based. Wired Networks: Goals and applications of networks. LAN, MAN and WAN Architectures, Concept of WAN subnet, Overview of existing networks. Need for a Protocol Architecture, OSI Reference Model Architecture, FCS Computation. Error Control and recovery techniques, Concept of ARQ standard and its versions. Wireless Networks: Bluetooth, Wi-Fi, Li-Fi

Unit-III **Database Management Systems** **4 Hrs.**

Introduction to Database: History, Characteristics, Users and Advantages, Classification of Database, Data Models, Schemas & Instances, Three Schema Architecture & Data Independence. DBMS Languages & Interfaces, Conceptual Data modeling using ER Model. Relational Data Model Concepts: Domains, Attributes, Tuples, Relations & their character istics. Relational Data Model Constraints- Entity Integrity, Referential Integrity, Foreign Keys and other Relational Database design using ER to Relational Mapping

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Unit-IV **Fundamentals of Operating System** **4 Hrs.**

Definition of Operating System Objectives, types, and functions of Operating Systems, Archi tecture of Operating System, Internal and External Commands, Batch Files, Types of O.S Windows, Linux, RTOS, Android, iOS, etc.

Unit-V **Introduction to Computer Security** **3 Hrs.**

Basics of Security: Security Trends, CIA Trial, Threats, attacks, Vulnerability, Cryptography and its types, Security mechanisms Introduction to Cyber Security: Hacking, Data Theft,Cyber Terrorism, Virus and Worm's, Email Bombing, Pornography, online gambling, Forgery, Web Defacements, Web Jacking, Illegal on line Selling, Cyber Defamation, Software Piracy, Electronics/ Digital Signature, Phishing, Password Cracking.

Unit-V **Introduction to Advanced Computing Technology** **8 Hrs**

Big data: Introduction, Characteristics of big data, Big data case studies. Data Science: Introduction to data science concept, Data Science Profile, The Data Science Pro cess. Data analytics: Overview, Importance of data analytics, Types of data analytics, Advantages of data analytics. Data warehousing and Mining: Introduction to Data Warehouse and Dimensional modelling, Data Mining Task and Techniques, KDD process, Issues in Data Mining, Applications of Data Min ing. Data Engineering: Introduction to Data Engineering, Data cleansing, data transformation. e Block chain Technology: Introduction, Bitcoin, Ethereum, Consensus algorithms, Smart contract.

Text Books

1. Computer Organization and Architecture- Designing for Performance - William Stallings (Pearson)
2. Computer Networks- Andrew Tanenbaum, David Wetherall (Pearson)
3. Database System concepts- Abraham Silberschatz (TMH)
4. Operating System Concept-Abraham Silberschatz (Wiley)
5. Cryptography and Network Security-Behrouz Forouzan (TMH)
6. Cyber Security and Cyber Laws-Nilakshi Jain, Ramesh Menon (Wiley)
7. Blockchain, Big Data and Machine Learning: Trends and Applications-Neeraj Kumar, N. Gayathri, Md Arafatur Rahman, B. Balamurugan (CRC Press).

Program: IT	F.Y.B. Tech
	Sem-II
Foundation of Information Technology (RCP23FCPC2IT)	

Pre-requisite: Computer Fundamentals

Nil

Course Objectives:

- The objective of the course is to introduce the learner to the basics of computers, viz., the architecture, computer arithmetic, operating system and network basics. The course will also abreast the learner of the basics of computer security

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand the organization of a computer system and networking.	L2	Understand
CO2	Understand the basics of computer security.	L2	Apply

Foundation of Information Technology (RCP23FPC152)

COURSE CONTENTS

Unit-I Introduction to Computers and its Architecture 5 Hrs.

Von Neumann model, Input-Output Devices, Memory Hierarchy-Cache Memory, Internal Memory, External Memory, Primary Vs Secondary Storage, Data Storage & retrieval methods. Primary Storage: RAM ROM, PROM, EPROM, EEPROM. Secondary Storage: HDD, SSD.

Unit-II The Central Processing Unit 5 Hrs.

The ALU, Integer Representation, Integer Arithmetic, Floating Point Representation, Floating-Point Arithmetic, Machine Instruction Characteristics, Types of Operations– Data Transfer, Arithmetic, Logical, Conversion, Input/Output, Addressing Modes– Immediate, Direct, Indirect, Register, Register Indirect, Register Organization, Instruction Cycle.

Unit-III Computer Arithmetic 6 Hrs.

Introduction to number systems-Binary number systems, octal, hexadecimal and their operations, conversion, 1's and 2's complement, Binary Arithmetic using complements– addition, subtraction, signed and unsigned integers

Unit-IV Operating System 4 Hrs.

Functions, Measuring System Performance, Batch Processing, Multiprogramming, Multi-Tasking, Multiprocessing, Time Sharing, DOS, Windows, Unix/Linux

Unit-V Data Communication and Networks 4 Hrs.

Communication Process, Data Transmission speed, Communication Types (modes), Network Devices, Types of Networks, LAN Topologies, compression and its types-Lossy and Lossless. Fundamentals of cloud computing-SaaS, PaaS, IaaS, applications.

Unit-VI Attacks on Computers and Computer Security 4 Hrs.

Introduction, Need for Security, Security Approaches, Principles of Security, Types of Attacks

Text Books

Electrical Networks (RCP23FCPC2ET/ RCP23FCPC2EE)	

Pre-requisite:

- Basic Electrical Engineering and Digital Electronics
- Mathematics - I

Course Objectives:

- To analyse the circuits in time domain.
- To study network topology, network functions, two port network.
- To synthesize passive network by various methods.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Apply the time-domain method for analysis of circuits	L3	Apply
CO2	Find the various parameters of two port network	L1	Remember
CO3	Apply network topology for analyzing the circuit	L3	Apply
CO4	Synthesize the network using passive elements	L4	Analyze

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Electrical Networks (RCP23FCPC2ET/ RCP23FCPC2EE)

COURSE CONTENTS

Unit-I **Graph Theory** **5 Hrs.**

Objectives of graph theory, Linear Oriented Graphs, graph terminologies, Matrix representation of a graph: Incidence matrix, Circuit matrix, Cut-set matrix, reduced incident matrix, tieset matrix, f-cutset matrix. KVL & KCL using matrix, solution of resistive networks and principle of duality.

Unit-II **Time domain analysis** **6 Hrs.**

Transient Analysis of circuits containing R, L and C, Time domain analysis of R-L, R-C and RL-C Circuits, Forced and natural response.

Unit-III **Network functions** **5 Hrs.**

Network functions for the one port and two port networks, driving point and transfer functions, Poles and Zeros of Network functions, necessary condition for driving point functions, necessary condition for transfer functions, Hurwitz Criterion.

Unit-IV **Network Synthesis** **7 Hrs.**

Concept of positive real function, testing for necessary and sufficient conditions for Positive Real Functions, Synthesis of LC, RC & RL Circuits: properties of LC, RC & RL driving point functions, LC, RC & RL network Synthesis in Cauer-I & Cauer-II, FosterI & Foster-II forms.

Unit-V **Two port Network** **5 Hrs.**

Parameters: Open Circuits, Short Circuit, Transmission and Hybrid parameters, relationship among parameters, conditions for reciprocity and symmetry (without dependent sources)

Elements of Mechanical Engineering (RCP23FCPC2ME)	

Pre-requisite

Nil

Course Objectives

- To acquaint learners with the basics of thermodynamics and energy conversion devices.
- To familiarize learners with the machine elements.
- To impart knowledge of materials, manufacturing processes, and machine tools

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand the scope of mechanical engineering and fundamentals of thermodynamics.	L2	Understand
CO2	Understand working principle of various energy conversion devices.	L2	Understand
CO3	Identify various machine elements for different applications	L2	Understand
CO4	Understand various additive and subtractive manufacturing processes, chip less and chip removal processes.	L2	Understand
CO5	Describe various types of conventional machine tools and CNC machines, with machining operations to generate cylindrical and planar components.	L2	Understand

H. C. Patel Institute of Technology, Shirpur

Elements of Mechanical Engineering (RCP23FCPC2ME)

COURSE CONTENTS

Unit-I **Introduction to Mechanical Engineering (Overview only)** **06 Hours**

Role of Mechanical Engineering in Industry and Society - Emerging Trends and Technologies in different sectors such as Energy, Manufacturing, Automotive, Aerospace and Marine sectors.

Thermodynamics: Thermodynamic work,pdV work in various processes, pV representation of various thermodynamic processes and cycles. Ideal gas equation. Properties of pure substance, Statements of First and Second law of thermodynamics and their applications. Carnot cycle for Heat engine, Refrigerator and Heat pump.

Unit-II **Energy Conversion Devices** **05 Hours**

Steam generation process, Boiler; Mountings and accessories, Fire tube and Water tube boiler, Construction and working of Babcock & Wilcox, Cochran boiler, Introduction and Working principle of Steam Turbines, Gas turbine, Hydraulic turbines: Working of Pelton wheel and Francis turbine, Reciprocating Compressor, Reciprocating Pump, Working of Reciprocating I.C. engines (2 Stroke and 4 stroke), Study of household refrigerator and air conditioner

Unit-III **Machine elements (Theoretical study and applications)** **06 Hours**

Power transmission shafts, axles, keys (Types and its applications). Bearings: Purpose, Classification, sliding contact bearing; Solid journal bearing, Bush bearing, rolling contact bearing: Ball bearing, Roller bearings- Power Transmission Devices (Basic elements and its applications): Belt drives, Gear drives and Couplings: Types and its applications. Introduction to machine design process.

Unit-IV **Materials and Manufacturing Processes** **06 Hours**

Introduction to Engineering materials and material selection criteria. Classification of manufacturing process based on additive and subtractive process, chip less and chip removal process, Additive Manufacturing process (Liquid based, Solid based & Powder based processes) - Casting, Forging, Extrusion, Rolling, Sheet metal forming/cutting, Metal joining processes.

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

Unit-V **Machine Tools** **05 Hours**

Conventional machine tools required to generate cylindrical and planar components. Introduction to Numerical Control (NC) and Computer Numerical Controlled (CNC) machines. Introduction to Non Conversional Machining Processes- Mechanical, Electrical, Thermal, Chemical Energy.

Program: Civil Engineering	F.Y.B. Tech
	Sem-II
Elements of Civil Engineering (RCP23FCPC2CE)	

Course Objectives:

- To familiarize students with fundamental principles and scope in civil engineering.
- To acquaint students with practical application in the field of Civil Engineering.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Describe the role of civil engineer in society and to relate the various disciplines of Civil Engineering.	L2	Understand,
CO2	Classify different types of buildings, building components, building materials and building construction.	L2	Understand,
CO3	Explain the design and principles of planning.	L2	Understand
CO4	Describe the importance, objectives and principles of surveying.	L2	Understand
CO5	Identify the basic application of various civil engineering software.	L2	Understand

Elements of Civil Engineering (RCP23FCPC2CE)

COURSE CONTENTS

Unit-I **Introduction to Civil Engineering** **5 Hrs.**

Introduction to various branches of civil engineering, introduction to various civil engineering structures such as buildings, highways, railways, bridges, dams, canals, elevated and ground storage reservoirs etc.

Unit-II **Building Components** **5 Hrs.**

A) Types of Structures: Superstructure, Sub Structure, functions of foundation, types of shallow and deep foundations, suitability in different situation, Load on Structure.

B) Introduction to various parts of buildings - Plinth, walls, lintels, beams, columns, slabs, roofs, staircases, floors, doors, windows, sills, ventilation, basics of plumbing and sanitation.

Unit-III **Building Planning & Construction** **6 Hrs.**

Building plans, principles of planning, site selection for buildings, typical plan of a residential building, plinth area, carpet area, cost of building, FSI, building bye laws, ventilation and lighting.

Unit-IV **Basic Surveying** **6 Hrs.**

Principles of surveying, Linear and Angular Measurement, Introduction to compass, bearing, Whole Circle Bearing and Reduced Bearing systems (Theory + Numerical), local attraction, its detection and correction (Theory + Numerical). Concept of bench mark, reduced level and contours.

Unit-V **Software's in Civil Engineering** **6 Hrs.**

Brief introduction to various computer software's in the field of Civil Engineering:

- Applications of Data Science and Artificial Intelligence (AI) in Civil Engineering
- Introduction and use of AutoCAD and ZWCAD for making drawings, 3D modelling software's – 3D Max, Revit Architecture, Revit for BIM (Building Information Modelling), 3D Printing.
- Software's related to Structural Engineering: STAAD-Pro, ETABS, SAP, MIDAS, ATENA etc.
- Software's of Advance Surveying: GPS, GIS, Auto Plotter, 3D Civil

R. C. Patel Institute of Technology, Shirpur

Program: Data Science	F.Y.B. Tech
	Sem-II
Fundamental of Data Analysis (RCP23FCPC2DS)	

Prerequisite: Basic Mathematics and Data Interpretation

Course Objectives:

- To develop skills of data analysis techniques for data modelling.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand data properties.	L2	Understand
CO2	Apply statistical methods for data analysis.	L3	Apply
CO3	Articulate various techniques to improve quality of data.	L2	Understand

Fundamentals of Data Analysis (RCP23FCPC2DS)

COURSE CONTENTS

Unit-I **Data** **04 Hrs.**

Data objects and attributes: nominal, binary, ordinal, numeric, discrete, continuous;

Characteristics of datasets: dimensionality, sparsity, resolution;

Types of data sets: record data, data matrix, graph-based data, sequential data, sequence data, time-series data, spatial data.

Unit-II **Data and Text Visualization** **04 Hrs.**

Seven Stages of Data Visualization, Types of charts (comparison, distribution, composition, relationship), Structured Data: bar chart, pie chart, histogram, stacked bar graph, box plot, scatter plot, heat map, line chart, Node-link, dual axis chart.

Unstructured Data: word count, bar chart, word tree, line chart diagrams, Word clouds.

Unit-III **Descriptive Statistics** **06 Hrs.**

Population Vs Sample;

Measure of Central Tendency: arithmetic mean, weighted mean, median, mode, grouped and ungrouped data, empirical relationship between mean, median and mode, geometric mean, harmonic mean and outliers;

Measure of Dispersion: Range, quartile deviation, mean deviation, standard deviation, variance, empirical relationship between measures of dispersion, absolute and relative dispersion, skewness, kurtosis and histogram;

Measure of Position: Quartiles, interquartile range, semi interquartile range, percentile, percentile rank, box and whisker plot.

Unit-IV **Data Preprocessing** **07 Hrs.**

Need of Data Pre-processing

Data Cleaning: Handling missing values and noisy data;

Data Transformation: Smoothing, attribute construction, aggregation, normalization;

Data Discretization: Binning and Histogram analysis;

Outlier Detection: Types of outliers, challenges, statistical method (z-score), proximity-based method (K-NN and LOF).

R. C. Patel Institute of Technology, Shirpur
SES

Unit-V **Feature Engineering** **07 Hrs.**

Curse of Dimensionality, Feature Selection: Univariate methods (Pearson Correlation, Chi square) and Multivariate methods (Forward Selection, Backward Selection and Stepwise Selection).

Program: Artificial Intelligence and Data Science	F.Y.B. Tech
	Sem-II
Fundamentals of Artificial Intelligence & Data Science (RCP23FCPC2DS)	

Pre-requisite:

- Basic knowledge of computers

Course Objectives:

- To familiarize the fundamentals of Artificial Intelligence and Data Science.

Students that successfully complete this course will be able to

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand the basics of Artificial Intelligence and its applications	L2	Understand
CO2	Apply problem-solving techniques for problem formulation.	L3	Apply
CO3	Understand the fundamentals of Data Science	L2	Understand

R. C. Patel Institute of Technology, Shirpur
SES
AUTONOMOUS

Fundamentals of Artificial Intelligence & Data Science

(RCP23FPC157)

COURSE CONTENTS

Unit-I **Introduction to Artificial Intelligence** **5 Hrs.**

Introduction: Introduction, History of Artificial Intelligence, Types of AI, Intelligent Systems: Categorization of Intelligent System, Components of AI Program, Applications of AI (Robotics, Healthcare, Industry), Current trends in AI.

Intelligent Agents: Agents and Environments, The concept of rationality, The nature of environment, PEAS representation, The structure of Agents, Types of Agents, and Learning Agent.

Unit-II **Problem solving and Searching Techniques** **6 Hrs.**

Problem Solving Agent, Formulating Problems: steps problem solving in AI, Example Problems: Vacuum world state space graph, 8 Puzzle Problem, 4 queen and 8 Queen Problem, Introduction to searching techniques in AI.

Unit-III **Knowledge Representation** **5 Hrs.**

A Knowledge Based Agent, Overview of Propositional Logic, First Order Predicate Logic, Introduction to PROLOG, Case Study.

Unit-IV **Expert Systems** **6 Hrs.**

Introduction, Phases in building Expert Systems, Expert system Architecture, Case Study on Expert System. Applications of Expert Systems. How to achieve AI in practical: Introduction to Machine and Deep Learning, Introduction to No code AI tools.

Unit-V **Fundamentals of Data Science** **6 Hrs.**

Introduction to data lake, Data Lake frameworks, Data Pre-Processing An Overview, Cleaning, Data Integration, data reduction, Data Transformation and Data discretization.

Exploratory Data Analysis (EDA): Philosophy of EDA - The Data Science Process

Health and Wellness- Mind and Body Management (RCP23FTLL101)

COURSE CONTENTS

Unit-I **Fundamentals of Good Health** **05 Hrs.**

01 Assignment:

Divide the students into small groups and assign each group a specific lifestyle choice (Healthy or Unhealthy) to explore.

Ask them to discuss the potential effects on health and present their findings to the class.

Unit-II **The Basics of Health** **06 Hrs.**

02 Assignments:

1. Create a Personalized Health Goal Plan

2. Role-play techniques to promote awareness regarding health and disease prevention.

Select a Relevant Topic: Choose a specific health-related topic such as hygiene practices, Vaccination, or mental health.

Script Development: Develop a script that combines informative content with creative elements. Include key messages, facts, and practical tips related to the health issue. Use humor, drama, and relatable scenarios to capture the audience's attention.

Characterization: Each character should have a distinct personality and contribute to the overall message of the play.

Unit-III **Yoga for Mind and Body (Any 2)** **05 Hrs.**

02 Assignments :

1. Mindfulness and Meditation Session

2. Written assignment on the Role of Yoga in enhancing concentration

3. Stress Awareness Discussion Group

- Create a safe and supportive space for students to discuss and share their stressors.

R. C. Patel Institute of ... Shirpur
SES
Autonomous

- Organize a stress awareness discussion group where students can openly express their concerns, challenges, and coping strategies.
- Facilitate meaningful conversations on stress management techniques.
- Provide resources for support (such as counseling services) and encourage peer support within the group.

Unit-IV Emotional Intelligence and Mind Management (Any 2) 06 Hrs.

02 Assignments:

1. Role-Play on Conflict Resolution

a. Find a partner: Choose a friend who is willing to participate in this role-play activity with you

b. Select a scenario: Together with your partner, select a conflict scenario to role-play. It could be a common situation that often leads to conflicts, such as a disagreement over how to divide household chores, a difference of opinion on a project at work, or a conflict over limited resources

c. Assign roles: Decide who will play each role in the conflict scenario. One person will take on the role of one party involved in the conflict, and the other person will take on the role of the other party

d. Practice conflict resolution techniques: Use the conflict resolution techniques you have learned, such as active listening, expressing feelings using "I" statements, seeking common ground, and brainstorming solutions

e. Reflect and switch roles: After the initial role-play, take a moment to reflect on the experience. Discuss what worked well and areas that could be improved. Then, switch roles and repeat the role-play, allowing each participant to experience the situation from the perspective of the other party involved in the conflict.

- Remember, the purpose of the activity is not to "win" the conflict but rather to practice and develop the skills necessary for constructive conflict resolution.

R. C. Patel Institute of Technology, Shirpur
SES

- Approach the role-play with an open mind, a willingness to learn, and a commitment to respectful communication.

2. **Self-Assessment and Reflection (Mood O Meter chart activity)**

- Begin the tutorial by facilitating self-assessment activities that encourage students to reflect on their emotions, thoughts, and behaviors.
- Provide questionnaires or reflective exercises that prompt students to identify their strengths,areas for improvement, and triggers for stress or negative emotions.

3. **Case Study discussion based on Emotional Intelligence**

Unit-V **Self-Reflection and Wellness Goal Setting** **06 Hrs.**

01 Assignment :

Gratitude journaling: Have students maintain a gratitude journal where they write down three things, they are grateful for each day on the following indicators:

1. How did it feel to write in the gratitude journal?

2. Did you find it challenging or easy to identify things to be grateful for?

3. What positive emotions or thoughts arose while writing the journal?

4. Do you think maintaining a gratitude journal can have a positive impact on your well-being as an engineering student?

Mini Project – Community Health and Wellness Initiative

1. Research and Assess Community Needs

Conduct surveys or interviews to assess the health and wellness needs of your community. Identify specific areas where improvements can be made, such as physical fitness, mental health, social connections, or access to healthcare resources.

2. Fitness and Recreation Events

Arrange fitness events, such as community walks or runs, group exercise classes, yoga sessions, or sports tournaments.

3. Health Education Campaigns

- Launch health education campaigns to raise awareness about specific health issues relevant to your community.

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

- This could include distributing informational pamphlets, organizing educational talks, or Creating Social Media Campaigns to share important health messages.
- Develop a plan to sustain the project beyond its initial phase.

OR

Health and Wellness Advocacy Project

- Choose a health issue you are passionate about and design a health and wellness advocacy project.
- Students can create a Persuasive Video, Infographic or Social Media Campaign to raise awareness and mobilize support for their chosen cause.

Program: First Year Engineering	F.Y.B. Tech
	Sem-I & II
Indian Knowledge System (RCP23FTHS102)	

Course Objectives:

- To impart knowledge about basic principles of thought process, reasoning and inferencing.
- To make students aware of Indian Traditional knowledge Systems connecting society and nature.
- To acquaint students with the holistic lifestyle of yogic science and wisdom in modern society with rapid technological advancements and societal disruptions.

COs	Course Outcomes	Blooms Level	Blooms Description
CO1	Understand the history of Indian education system.	L2	Understand
CO2	Learn about Indian Scientists and their inventions.	L1	Knowledge
CO3	Understand and appreciate the various art forms and architecture in India.	L2	Understand
CO4	Illustrate the classic literature written in Indian languages.	L3	Apply
CO5	Know the various religions followed in India and their philosophies.	L1	Knowledge

Indian Knowledge System (RCP23FTHS102)

COURSE CONTENTS

Unit-I **Indian Education System** **06 Hrs.**

- Gurukul system
- Ancient Universities (Nalanda, Takshashila,Vikramshila,Vallabhi,Nagarjuna,etc.)

Unit-II **Indian Scientists and Their inventions** **06 Hrs.**

- Patanjali, Aryabhatta, Bhaskaracharya, Charaka, Brahmagupta, Varahmitra, Sushruta, Kanada, Baudhyana, etc.

Unit-III **Indian Art and Architecture** **06 Hrs.**

- Mughal Paintings, Tanjore Paintings, Madhubani Paintings, Warli Paintings, etc.
- Harrappa and Mohenjo-Daro Civilization
- Temples and other religious places
- Buddhist stupas
- Forts and monuments

Unit-IV **Indian Classic Literature** **06 Hrs.**

- Puranas
- Epics (Ramayana, Mahabharata, Shakuntala, Meghdoota, Arthashastra,Sangam Literature, Malavikagnimitram, etc.)

Unit-V **Religion and Philosophy** **04 Hrs.**

- Vedas
- Buddhism
- Jainism and other religions

List of Tutorials/Assignments

1. Indian Education System
   - Group discussions/debates on various education systems.
2. Indian Scientists and Their inventions
   - Group presentations on various Indian scientists
   - An assignment on different inventions by Indians and their impact on world.

R. C. Patel Institute of Technology, Shirpur
SES
Autonomous

3. Indian art and architecture

- Group Poster project on different painting forms and Harappa and Mohenjo-Daro civilization.
- Group presentation on different archaeological structures in India

4. Indian Classic Literature

- An assignment on review of any one of the Indian classic literatures.
- Group discussion/Debate on the importance of the Indian classic literature in spreading the awareness about the importance of Indian culture and traditions.

OR

Dramatic Adaptations

- Ask students to adapt a scene or act from Indian classical literature into a dramatic performance.
- They can write scripts, create props and costumes, and rehearse their adaptations.
- Encourage creativity while staying true to the essence of the original work.
- Students can perform their adaptations for the class or in a larger setting..

5. Religion and Philosophy

- A group discussion/debate on the various religions and their philosophies.
