Institute Vision and Mission

Vision of the Institute

"To become a leading Institute in Technical education fostering innovation, research, ethical values, and sustainable development for the betterment of society."

Mission of the Institute

To impart high quality Technical Education through:

- M1:** Innovative and Interactive learning process and high quality globally recognized instructional programs.
- M2:** Fostering a collaborative scientific temper among students with ethical responsibility towards the society.
- M3:** Preparing students from diverse backgrounds to have aptitude for employment, entrepreneurship and research with a spirit of Professionalism.
- M4:** To contribute to nations sustainable development.

Mechanical Engineering Department

Vision of the Department

" To achieve excellence in Mechanical Engineering education through innovation, research, and strong ethical values for sustainable societal development."

Mission of the Department

- M1:** To deliver innovative and practical mechanical engineering education through quality instruction and hands-on learning.
- M2:** To promote teamwork, ethical values, and scientific curiosity through collaborative and socially relevant projects.
- M3:** To develop competent engineers with technical expertise, research aptitude, and entrepreneurial spirit for sustainable national growth.

Programme Educational Objectives (PEOs)

- PEO 1:** Graduates will apply scientific, mathematical, and engineering principles to solve complex mechanical problems ethically and sustainably.
- PEO 2:** Graduates will design and implement efficient mechanical solutions addressing societal needs through innovation, collaboration, and environmental stewardship.
- PEO 3:** Graduates will demonstrate professional competence, communication, teamwork, and life-long learning for career growth, entrepreneurship, and higher education.

Programme Specific Outcomes (PSOs)

- PSO 1:** Students will be able to apply Mechanical Engineering principles and modern tools to design and improve mechanical systems with innovative solutions.
- PSO 2:** Students will demonstrate ethical practice, teamwork, and communication to develop engineering solutions for societal and sustainable development.

Syllabus Details of Semester- III

Second Year B.Tech in Mechanical Engineering

(RCP23 NEP Scheme) with effect from Year 2026-27
(Revision 02)

Shahada Road, Near Nimzari Naka, Shirpur, Maharashtra 425405 Ph: 02563 259 802,

Web: www.rcpit.ac.in/mechanical-engineering-syllabus

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Mathematics for Mechanical Engineering (RCP23MPC201)		

Prerequisites:

1. Mathematics-I
2. Mathematics-II
3. Vector algebra and vector differentiation

Course Objectives:

1. To inculcate an ability to relate engineering problems to mathematical context.
2. To provide a solid foundation in mathematical fundamentals required to solve engineering problems.
3. To inculcate an ability to use the fundamentals of linear algebra to solve mechanical engineering problems.
4. To study the basic principles of linear algebra, vector calculus, and transforms like Laplace and Fourier.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Evaluate functions of square matrices using eigenvalues and eigenvectors.	L5	Evaluate
CO2	Use Laplace and Inverse Laplace to solve Ordinary Differential Equations.	L3	Apply
CO3	Apply Fourier series and Fourier integral methods to represent periodic functions and compute Fourier transform and inverse Fourier transform.	L3	Apply
CO4	Apply vector integration techniques to solve mechanical engineering problems.	L3	Apply

Mathematics for Mechanical Engineering (RCP23MPC201)

Course Contents

Unit-I 08 Hrs.

Linear Algebra

Characteristic equation, Eigenvalues and Eigenvectors with properties. Cayley-Hamilton theorem. Diagonalizability of matrices. Functions of square matrix.

Unit-II 07 Hrs.

Laplace Transform (LT)

LT of standard functions such as $1, t^n, e^{at}, \sin(at), \cos(at), \sinh(at), \cosh(at)$. Linearity property of Laplace Transform, First Shifting property, Change of Scale property of L.T. (without proof).

$$L\{t^n f(t)\}, L\left\{\frac{f(t)}{t}\right\}, L\left\{\int_0^t f(u) du\right\}, L\left\{\frac{d^n f(t)}{dt^n}\right\}$$

Unit-III 07 Hrs.

Inverse Laplace Transform

Inverse Laplace Transform

Linearity property, Partial fractions method and convolution theorem. Applications to solve ordinary differential equations with one dependent variable with given boundary conditions.

Laplace Transform of special functions (Flip classroom - self-study).

Heaviside Unit step function, Dirac Delta function, Periodic functions.

Unit-IV 11 Hrs.

Fourier Series and Fourier Transform

Fourier Series

Definition, Dirichlet's conditions, Fourier series of periodic function with period 2π 2l. Even and odd functions, Half range sine and cosine series, Parseval's identities (without proof).

Fourier Transform (FT)

Fourier integral theorem (only statement), Fourier transform, Fourier sine & cosine transforms, Inverse Fourier Transforms.

Unit-V 06 Hrs.

Vector Integration

Green's theorem (without proof) for planes, Stokes theorem and Gauss divergence theorem (without proof and verification).

Books Recommended

Textbooks

- 1 Seymour Lipschutz and Marc Lipson, 'Linear Algebra', 4th Edition, Schaum's outlines, 2008.
- 2 Gilbert Strang, 'Linear Algebra and its Applications', 4th Edition, Cengage, 2005.
- 3 B. S. Grewal, 'Higher Engineering Mathematics', Khanna Publication.

Reference Books

- 1 Erwin Kreyszig, 'Advanced Engineering Mathematics', Wiley India
- 2 Deisenth, Faisal, Ong, 'Mathematics for machine learning', Cambridge University Press.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Applied Thermodynamics (RCP23MPC202)		

Prerequisites:

Nil

Course Objectives:

1. To familiarize the concepts of Energy in general and Heat and Work in particular.
2. To study the fundamentals of quantification and grade of energy.
3. To study the effect of energy transfer on the properties of substances in the form of charts and diagrams.
4. To familiarize application of the concepts of thermodynamics in vapour power and gas power cycles.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain application of the first law of thermodynamics to flow and non-flow systems.	L2	Understand
CO2	Analyze thermodynamic cycles including vapour power cycles, refrigeration cycles, and heat pumps.	L4	Analyze
CO3	Utilize thermodynamic relations in the evaluation of thermodynamic properties.	L3	Apply
CO4	Utilize steam tables and Mollier charts to compute thermodynamic interactions.	L3	Apply
CO5	Evaluate the performance of air-standard cycles.	L5	Evaluate
CO6	Explain application of the first law of thermodynamics to air-conditioning processes.	L2	Understand

Applied Thermodynamics (RCP23MPC202)

Course Contents

Unit-I 06 Hrs.

Application of First Law of Thermodynamics

First law of thermodynamics for a closed system undergoing processes, First Law of Thermodynamics applied to open system – Steady Flow Energy Equation, Perpetual motion Machine of First kind. Application of first law of thermodynamics to open Systems like Steam Nozzle, Boiler, Steam Turbine, Pump, Heat Exchanger.

Unit-II 09 Hrs.

Second Law of Thermodynamics

Limitation of first law of thermodynamics, Thermal Reservoir – Source and Sink, Concept of Heat Engine, Heat Pump and Refrigerator, Second law of thermodynamics – Kelvin Planck and Clausius Statements. Equivalence of Clausius and Kelvin Planck Statement, Reversible and Irreversible Process. Causes of Irreversibility, Perpetual Motion Machine of Second Kind, Need of Carnot theorem and its corollaries, Carnot cycle, Thermodynamic Temperature Scale and its equivalence with Ideal Gas Scale. Entropy: Clausius Inequality, Clausius Theorem, Entropy is Property of a system, Isentropic Process, Temperature Entropy Plot and its relationship with heat interactions, Entropy Principle, Entropy change During a Process. Interpretation of concept of entropy.

Unit-III 04 Hrs.

Thermodynamic Relations

Reciprocal Relation, Cyclic Relation Property relations, Maxwell Relations, TdS equations, Heat capacity relations, Volume Expansivity, Isothermal Compressibility, Clausius-Claapeyron Equation. Exergy: High grade and Low-Grade Energy, Available and Unavailable Energy, Dead State, Available energy with respect to a process and a cycle.

Unit-IV 09 Hrs.

Properties of Pure Substance and Vapour Power Cycle

Pure substance and Phase changes: Phase change processes of pure substance, Property diagrams for phase change process (T-v, T-s and p-h diagrams), Understanding of Steam Table and Mollier chart. Vapour Power cycle: Carnot cycle and its limitations as a vapour cycle, Rankine cycle with different turbine inlet conditions, mean temperature of heat addition, Methods to improve thermal efficiency of Rankine cycle – Reheat cycle and Regeneration Cycle.

Unit-V 06 Hrs.

Gas Power Cycles

Assumptions of Air Standard Cycle, Analysis of Otto cycle, Diesel Cycle and Dual cycle (Numericals included).

Psychometrics of Air-Conditioning Processes

Need for air conditioning, Principle of psychrometry, Basic Psychometric properties, Need of psychometric chart and plotting basic psychometric properties on psychometric chart.

Books Recommended**Textbooks**

- 1 P K Nag, Thermodynamics, Tata McGraw Hill Publishers.
- 2 Onkar Singh, Thermodynamics, New Age International.
- 3 P Chattopadhyay, Engineering Thermodynamics, Oxford University Press India.

Reference Books

- 1 Yunus A. Cengel and Michael A. Boles, Thermodynamics: An Engineering Approach, 7th edition, TMH.
- 2 Michael J. Moran and Howard N. Shapiro, Fundamentals of Engineering Thermodynamics, Wiley Publications.
- 3 Claus Borgnakke and Richard E. Sonntag, Fundamentals of Thermodynamics, Wiley Publications.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Engineering Materials (RCP23MPC203)		
Engineering Materials Laboratory (RCP23MPC203L)		

Prerequisites:

1. Knowledge of Basic crystal structures and properties

Course Objectives:

1. To impart knowledge on materials selection based on properties and application requirements, crystal defects, mechanical behavior of materials subjected to different loads and basic characterization methods.
2. To understand alloy phase diagrams and their application, iron-iron carbide phase diagram, exposure to microstructural development in ferrous materials, heat treatment processes and their effect on structure and properties of materials.
3. To know the effect of alloying elements in ferrous materials.
4. To learn nonferrous and nonmetallic materials.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Interpret the structure–property relationships, crystal imperfections and microstructural features of engineering materials.	L3	Apply
CO2	Analyze material failure modes and detect defects using non-destructive testing techniques.	L4	Analyze
CO3	Interpret phase diagrams, describe iron-iron carbide system and understand the microstructural development and property changes in steels and cast irons.	L3	Apply
CO4	Interpret heat treatment processes and hardenability behavior of steels using TTT/CCT diagrams and Jominy test data.	L3	Apply
CO5	Explain the influence of alloying elements on the structure, properties and applications of alloy steels.	L2	Understand
CO6	Classify non-ferrous and non-metallic materials based on properties and engineering applications.	L2	Understand

Engineering Materials (RCP23MPC203)

Course Contents

Unit-I 06 Hrs.

Introduction to Engineering Materials and Basic Characterization Techniques

Engineering Materials: Brief history, Classification of solid engineering materials, structure-property correlations, defects in crystals.

Deformation in Crystalline Material: Elastic and Plastic deformation, deformation by slip and twin, slip systems, critical resolved shear stress, strain hardening effect, frank reed source, recovery, recrystallization and grain growth.

Principle, construction, operation and applications of light microscopy and electron microscopy.

Unit-II 04 Hrs.

Materials Failure

Modes of Failure: failure by plastic deformation, ductile fracture, brittle fracture.

Ductile to brittle transition temperature (DBTT).

Fatigue Failure: Definition, Examples, Types of fluctuating stresses, fatigue test, S-N Curve, Macro and microstructural aspects of fatigue, prevention of fatigue, concept of thermal and corrosion fatigue.

Creep Failure: Definition, Examples, Creep test, Creep Curve, Effect of stress and temperature on creep behavior of material, and Creep resistant materials.

Unit-III 05 Hrs.

Solidification and Alloy Phase Diagrams

Solidification: Nucleation and growth of crystals, formation of solid solutions, Hume Rothery rule.

Basics of phase diagram: Construction of unary, binary, ternary and isomorphous phase diagrams, Gibb's phase rule, Tie line and lever rule, Invariant Reactions.

Study of Polymorphism in Pure iron and Iron – Iron carbide phase diagram: Construction, important phases, composition, temperature and phase transformation.

Slow cooling behavior of hypoeutectoid steel, hypereutectoid steel and cast iron.

Types of cast irons and their industrial applications.

Unit-IV 05 Hrs.

Heat Treatment in Steels

Purpose of Heat treatment, Heat treatment cycle, Microstructures and Properties associated with Annealing, Normalizing, Quenching, and Tempering, Martempering, and Maraging Heat treatment process.

Construction, interpretation and application of TTT and CCT diagrams.

Hardenability and Jominy End Quench test.

Surface/Case Hardening Methods: Carburizing, Nitriding, Carbonitriding and Cyaniding.

Unit-V

04 Hrs.

Alloying Elements and Alloy Steels

Common alloying elements in steels and their effect on structure and properties of steel.

Ferrite & Austenite Stabilizers, Strong Carbide forming elements.

Effect of alloying elements on Iron-Iron carbide diagram, TTT & CCT diagram and Hardenability of steel.

Stainless steel and HSS: Composition, Types, Properties and Applications.

Unit-VI

06 Hrs.

Study of Nonferrous and Nonmetallic materials

Classification, Properties and Industrial Applications of light metals and alloys (alloys of Al, Cu, Ti, etc.), Ceramics, Polymers and Composites.

Engineering Materials Laboratory (RCP23MPC203L)

Suggested Experiments

A Any 8 experiments:

- 1 Study and Demonstration of Light/Optical/Metallurgical Microscope.
- 2 Metallographic sample preparation.
- 3 To study the microstructures of plain carbon steels and cast irons.
- 4 To study the microstructures of nonferrous materials.
- 5 To study the heat treatment of steel (Annealing, Normalizing, Quenching) and to investigate the variation in hardness and microstructure of heat treated specimens.
- 6 To study the tempering characteristic of hardened steel.
- 7 To determine the hardenability of steel by Jominy End Quench Test.
- 8 Fatigue Test.
- 9 To perform any two non-destructive testing methods (Magnetic particles inspection, Dye penetrant test, Ultrasonic testing).

B Assignments/ Mini project/ case study/ literature based seminar /presentation

Assignments/Mini project/case study/literature based seminar/presentation relevant to the subject may be included.

Minimum 8 experiments from the above-suggested list or any other experiments based on syllabus will be included, which would help the learner to apply the concept learnt.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Manufacturing Processes (RCP23MPC204)		

Prerequisites:

Nil

Course Objectives:

1. To impart knowledge of manufacturing processes such as casting, forging, rolling, and metal cutting.
2. To familiarize students with unconventional machine tools and machining processes.
3. To train students in machining various operations on CNC to enhance their practical skills.
4. To educate students about ethical, environmental, and safety standards.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain various metal casting and metal joining processes, analyze defects, their probable causes and remedial measures.	L4	Analyze
CO2	Explain various metal forming processes, analyze defects, their probable causes, and remedial measures.	L4	Analyze
CO3	Explain types of machine tools, illustrate machine tool capabilities, and limitations of machining operations to generate cylindrical and planar components.	L3	Apply
CO4	Apply the working principles and applications of CNC machines to execute various operations using canned cycles and subroutines.	L3	Apply
CO5	Determine operation planning sequences by analyzing part prints for estimating manufacturing time to meet manufacturing requirements.	L3	Apply

Manufacturing Processes (RCP23MPC204)

Course Contents

Unit-I 04 Hrs.

Introduction to Manufacturing Processes

Need and classification of manufacturing processes based on additive and subtractive processes, chip-less and chip-removal processes.

Metal Casting Process: Expendable and permanent mould casting processes – sand casting, investment casting, shell moulding, die casting, centrifugal casting, vacuum casting, casting defects and their remedies.

Unit-II 07 Hrs.

Rolling, Forging, Extrusion and Sheet Metal Operations

Rolling: Principles and process characteristics, rolling types, rolling parameters, thread rolling, production of seamless tubes through rolling, defects, and remedies in the rolling process.

Forging: Basic operations, types of forging, forging hammers/presses, forging stages, forging applications, defects, and remedies in the forging process.

Extrusion: Equipment and principles, types of extrusion (direct, indirect, impact, continuous, hydrostatic, tube extrusion), metal flow in extrusion, defects and remedies in extrusion, wire drawing process.

Sheet Metal Operations: Theory in press working, different elements of a press tool, press working operations.

Unit-III 05 Hrs.

Metal Cutting and Joining Processes

Metal Cutting Process: Merchant theory of metal cutting, machine tools required to generate cylindrical and planar components, finishing and super finishing processes, thread cutting, and gear cutting.

Metal Joining Processes: Classification of welding (fusion welding, solid-state welding), soldering, brazing processes, welding defects, inspection and testing of welds, safety in welding.

Unit-IV 07 Hrs.

CNC Basics, Tooling and Programming

CNC Basics: DNC, motion controller, interpolation, adaptive control system, spindle drive, axis drive, actuation and feedback devices, ATC, APC, tool pre-setter, touch probe system.

CNC Tooling and Programming: CNC turning and milling tools, types of controllers, tool nose radius and length compensation, canned cycle, looping, jumping, subprogram, turning and vertical machining centre programming.

Unit-V 03 Hrs.

Manufacturability Assessment of Given Product Design

Classifying operations: Basic process operation, principal process, and auxiliary process.

Preliminary part print analysis.

Process planning for a given component.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Economics and Financial Management (RCP23XHS234)		

Prerequisites:

1. Knowledge of current affairs in the Economics and Finance domain

Course Objectives:

1. To describe the relationships among variables to analyze economic issues.
2. To explain the function of the market and prices as an allocative mechanism.
3. To identify key macroeconomic indicators and measures of economic change, growth, and development.
4. To understand basic concepts of financial management and their application in investment and financing decisions.
5. To explore the relationship between financial management and financial statements.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Analyze individual decision making, how prices and quantities are determined in product and factor markets, microeconomic and macroeconomic outcomes.	L4	Analyze
CO2	Analyze the performance and functioning of government, RBI, markets, and institutions in the context of social and economic problems.	L4	Analyze
CO3	Analyze the current economic status of India at global levels and provision in budget to address economic issues at national level.	L4	Analyze
CO4	Describe an understanding of the overall role and importance of the finance function.	L2	Understand
CO5	Analyze financial performance and make appropriate inferences.	L4	Analyze

Economics and Financial Management (RCP23XHS234)

Course Contents

Unit-I **06 Hrs.**

Introduction to Economics

Fundamentals of Economics: Definition and scope, the nature of the economic problem, finite resources and unlimited wants, factors of production and their rewards, opportunity cost, and its influence on decision making.

Microeconomics and Macroeconomics:

The role of markets in allocating resources, the market system, introduction to the price mechanism, demand, supply, and price determination. Price elasticity of demand and supply (PED).

Unit-II **04 Hrs.**

Role of Government and RBI

Money, banking, households, firms, economies and diseconomies of scale, market structure, fiscal policy, monetary policy, economic growth, causes and consequences of recession, causes of economic growth, measurement of economic growth, inflation, deflation, living standards, and indicators of living standards.

Unit-III **04 Hrs.**

Government Policies

Last 20 years Journey of Indian Economy, Measures taken to grow Indian Economy, Meaning of India is the world's fifth-largest economy by nominal GDP and the third-largest by purchasing power parity (PPP), On a per capita income basis, India ranked 139th by GDP (nominal) and 127th by GDP (PPP) (Data reference year 2023), Comparison of top 5 largest economies in world, Discuss key points of India latest union budget and its impact on Indian economy and citizens, Meaning of Initiatives like Make in India, Digital India, Skill India etc. and expected impact on Indian Economy.

Unit-IV **04 Hrs.**

Overview of Financial Management

Fundamentals of financial management, principles and functions of the financial management, Strategy, methods, and techniques of the financial management, Overview of financial instruments, financial markets, financial Institutions.

Unit-V **08 Hrs.**

Overview of Financial Statements

Balance Sheet, Profit and Loss Account, and Cash Flow Statement; Purpose of Financial Ratio Analysis; Liquidity Ratios; Efficiency or Activity Ratios; Profitability Ratios; Capital Structure Ratios; Stock Market Ratios.

Books Recommended

Textbooks

- 1 Gaurav Datt & Biswajit Nag, Datt & Sundharam's Indian Economy, 73rd Edition, 2024, S. Chand Publications.
- 2 Prasanna Chandra, Fundamentals of Financial Management, 7th Edition, 2020, McGraw Hill Publications.

Reference Books

- 1 Burkhard Heer, Public Economics: The Macroeconomic Perspective, 2019, Springer International Publications.
- 2 Raj Kumar Sen, Indian Economy: Economic Ideas, Development, and Financial Reforms, 2008, Deep & Deep Publications.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Product Lifecycle Management (RCP23XOE211)		

Prerequisites:

Nil

Course Objectives:

1. To familiarize the students with the need, benefits and components of PLM.
2. To acquaint students with Product Data Management & PLM strategies.
3. To give insights into new product development program and guidelines for designing and developing a product.
4. To familiarize the students with Virtual Product Development.
5. To acquaint students with the need of Environmental aspects in PLM & its implementation.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Describe the phases of PLM, PLM strategies and methodology for PLM feasibility study and PDM implementation.	L2	Understand
CO2	Demonstrate various approaches and techniques for designing and developing products.	L3	Apply
CO3	Demonstrate knowledge in applying virtual product development tools.	L3	Apply
CO4	Demonstrate knowledge in implementation of Environmental aspects in PLM.	L3	Apply

Product Lifecycle Management (RCP23XOE211)

Course Contents

Unit-I

07 Hrs.

Introduction to Product Lifecycle Management (PLM)

Product Lifecycle management (PLM), Need for PLM, Product Lifecycle Phases, Opportunities of Globalization, Pre-PLM Environment, PLM Paradigm, Importance & Benefits of PLM, Widespread Impact of PLM, Focus and Application, A PLM Project, Starting the PLM Initiative, PLM Applications.

PLM Strategies: Industrial strategies, Strategy elements, its identification, selection and implementation, Developing PLM Vision and PLM Strategy, Change management for PLM

Unit-II

07 Hrs.

Product Design and Development

Product Design and Development Process, Engineering Design, Organization and Decomposition in Product Design, Typologies of Design Process Models, Reference Model, Product Design in the Context of the Product Development Process, Relation with the Development Process Planning Phase, Relation with the Post design Planning Phase.

Unit-III

10 Hrs.

Methodological Evolution of Product Design

Methodological Evolution of Product Design

Concurrent Engineering, Characteristic Features of Concurrent Engineering, Concurrent Engineering, Life Cycle Approach, Characteristic Features of Life Cycle Approach.

The Design for X System, Objective Properties and Design for X Tools, Choice of Design for X Tools and Their Use in the Design Process.

New Product Development (NPD) and Strategies, Product Configuration and Variant Management. Integration of Environmental Aspects in Product Design:

Sustainable Development Design for Environment, Need for Life Cycle Environmental Strategies, Useful Life Extension Strategies, End-of-Life Strategies, Introduction of Environmental Strategies into the Design Process, Life Cycle Environmental Strategies and Considerations for Product Design, Tools and techniques for integrated design, Implementation of international standards.

Unit-IV

07 Hrs.

Product Data Management (PDM)

Product Data Management (PDM):

Product and Product Data, PDM systems and importance, Components of PDM, Reason for implementing a PDM system, financial justification of PDM, barriers to PDM implementation.

Virtual Product Development Tools:

For components, machines, and manufacturing plants, 3D CAD systems and realistic rendering techniques, Digital mock-up, Model building, Model analysis, Modelling and simulations in Product Design, Examples/Case studies.

Engineering Product Design & Evaluation Methods

Engineering Methods for Product Design & Evaluation:

Durability of Products and Components, Design for Fatigue, Infinite Life Approach, Design for Finite Life.

Product Recovery Planning & Analysis:

Approach to the Recovery Problem, Method for Recovery Cycles Planning, Calculation Models for Recovery Cycles Planning, Basic procedure, Determinant Factors for Recovery, Effective Component Reusability, Recovery Fractions, Extension of Useful Life.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Management Information System (RCP23XOE212)		

Prerequisites:

Nil

Course Objectives:

1. The course is a blend of management and technical fields.
2. Discuss the roles played by information technology in today's business and define various technology architectures on which information systems are built.
3. Define and analyze typical functional information systems and identify how they meet the needs of the firm to deliver efficiency and competitive advantage.
4. Identify the basic steps in systems development.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain the fundamental concepts of the management information systems used in business.	L2	Understand
CO2	Describe IT infrastructure and its components and its current trends.	L2	Understand
CO3	Use the tools and technologies for accessing information from databases to improve business performance and decision making.	L3	Apply
CO4	Identify and explain the security and ethical challenges in MIS along with the measures to be taken.	L2	Understand
CO5	Select a suitable social computing platform for the given requirements that integrates AI and IoT.	L3	Apply
CO6	Explain the processes involved in the information system within the organization includes information acquisition and enterprise and global management technologies.	L2	Understand

Management Information System (RCP23XOE212)

Course Contents

Unit-I

04 Hrs.

Foundation Concepts

- Definition and scope of Management Information Systems (MIS) in business
- Functional area information system
- The components of information systems
- Impact of IT on organizations and society
- Business Process : BPR and BPI
- Business Pressure, Organizational responses
- Competitive Advantage and Strategic IS's

Unit-II

05 Hrs.

Information Technology Infrastructure

- Overview of IT infrastructure
- Hardware and software
- Computer systems: End user and enterprise
- Computing computer peripherals: Input, output, and storage technologies
- Application software: End user applications
- System software: Computer system management
- Data resource management: Technical foundations of database management, Managing data resources, Big data, Data warehouse and data marts, Knowledge management
- Networks: The networked enterprise (wired and wireless), Pervasive computing, Cloud computing models

Unit-III

10 Hrs.

MIS Tools and Applications for Decision Making

- ERP and ERP support of business
- Business intelligence (BI): Managers and Decision Making
- Decision Support System (DSS): types, components, Data mining
- Executive information system
- Role of AI in decision making
- Role of predictive analytics and data visualization in business

Unit-IV

08 Hrs.

Security and Ethical Challenges

- Information security fundamentals
- Key principles of information security
- Common threats and vulnerabilities in MIS
- Security measures and controls
- Access control mechanisms: authentication, authorization, and accounting (AAA)
- Encryption techniques and cryptographic protocols
- Ethical, and societal challenges of IT
- Legal and regulatory framework
- Privacy Policies

Unit-V

06 Hrs.

Social Computing (SC)

- Web 2.0 and 3.0: static and dynamic platform, integration with AI and IoT
- SC in business-shopping: leveraging social media platforms, Social listening and sentiment analysis
- Social computing in Customer Relationship Management (CRM)
- Marketing, operational and analytic CRM
- E-business and E-commerce – B2B B2C, E-commerce platforms and payment gateways
- Mobile commerce: growth trends, mobile wallets, contactless payments, shopping apps and platforms

Unit-VI

06 Hrs.

Information System within Organization

- Acquiring Information Systems and Applications: Various System development life cycle models
- Enterprise and Global Management of Information Technology: Managing Information Technology, Managing Global IT
- Business processes and information systems

Books Recommended

Textbooks

- 1 A. K. Gupta, “Management Information System”, S. Chand Limited, 2010.
- 2 K. K. Ghosh, Saini Das, and S. Mukherjee, “Management Information System”, Management, IIT, Kharagpur, 2021.

Reference Books

- 1 J. A. O'Brien, G. Marakas, “Management Information Systems”, McGraw-Hill Companies, Incorporated, 2006.
- 2 K. Rainer, B. Prince, “Management Information Systems”, Wiley, 2016.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Operations Research (RCP23XOE213)		

Prerequisites:

1. Knowledge of Mathematics.
2. Probability.

Course Objectives:

1. Formulate a real-world problem as a linear programming problem and be able to solve it.
2. Understand the optimisation tools that are needed to solve linear programming problems.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Analyze real-world optimization problems by formulating them as Linear Programming Problems (LPP) and interpreting optimal solutions using the Simplex Method or other suitable algorithms.	L4	Analyze
CO2	Solve Linear Programming Problems using transportation and assignment models.	L3	Apply
CO3	Apply Decision Theory to determine the optimal course of action among available alternatives under conditions of certainty, risk, and uncertainty.	L3	Apply
CO4	Apply Game Theory for decision-making in conflicting situations involving one or more opponents (players).	L3	Apply
CO5	Analyze and solve complex problems by breaking them into smaller subproblems using Dynamic Programming models through recursive or iterative approaches.	L4	Analyze

Operations Research (RCP23XOE213)

Course Contents

Unit-I 12 Hrs.

Introduction to Operations Research and LPP

Introduction to Operations Research

Introduction, Structure of the Mathematical Model, Limitations of Operations Research.

Linear Programming:

Introduction, Linear Programming Problem, Requirements of LPP, Mathematical Formulation of LPP, Graphical method, Simplex Method, Penalty Cost Method or Big M-method, Two Phase Method.

Unit-II 08 Hrs.

Transportation and Assignment Problem

Transportation Problem:

Formulation, solution, unbalanced Transportation problem. Finding basic feasible solutions – North-west corner rule, least cost method and Vogel's approximation method. Optimality test: MODI method.

Assignment Problem:

Introduction, Mathematical Formulation of the Problem, Hungarian Method Algorithm, Processing of n Jobs Through Two Machines and m Machines, Graphical Method of Two Jobs m Machines Problem Routing Problem.

Unit-III 06 Hrs.

Decision Theory

Steps in Decision Theory approach, Decision-making Environment, Decision making under condition of certainty, Decision making under condition of uncertainty, Decision making under condition of risk, Maximum likelihood criterion.

Unit-IV 06 Hrs.

Game Theory

Competitive games, rectangular game, saddle point, minimax/maximin method of optimal strategies, value of the game. Solution of games with saddle points, dominance principle. Rectangular games without saddle point – mixed strategy for 2 X 2 games.

Unit-V 07 Hrs.

Dynamic Programming

Characteristics of dynamic programming. Dynamic programming approach for Priority Management employment smoothening, capital budgeting, Stagecoach/Shortest Path, cargo loading and Reliability problems.

Books Recommended

Textbooks

- 1 Operations Research - An Introduction: Taha, H. A., Pearson Education, 2022.
- 2 Operations Research: Gupta, P. K. and Hira, D. S., S. Chand Publications, 2014.

Reference Books

- 1 Operations Research: Introduction to Models and Methods, Boucherie, R. J., Tijms, H. and Braaksma, A., 2021.
- 2 Introduction to Operations Research: Hiller, F. S. and Lieberman, G. J., McGraw-Hill Higher Education, 2010.
- 3 Operations Research: Principles and Practice: Ravindran, A., Phillips, D. T. and Solberg, J. J., Wiley India Pvt. Limited, 2009.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Personal Finance Management (RCP23XOE214)		

Prerequisites:

Nil

Course Objectives:

1. To create awareness and educate consumers on access to financial services.
2. To make the students understand the basic concepts, definitions, and terms related to direct taxation.
3. To help the students compute the Goods and Service Tax (GST) payable by a supplier after considering the eligible input tax credit.
4. To familiarize the students with microfinance for accelerating the expansion of local microbusinesses.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain the Indian financial system.	L2	Understand
CO2	Apply a financial planning framework to illustrate the role of finances in personal life.	L3	Apply
CO3	Calculate income from salaries, house property, business/profession, capital gains, and input tax credit sources.	L3	Apply
CO4	Calculate the amount of CGST, SGST, and IGST payable after considering eligible input tax credit.	L3	Apply
CO5	Explain how microfinance contributes to financial inclusion.	L2	Understand

Personal Finance Management (RCP23XOE214)

Course Contents

Unit-I 07 Hrs.

Indian Financial System and Personal Finance

Overview of Indian Financial System:

Characteristics, Components and Functions of Financial System. Financial Instruments and Financial Markets, Financial inclusion.

Introduction to Personal Finance:

Personal Financial Planning in Action, Money Management Skills, Taxes in Your Financial Plan, Savings and Payment Services. Consumer Credit: Advantages, Disadvantages, Sources and Costs.

Unit-II 07 Hrs.

Personal Financial Management

Loans:

Home, Car, Education, Personal, Loan against property, and Jewel loan.

Insurance:

Types of Insurance – ULIP and Term; Health and Disability Income Insurance, Life Insurance.

Investment:

Investing Basics and Evaluating Bonds, Investing in Stocks and Mutual Funds, Planning.

Unit-III 09 Hrs.

Income Tax

Income Tax Act Basics-

Introduction to Income Tax Act, 1961

Heads of Income and Computation of Total Income and Tax Liability-

Heads of Income and Computation of Total Income under various heads, Clubbing Provisions, Set off and carry forward of Losses, Deductions, Assessment of Income and tax liability of different persons.

Tax Management, Administrative Procedures and ICDS -

TDS, TCS and Advance Tax Administrative Procedures, ICDS.

Unit-IV 08 Hrs.

Goods and Services Tax

GST Constitutional framework of Indirect Taxes before GST (Taxation Powers of Union & State Government); Concept of VAT: Meaning, Variants and Methods; Major Defects in the structure of Indirect Taxes prior to GST; Rationale for GST; Structure of GST (SGST, CGST, UTGST & IGST); GST Council, GST Network, State Compensation Mechanism, Registration.

Levy and Collection of GST

Taxable event- "Supply" of Goods and Services; Place of Supply: Within state, Interstate, Import and Export; Time of supply: Valuation for GST- Valuation rules, taxability of reimbursement of expenses;

Exemption from GST: Small supplies and Composition Scheme: Classification of Goods and Services.

Introduction to Microfinance

Introduction to Micro – finance

Micro-Finance:

Definitions, Scope & Assumptions, Types of Microfinances, Customers of Micro-finance, Credit Delivery Methodologies, SHG concept, origin, Formation & Operation of Self-Help Groups (SHGs).

Models in Microfinance -

Joint Liability Groups (JLG), SHG Bank Linkage Model and GRAMEEN Model: Achievements & Challenges.

Institutional Mechanism

Current Challenges for Microfinance, Microfinance Institutions (MFIs): Constraints & Governance Issues, Institutional Structure of Microfinance in India: NGO-MFIs, NBFC-MFIs, Co-operatives, Banks, Microfinance Networks and Associations; Demand & Supply of Microfinance Services in India, Impact assessment and social assessments of MFIs.

Books Recommended**Textbooks**

- 1 Banking and Financial Sector Reforms in India, by Asha Singh, M.S. Gupta, Serials Publication.
- 2 Indian Banking Sector: Essays and Issues (1st), by M.S. Gupta & J.B. Singh, Serials Publication.
- 3 Basics Of Banking & Finance, by K.M. Bhattacharya O.P. Agarwal, Himalaya Publishing House.
- 4 Agricultural Finance and Management, by S. Subba Reddy, P. Raghu Ram.
- 5 The Indian Financial System and Development, by Dr. Vasant Desai, Himalaya Publishing House; Fourth Edition.
- 6 Income Tax Management, Simple Way of Tax Management, Tax Planning and Tax Saving, By Sanjay Kumar Satapathy.
- 7 Direct Tax System Income Tax by Dr. R. K. Jain, SBPD Publications.
- 8 Simplified Approach to GST Goods and Services Tax, By S K Mishra, Educreation Publishing.
- 9 Introduction To Microfinance, By Todd A Watkins, World Scientific Publishing Company.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Public Systems and Policies (RCP23XOE215)		

Prerequisites:

1. Basic Knowledge of Social Science and Current Affairs.

Course Objectives:

1. To explain public policy and its operations with special focus on policy relating to Government finance.
2. To analyze and evaluate the impact of public policy on firms and the economy at large.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain the importance of public systems in a fast-changing environment in the global context.	L2	Understand
CO2	Analyze the transformations in public systems with emphasis on current initiatives and emerging challenges in the field	L4	Analyze
CO3	Explain public policy and its operations with special focus on policy relating to Government finance.	L2	Understand
CO4	Analyze the impact of public policy on firms and the economy at large and work under various fields as policymakers.	L5	Evaluate
CO5	Apply analytical skills through Expenditure Policy in public services case studies.	L5	Evalute

Public Systems and Policies (RCP23XOE215)

Course Contents

Unit-I **10 Hrs.**

Introduction and Overview of Public Systems

Ideology of Public Systems; Mechanistic and Organic view of Society and Individuals, The Legal Framework; Federal Government; State and Local Governments, Government growth; The size of Government.

Unit-II **06 Hrs.**

Public Sector in the Economics Accounts

Public Sector in the circular flow; Public Sector in the National Income Accounts.

Unit-III **08 Hrs.**

Public Choice and Fiscal Politics

Direct Democracy; Representative Democracy; The Allocation Function; The Distribution Function; The Stabilization Function; Coordination of Budget Functions; The Leviathan Hypothesis.

Unit-IV **10 Hrs.**

Introduction and Overview of Public Policy

Markets and Government; Social goods and Market failure, public expenditure and its evaluation; Cost Benefit Analysis, Public policy and Externalities, Taxation Policy and its impact, Income distribution, redistribution and social security issues Fiscal & Budgetary Policy, Fiscal Federalism in India.

Unit-V **05 Hrs.**

Case Studies in Expenditure Policy: Public Services

- A National Defense
- B Highways
- C Outdoor Recreation
- D Education

Books Recommended

Reference Books

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Fundamentals of Biomedical Instruments (RCP23XOE216)		

Prerequisites:

1. Basic knowledge of Human Anatomy
2. Basic knowledge of Electronics

Course Objectives:

1. To understand the basic principles and working of various medical instruments.
2. To familiarize the learners with the various medical imaging modalities, their operating principles, instrumentation and clinical applications.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Describe and associate the different physiological processes taking place within the human body.	L2	Understand
CO2	Identify the use of biomaterials and apply principles of various transducers & sensors.	L3	Apply
CO3	Demonstrate the working principle of various medical instruments.	L3	Apply
CO4	Demonstrate principles used in imaging modalities and analysis.	L3	Apply
CO5	Describe different processes used in telemetry and telemedicine.	L2	Understand

Fundamentals of Biomedical Instruments (RCP23XOE216)

Course Contents

Unit-I

04 Hrs.

Basic Human Physiology

Cell:

Electrical activity of excitable cells (Structure and functions of cell. Polarization and depolarization of cell)

Cardiovascular System:

Heart, Conductive tissues of heart, Cardiac cycle, Heart Valves, System and Pulmonary Circulation, Transmission of Cardiac Impulse, Blood Pressure, ECG (Einthoven's Triangle, Various leads and Waveforms).

Muscle Physiology:

Muscle physiology and aspects of skin resistance. Generation of EMG

Nervous System:

Different parts, their functions. Reflex actions and reflex arc, Function of Sympathetic and Parasympathetic nervous system. Generation of EEG.

Unit-II

10 Hrs.

Biomaterial, Transducers and Sensors

Biomaterials used in fabrication of biodevices and implants:

Polymeric, Composite biomaterials, Metallic biomaterials, and Ceramic biomaterials.

Biopotential electrodes:

Electrode tissue interface, Electrode electrolyte interface Electrodes used for ECG, EEG & EMG.

Transducers & sensors:

temperature transducer, pulse sensor, glucose sensor, respiration sensor

Introduction of biomaterials, Classification of biomaterials.

Unit-III

08 Hrs.

Overview of Medical Instruments

Classification, application and specifications of diagnostic, therapeutic and clinical laboratory equipment

Method of operation of these Bio Medical Instruments

ECG, EEG, EMG.

Unit-IV

09 Hrs.

Imaging Modalities and Analysis

Radio graphic techniques, Computer Tomography

MRI, PET, SPECT

Ultrasonography

Endoscopy

Thermography, Retinal Imaging

Imaging application in Biometric systems

Analysis of digital images.

Telemetry and Telemedicine

Introduction to Biotelemetry

Physiological parameters compliant to biotelemetry

Components of Biotelemetry system

Applications of telemetry in medical field (ECG, EEG & EMG).

Books Recommended**Textbooks**

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
IPR and Patenting(RCP23XOE217)		

Prerequisites:

Nil

Course Objectives:

1. To promote the knowledge of intellectual property laws of India and international treaties.
2. To encourage innovation.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Classify the appropriate Intellectual Property Right (IPR) category for a given project or innovation.	L3	Apply
CO2	Differentiate the fundamentals of the patents, copyrights, and design registrations.	L2	Understand
CO3	Prepare applications for protecting various forms of intellectual property rights.	L6	Create
CO4	Examine effective communication with national and international IP organizations to pursue IP protection.	L4	Analyze

IPR and Patenting(RCP23XOE217)

Course Contents

Unit-I

03 Hrs.

Introduction to Intellectual Property Rights (IPR)

- Concept & meaning of IP and IPR.
- General principles of intellectual property rights.
- Need for intellectual property.
- Categories of IPR instruments - Patents, Trademarks, Copyrights, Industrial Designs, Plant variety protection, Trade secrets, Geographical Indications etc.
- Ownership, assignment, licenses, infringement, validity period.
- International treaties on IPR.

Unit-II

09 Hrs.

Copyright and Design

- The Indian Copyright Act, 1957.
- Meaning of copyrights and rights of copyrighted works.
- Types of copyright.
- Process of filing a copyright application.
- Introduction to Designs Law – Definitions.
- Registration of designs and procedure.

Unit-III

09 Hrs.

Basics of Patents

- The Indian Patent Act and The Indian Patent Rules.
- Conditions of patentability.
- Patentable and non-patentable inventions.
- Types of patent applications and patent specification.
- Inventors and Applicants.
- Category of applicants - natural person, small entity, startup and others.
- Patent databases and prior art search.
- International Patent Classification code.

Unit-IV

09 Hrs.

Patent Application Drafting

- Patent application drafting:
 - Application.
 - Specification.
 - Claims drafting:
 - * Independent and dependent claims drafting.
 - * Process patent and product patent claims.
 - Abstract.
 - Drawings.
 - Declaration as to inventorship.
 - Statement and undertaking.
- Drafting response to communications from patent office.
 - Reading and understanding examination reports.
 - Drafting response.

Unit-V

09 Hrs.

Procedure for Filing a Patent Application, Timelines and Fees

- Application for grant of patent.
- Forms and Fees.
- Request for (early) publication and/or (early) examination.
- Patent examination and hearing.
- Pre-grant and post-grant opposition.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Entrepreneurship and Startup Ecosystem (RCP23XOE218)		

Prerequisites:

Nil

Course Objectives:

1. To foster an entrepreneurial mindset.
2. To guide participants in building effective Business Models.
3. To educate participants regarding Intellectual Property and Fundraising for Innovative Ventures.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Apply strategies to effectively navigate the global startup landscape.	L3	Apply
CO2	Analyze situations to develop an entrepreneurial mindset.	L4	Analyze
CO3	Apply strategies to navigate the global startup landscape.	L3	Apply
CO4	Explain the significance of Intellectual Property rights.	L2	Understand
CO5	Apply appropriate fundraising strategies to match startup stages and investor profiles in practical scenarios.	L3	Apply

Entrepreneurship and Startup Ecosystem (RCP23XOE218)

Course Contents

Unit-I 06 Hrs.

Understanding the Entrepreneurial Ecosystem

- Introduction to Entrepreneurship and Startups.
- Role of Entrepreneurship in the economy.
- Global and Local Entrepreneurial Landscapes.
- Role of Incubators and Accelerators.
- Case Studies of Successful Startups.

Unit-II 08 Hrs.

Developing a Startup Mindset

- Cultivating an Entrepreneurial Mindset.
- Market Analysis and Segmentation.
- Opportunity Recognition.
- Innovation and Idea Generation.
- Feasibility Analysis of Business Ideas.
- Role of Innovation in Entrepreneurship.
- Fostering Creativity.
- Practical Exercises and Workshops on Creative Problem Solving.

Unit-III 10 Hrs.

Business Model Development

- Introduction to Business Models.
- Lean Startup Methodology.
- Prototyping and Minimum Viable Product (MVP).
- Financial Projections and Budgeting.
- Various Forms of Business Ownership.
- Compliance and Legal Regulations.
- Operations and Supply Chain Management.
- Human Resource Management.
- Developing a Marketing Strategy.
- Managing Growth Challenges.

Unit-IV

08 Hrs.

Technological Innovation and Intellectual Property

- Technology and Entrepreneurship.
- Intellectual Property Basics (Patents, Trademarks, Copyrights).
- Patent Search and Analysis.
- Strategies for Protecting Intellectual Property.
- Ethical Considerations in Technology and Innovation.

Unit-V

07 Hrs.

Fundraising and Investment Strategies

- Fundraising Options for Startups.
- Angel Investors and Venture Capital.
- Crowdfunding Platforms.
- Financial Modelling for Startups.
- Crafting an Effective Pitch.

Books Recommended

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Professional and Business Communication Tutorial (RCP23XHS233T)		

Prerequisites:

Nil

Course Objectives:

1. To inculcate a professional and ethical attitude in the workplace.
2. To enhance communication and interpersonal skills.
3. To develop effective employability skills.
4. To hone written skills for technical documentation.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's De- scription
CO1	Apply group discussion techniques in professional situations.	L3	Apply
CO2	Use employability skills to optimise career opportunities.	L3	Apply
CO3	Employ storytelling techniques for corporate presentations.	L3	Apply
CO4	Prepare technical documents using appropriate style, format, and language.	L6	Create
CO5	Analyze the concept of professional ethics.	L4	Analyze
CO6	Demonstrate interpersonal skills in professional and personal situations.	L3	Apply

Course Description:

The course is designed to equip students with essential skills crucial for navigating the contemporary job market successfully and fostering a positive work environment through effective communication and collaboration. The assignments comprise a combination of interactive activities, discussions, case studies, and real-world simulations to help students not only ace job interviews and professional interactions but also contribute positively to the ethical and productive functioning of any organization. For the project work, students must prepare and present a well-researched and persuasive business proposal in groups, integrating the skills and knowledge acquired throughout the course.

Professional and Business Communication Tutorial (RCP23XHS233T)

Description of Tutorial Activities

Unit-I

No of Assignment -01

Group Discussion

- Purpose of a GD, types of GD, criteria for evaluating GD, Dos and Don'ts of GD.
- **Activity:** Students will be divided into groups of 8-12 and each group will be given a topic/case to discuss within a given time frame. Each student will submit a write-up on their observations of the GD.

Unit-II

No of Assignments -02

Employment Skills

- **Resume Writing:** Types of resumes, structure, content, and formatting of resume.
- **Activity:** Students will prepare and submit their individual resume according to professional requirements.
- **Interview Skills:** Types and modes of interview, preparation for interview, Dos and Don'ts of interview, frequently asked questions during interview.
- **Activity:** Students will submit a write-up on the FAQs and participate in mock interviews.

Unit-III

0No of Assignments -01

Corporate Storytelling

- Elevator pitch, product stories, event stories, stories in presentations, storytelling in SOPs and interviews, storytelling to manage conflict or to motivate.
- **Activity:** Students will be divided into groups of 8-12 and asked to give a team presentation using storytelling techniques and submit the hardcopy of the PPT.

Unit-IV

No of Assignments -01

Technical Writing and Documentation

- Business Proposal Writing: Types of business proposals, format of proposal, language and style, presentation of proposal.
- Meeting Documentation: Planning layout of meetings, observing meeting decorum, drafting notice, agenda, and minutes of meeting.
- **Activity:** Students will be divided into groups of 8-12 and each group will conduct a mock meeting based on an agenda and submit a write-up of the meeting documentation.

Unit-V

No of Assignments -01

Professional Ethics

- Effective work habits, accountability, integrity, and excellence.
- **Activity:** Students will be divided into groups of 8-12 and each group will analyze a case involving an ethical issue and submit the write-up.

Unit-VI

No of Assignments -02

Interpersonal Skills

- Team Building: Difference between group and team, importance of teamwork, strategies to be a good team player.
- **Activity:** Students will be divided into groups of 8-12 and each group will be assigned a task to be accomplished as a team, for which they will submit the write-up.
- Leadership: Types of leadership, leadership styles, case studies.
- **Activity:** Each student will submit a write-up involving a leader they admire, analyzing various aspects of his leadership style.
- Time Management: Importance of time management, cultural views of time, 80/20 rule, time wasters, setting priorities and goals.
- **Activity:** Each student will submit a write-up about a case involving time management.

Batch-wise tutorial work of minimum eight assignments from the above suggested list or any other assignments based on the syllabus will be included, which would help the learner to apply the concepts learned.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Python for Mechanical Engineering Laboratory (RCP23MMD201L)		

Prerequisites:

1. Structured Programming using C

Course Objectives:

1. To understand the coding environment of Python Programming.
2. To apply Python coding skills to solve various Mechanical problems.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Understand the coding environment of Python software.	L2	Understand
CO2	Understand the basics of Python.	L2	Understand
CO3	Read, analyze, and visualize data using Python.	L4	Analyze
CO4	Apply Python skills to solve Mechanical problems.	L3	Apply

Python for Mechanical Engineering Laboratory (RCP23MMD201L)

Course Contents

Unit-I 02 Hrs.

Introduction to Python

Python history, Introduction to Anaconda, Spyder IDE, programming basics, understanding the layout of the programming environment and Spyder.

Unit-II 06 Hrs.

Basics of Python

Assignment Statement, Input/Output: print text & numbers using single print, print multiple lines. Variable and datatypes, Boolean data type and negative numbers, Type conversion. Operators: Arithmetic, Relational and Logical Operators, Precedence and Associativity. Strings: Introduction, String Indexing and Slicing. Loops: while, for, break / continue, nested Loops. User Input and Control Flow: if /else, combining conditions AND / OR. Lists, List Operations, Tuples, and Dictionaries. Arrays, Sorting, Functions. Code Debugging.

Unit-III 06 Hrs.

Introduction to OOP

Introduction to OOPs, Features of OOPs, Constructors, static members. Inheritance, Objects as Parameters & Aggregation, Polymorphism – Overloading, Method overriding. Interfaces & Abstract classes, Returning objects - Static, nested, and inner class, Upcasting & Dynamic method dispatch. Exception Handling - basic, Multiple catch, Nested try. Multithreading - yield Method, interrupting thread, priorities.

Unit-IV 04 Hrs.

Data Handling and Manipulation

Generics and File Handling: Reading and writing files. Introduction to Pandas, Dataframe and Numpy, Data Visualization, exploratory Data Analysis.

Unit-V 02 Hrs.

Exception Handling and Multithreading

Exception handling basics, Multiple catch clauses, Nested try statements, Multithreaded programming, Yield method and Interrupting a thread, Priorities/synchronisation.

Unit-VI 06 Hrs.

Using Python for Mechanical Applications

Applications in Design, Thermal analysis, and Manufacturing processes.

Python for Mechanical Engineering Laboratory (RCP23MMD201L)

Suggested Experiments

A Group A :

- 1 Insert text Between Outputs
- 2 Print Multiple outputs in a different lines
- 3 Print Multiple output in same line
- 4 Declare a variable
- 5 Create a boolean variable
- 6 Convert different types of variables
- 7 Use of Basic and Compound assignment operator
- 8 Use logical operations - AND OR NOT
- 9 Create String and use various operations - Concatenation, repetition, Integers, length, Lower and Upper case,
- 10 Output and Changing Characters from a String, String slicing, Changing character , Reverse Slicing
- 11 take user inputs
- 12 Convert input datatype
- 13 take Multiple string inputs/ integer inputs
- 14 use if & else statements
- 15 use Elif statement
- 16 execute while loop/for loop
- 17 use Break Statement / Continue Statement
- 18 use Nested Loops
- 19 use various list operations - append, insert, remove, pop
- 20 use function in python
- 21 Write a class
- 22 access and Modify Private Data Members - Using Getter and Setter
- 23 Define a class with attribute type and Printtype method
- 24 Pass objects as parameters to functions or methods
- 25 Use of Method Overloading

B Group B :

- 1 Program to calculate the discounted price of a product.
- 2 Program to calculate BMI Index.
- 3 Program to print the multiplication table of 7.
- 4 Program to calculate the sum of first n integers.
- 5 Program to print the factorial of a given number.
- 6 Program to manage visitors at a police station.
- 7 Program to perform mathematical operations on a sequence of 5 numbers entered by user.
- 8 Program to calculate area and perimeter.
- 9 Program to print numbers in descending order.
- 10 Program to perform numerical operations on a list.
- 11 Program to find second maximum and second minimum in a list.

- 12 Program to print numbers which are not multiples of 5.
- 13 Program to flip digits of a binary number.
- 14 Program to demonstrate the Fizz buzz game.
- 15 Program to draw a square in Turtle.
- 16 Program to draw letter E in Turtle.
- 17 Program to draw concentric circles in Turtle.
- 18 Program to draw a pentagon in Turtle.
- 19 Program to draw diagonally opposite squares in Turtle.
- 20 Program to demonstrate understanding of try/except.
- 21 Program to build a password generator.
- 22 Program to plot natural frequency/time period against static deflection.
- 23 Program to plot displacement, velocity and acceleration for a given spring-mass system as separate plots.
- 24 Program to plot displacement, velocity and acceleration for a given spring-mass system on a single plot.
- 25 Program to determine driving tensions of a belt drive.
- 26 Program to determine current in an electric circuit which comprises three closed loops.
- 27 Program to determine displacement, velocity and acceleration of a particle with known motion.

C A mini project (5 mark)

Minimum 25 Programs from the above suggested list or any other program based on the syllabus and 1 Mini Project will be included, which would help the learner to apply the concepts learnt.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Manufacturing Processes Laboratory (RCP23MSC201L)		

Prerequisites:

Nil

Course Objectives:

1. To impart knowledge of machine tools and basic machining processes such as turning, drilling, boring, broaching, milling, shaping, planning, slotting, and grinding.
2. To provide insight into different machine tools, accessories, and attachments.
3. To train students in machine operations to enhance their practical skills.
4. To inculcate team qualities and expose students to shop floor activities.
5. To educate students about ethical, environmental, and safety standards.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Demonstrate precautions and safety norms followed in the machine shop and exhibit interpersonal skills for teamwork.	L3	Apply
CO2	Use working drawings, understand operation symbols, select cutting parameters and tooling, and execute machining operations.	L3	Apply
CO3	Understand the construction, working, and operation of various conventional machine tools, and the accessories and attachments used.	L2	Understand
CO4	Perform and demonstrate a wide range of machining operations including turning, threading, shaping, keyway cutting, indexing, and gear cutting while estimating cutting times, and understand the significance of grinding and super finishing operations.	L3	Apply
CO5	Develop programs, demonstrate, simulate and operate CNC machines for various machining operations.	L6	Create

Manufacturing Processes Laboratory (RCP23MSC201L)

Suggested Experiments

- 1 One job involving plain turning, taper turning, step turning, thread cutting, facing, knurling, drilling, boring, internal thread cutting, and eccentric turning on a lathe machine. Exercises should include selection of cutting parameters and cutting time estimation.
- 2 One job involving cutting gear teeth or a hexagonal nut using a milling machine and cutting a V groove, dovetail, or rectangular groove using a shaper. Exercises should include selection of cutting parameters and cutting time estimation.
- 3 One group job using a cylindrical grinding machine. Exercises should include selection of cutting parameters and cutting time estimation.
- 4 One job involving programming, simulation, and fabrication of a component on a CNC turning center.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Semester Project I (RCP23XSC201P)		

Prerequisites:

—

Course Objectives:

1. Students are expected to design, simulate/implement a project based on the knowledge acquired from current semester subjects.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Analyze a survey of several available literature in the preferred field of study.	L4	Analyze
CO2	Describe various/alternate approaches to complete a project.	L2	Understand
CO3	Apply a collaborative project environment by interacting and dividing project work among team members.	L3	Apply
CO4	Use technical communication skills to present project work in the form of a technical report/paper.	L3	Apply
CO5	Apply teamwork and project management skills to plan, execute, and manage the research study.	L3	Apply

Semester Project I (RCP23XSC201P)

The purpose of introducing a semester project at the Second-year level is to provide exposure to students with a variety of projects based on the knowledge acquired from the semester subjects. This activity is supposed to enrich their academic experience and bring enough maturity to the student while selecting the project. Students should take this as an opportunity to develop skills in implementation, presentation, and discussion of technical ideas/topics. Proper attention shall be paid to the content of report, which is being submitted in partial fulfillment of the requirements of the Second-year, and it is imperative that a standard format be prescribed for the report.

Each student shall work on a project approved by the departmental committee approved by the Head of the Department. A group of 3 to 5 students (maximum allowed: 5 students in extraordinary cases, subject to the approval of the department committee and the Head of the department) shall be allotted for each Semester Project. Each group shall submit at least 3 topics for the Semester Project. The departmental committee shall finalize one topic for every group. The Semester Project Title or Theme should be based on the knowledge acquired during the semester. The project work shall involve sufficient work so that students get acquainted with different aspects of knowledge acquired from semester subjects.

Student is expected to:

- Select an appropriate project title based on acquired knowledge from current semester subjects.
- Maintain a Log Book of weekly work done (Log Book Format will be as per Table 1).
- Report weekly to the project guide along with the log book.

Table 1: Log Book Format

Sr	Week (Start Date:End Date)	Work Done	Sign of Guide	Sign of Coordinator
1				

Assessment Criteria:

- At the end of the semester, after confirmation by the project guide, each project group will submit a project completion report in the prescribed format for assessment to the departmental committee (including project guide).
- Assessment of the project (at the end of the semester) will be done by the departmental committee (including project guide).

Prescribed project report guidelines:

The Project Report (minimum of 25 pages) should include appropriate content for:

- Introduction
- Literature Survey,
- Related Theory
- Implementation details
- Project Outcomes, Conclusion
- References

Assessment criteria for the departmental committee (including project guide) for Continuous Assessment:

Guide will monitor weekly progress, and marks allocation will be as per Table 2.

Table 2: Continuous Assessment table

Sr	PRN	Name of Student	Student Attendance	Log Book Maintain	Literature Review	Depth of Understanding	Report	Total
			5	5	5	5	5	25

Assessment criteria for the departmental committee (including project guide) for End Semester Exam:

The departmental committee (including project guide) will evaluate the project as per Table 3.

Table 3: Evaluation Table

Sr	PRN	Name of Student	Project Selection	Design/ Simulation	model/ programming	Result Verification	Presentation	Total
			5	5	5	5	5	25

Each group shall present/publish a paper based on the semester project in reputed/peer-reviewed Conference/Journal/TechFest/Magazine before the end of the semester.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Community Engagement Service (RCP23XEL201L)		

Prerequisites:

1. Fundamentals of core branch
2. Communication Skills

Course Objectives:

1. To sensitize the student / learner to recognize community-level problems and challenges and engage in activities to solve them.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Implement knowledge understandings acquired from one's academic study/ field/ discipline for community level education, information dissemination by participation and engagement in community welfare activities.	L3	Apply
CO2	Appraise commitment to community engagement activities that reinforce a sense of belongingness and gratitude towards societal causes.	L5	Evaluate
CO3	Demonstrate diversity in communities and cultures by adopting a change in approach and attitude as evidence of unconditional acceptance.	L3	Apply
CO4	Assess the effectiveness of working in a team by demonstrating the co-existence of the roles of a sincere worker and an effective leader.	L3	Apply

Community Engagement Service (RCP23XEL201L)

Description of Activities

Unit-I

Open Activities

- Participation in: blood donation camps organizer / donor, day-long tree plantation or afforestation / seed dispersal / cleanliness (water bodies, surrounding etc.) drives.
- Literacy drives for children / youth / adults. One day hand holding activities in work-shop conduct for under privilege kids in the areas of – basic science, math, technical skill demonstration and building..

Unit-II

Technical (Program core related)

- Cyber-crime, security awareness and vulnerabilities – sensitization, information dissemination and awareness sessions in indicated focus areas.
- Promotion and Sensitization for Sustainable living – focusing on solar power, water recycling, e-waste responsible disposal, waste recycling etc. in indicated focus areas.
- Focus areas: residential societies, schools, under-privileged areas, governments /private offices, and similar other establishments.

OR

Unit-II

Field Survey

- Reporting on proactively conducted survey in the areas of resource management for – water, vegetables, electricity, crops etc.

OR

Activities to be performed

Among the listed activities students are expected to complete one open activity mandatorily, and one technical (program core) OR field survey activity. The activities mentioned are exemplary in nature and any other additional activity of similar nature too can be undertaken by the learners, provided it is approved and endorsed by the faculty mentor / head of the department.

Community Engagement Service (RCP23XEL201L)

Suggested Activities

- 1 Undertaking cyber safety / security awareness sensitization drive / program especially for un-initiated students / individuals in schools / colleges / residential complex / offices etc. Typical suggested tabulation.

Participant No.	Name	Age	School/ College/ Residence/ Office	Email	Contact Number	Awareness Level	Remarks

- 2 Energy / Power assessment for establishments (societies, schools, colleges, residential complex, shops etc.) involving computing power devices ratings, power consumption over operating period, calculating energy cost from tariff card / rates for every group of appliances / devices or equipment. Typical suggested tabulation pattern.

Device/ Appliance Group	Number of Appliances / Devices	Power Rating (kW)	Operating Hours (h/day)	Energy Consumption (kWh/day)	Tariff Rate (Rs. / kWh)	Energy Cost (Rs.)
Lighting Fixtures						
Ceiling Fans						
Air Conditioner						
Security Systems						
Water Pump						

- 3 Traffic light monitoring viz-e-viz average traffic density on road. Analysing the data and commenting on results. Evaluating and comparing impact on road repairs related lane blockage and proportional recommendation for lights timing variations. Typical suggested tabulation pattern.

Sr. No.	Timestamp	Traffic Density	Traffic Light Status	Road Repair Status	Remarks
1					
2					

- 4 Help compute green footprint of select number of household (per member) - say 10 houses of 3+ members. This is for evaluating dependence upon non green energy sources and habits and changes in lifestyle for attempts at their reductions. Learners are encouraged to use typically available online carbon-footprint calculators. The table herewith maybe used for reference calculations.

House No.	Household Name	Number of Members	Energy Usage (kWh)	Water Usage (liters)	Waste Production (kg)	Transportation Habits	Green Footprint
1							
2							

- 5 Compulsion of having a borewell for non-potable water supply in city residential complexes is a modern-day rule. Increased pace of re-development, as well as number of occupants in given area, has resulted in increased number of borewells being dug within and outside city limits. Reduced yield, quality and quantity of water adds to the recurring maintenance cost of borewells, especially in the city areas. Poor water recharge systems along-with depleting open soil cover area in wake of wall-to-wall of concrete carpet aggravate the problem. Study, analyse and report a residential society's – capacity of water requirement, present day borewells in action, approximate yield, maintenance cost and frequency, borewell flushing iterations in wake of re-development in neighborhood. A typical tabulation mechanism for inferences can be as below:

Borewell No.	Location	Depth (ft)	Yield (Liters/Day)	Water Quality	Maintenance Cost (Rs.)	Remarks
1						
2						

- 6 Detection of Adulteration in food / fruits / vegetables / milk / mava /saffron etc. or contamination of potable drinking water.

Ex. Adulteration in fruits could be apple waxing, injecting chemicals in watermelon, pomegranate etc. to give it a bright red color, artificial ripening of mangos etc.

For a given activity, samples from more than one area, specifically from mofussil /interiors / 'gaothans' etc, may be obtained, to evaluate sample purity or extent of adulteration. Learners are encouraged to use online resources provided by 'Food Safety and Standards Authority of India' (fssai), for handholding in requisite procedures.

YouTube link:

Food Safety and Standards Authority of India: [goo.gl/Y8Lzbu](https://www.youtube.com/watch?v=pbnmeRUBxKk)

Ex. 1 Milk Adulteration: <https://www.youtube.com/watch?v=pbnmeRUBxKk>

Ex.2 Watermelon Adulteration: <https://www.youtube.com/watch?v=yrLAj7oJies>

Product	Adulterant	Testing Method	Result	Remarks

Rubric for Open Ended Activity (10 marks)

- Participation certificate/proof

Rubric for Technical Activity (15 marks)

- Pre-requisite documents (permission letter, presentation material, permission letters, etc.) [5 marks]
- Participant Feedback [5 marks]
- Participant Attendance [5 marks]

OR

Rubric for Field Survey Activity (15 marks)

- Topic selection [3 marks]
- Survey preparation [3 marks]
- Field work [3 marks]
- Analysis [3 marks]
- Report writing [3 marks]

Certificates and Formats

Activity Endorsement Certificate

Date: _____

Community engagement service is a mandatory course, of two credits, introduced at second year of engineering under the autonomous structure of the institute.

Course Objective: To sensitise the student / learner into recognising social problems & challenges and give them an opportunity to engage in activities for solving the same.

Course Outcomes:

1. **Knowledge application:** Applies knowledge understandings acquired from one's academic study/ field/ discipline for community level education, information dissemination by participation and engagement in community welfare activities.
2. **Commitment for cause:** Identify and experience commitment for community engagement activities that reinforce sense of belongingness and gratitude towards societal cause.
3. **Diversity:** Witness diversity in communities and cultures and demonstrate change in approach / attitude as an evidence of unconditional acceptance.
4. **Team:** Recognise, experience and value effectiveness of working in a team, demonstrating co-existence of the roles - sincere worker and effective leader.

This is to certify that Mr./Ms. _____ bearing PRN _____ is a student of S.Y. B.Tech., _____ branch of engineering. He / She is a bonafide student of SES's R. C. Patel Institute of Technology, Shirpur. He / She is reliable, sincere, hardworking and capable of conducting _____ activity in your premises. We request you to kindly allow for the conduction of the activity and we also solicit your earnest co-operation in the same.

I, the undersigned _____ accept the following terms and conditions unconditionally:

1. I accept and understand that the community activity identification and selection has been done willingly by me.
2. I undertake to convey that I am apparently in good health and well-being, and suffer no physical impairment that would or should prevent my participation in the activity.
3. I undertake to bear all related expenses and risk of travel related to the activity and shall not hold any personnel from the institute responsible with regards to claims and/or loss in the process of conduct of activity.
4. I undertake that my parents or legal/local guardians are aware of said activity and agree to above mentioned terms and conditions.

Student's name & signature: _____

Parent or Guardian's name & signature: _____

Guidelines for Assessment of the work

- The review/progress monitoring committee shall be constituted by the Head of the Department. The progress of selected/assigned activities is to be evaluated on a continuous basis, holding at least one review in the semester.
- In the continuous assessment, focus shall also be on each individual student's contribution to the team activity, their understanding and involvement as well as responses to the questions being raised at all points in time.
- Each group needs to submit the following forms to the respective supervisor after conducting both activities:
 - Activity Conduction Report
 - Participant Feedback (online/offline)
 - Participant Attendance (online/offline)
 - Survey Report
 - Participation certification

Activity Conduction Report

Name of the Activity	
Date of Activity

Indicators	Scale: 1 (Lowest) to 5 (Highest)
The objectives of the training were clearly defined.	
The content was organized and easy to follow.	
This training experience will be useful to me.	
The trainer was knowledgeable about the training topics.	
The training objectives were met.	

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: III
Introduction to AI for Mechanical Engineers (RCP23MSC202)		

Prerequisites:

-

Course Objectives:

1. To understand the fundamentals of digital engineering and modern industrial technologies.
2. To explain basic concepts related to Artificial Intelligence (AI), Machine Learning (ML), and Industry 4.0.
3. To identify the role of digital technologies in mechanical engineering industries.
4. To develop awareness about smart manufacturing, robotics, automation, and intelligent systems.
5. To understand future engineering trends associated with AI-enabled industrial transformation.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain the concepts of digital engineering and intelligent industrial systems.	L2	Understand
CO2	Explain the fundamentals of AI, ML, IoT, and Industry 4.0 technologies.	L2	Understand
CO3	Identify applications of AI and automation in Mechanical Engineering industries.	L2	Understand
CO4	Interpret the role of smart technologies in manufacturing and maintenance systems.	L2	Understand
CO4	Explain future engineering technologies and their industrial relevance.	L2	Understand

Introduction to AI for Mechanical Engineers (RCP23MSC202)

Course Contents

Unit-I 01 Hrs.

Introduction to Digital Engineering and Industrial Evolution

- Introduction to engineering in the digital era;
- Evolution of industrial revolutions (Industry 1.0, 2.0, 3.0, 4.0, and 5.0);
- Digital transformation in engineering industries;
- Traditional industries versus smart industries;
- Emerging trends in modern industries.

Unit-II 02 Hrs.

Artificial Intelligence Fundamentals

- Introduction to Artificial Intelligence (AI);
- Types of AI;
- Introduction to intelligent systems;
- What is Machine Learning (ML);
- What is Deep Learning (DL);
- Difference between AI, ML, and DL.

Unit-III 02 Hrs.

Generative AI and Responsible Engineering

- Introduction to Generative AI;
- AI applications in industries;
- Benefits and limitations of AI systems;
- AI ethics and responsible engineering practices;
- Role of AI in engineering innovation.

Unit-IV 02 Hrs.

Engineering Data and Smart Sensing Systems

- Introduction to engineering data;
- Types of data;
- Importance of data in engineering decision-making;
- Introduction to sensors and transducers;
- Industrial data generation systems.

Unit-V

02 Hrs.

Internet of Things and Cyber-Physical Systems

- Basics of Internet of Things (IoT);
- Introduction to cyber-physical systems;
- Smart monitoring systems;
- Introduction to cloud computing in industries;
- Connected industrial ecosystems.

Unit-VI

02 Hrs.

Automation, Robotics, and Smart Manufacturing

- Introduction to automation;
- Types of industrial automation;
- Smart manufacturing systems;
- Introduction to industrial robots;
- Components of robotic systems;
- Collaborative robots (Cobots);
- Human-machine interaction systems.

Unit-VII

02 Hrs.

Connected Manufacturing and Industrial Intelligence

- Automated material handling systems;
- Introduction to Computer Integrated Manufacturing (CIM);
- Smart factories and connected manufacturing;
- Introduction to predictive maintenance;
- Industrial intelligence and decision support systems.

Unit-VIII

01 Hrs.

Future Technologies and Sustainable Engineering Systems

- Introduction to digital twins;
- Introduction to autonomous systems;
- Basics of smart mobility systems;
- AI-enabled electric and hydrogen vehicles;
- Sustainable manufacturing concepts;
- Green and intelligent industries;
- Introduction to smart cities;
- Human-centric engineering systems;
- Future trends in mechanical engineering;
- Industry 5.0 and sustainable industrial transformation

Syllabus Details of Semester- IV

Second Year B.Tech in Mechanical Engineering

(RCP23 NEP Scheme) with effect from Year 2026-27
(Revision 02)

Shahada Road, Near Nimzari Naka, Shirpur, Maharashtra 425405 Ph: 02563 259 802,

Web: www.rcpit.ac.in/mechanical-engineering-syllabus

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Numerical and Statistical Techniques (RCP23MPC251)		
Numerical and Statistical Techniques Laboratory (RCP23MPC251L)		

Prerequisites:

1. Basics of Probability.
2. Mathematics I and Mathematics II.
3. Mathematics for Mechanical Engineering.

Course Objectives:

1. To apply differential equations to solve the applications in the domain of design, thermal, fluid mechanics, structural, etc.
2. To interpret statistical measures for quantitative data.
3. To develop regression models and predict the system's behavior for the experimental and field failure data.
4. To apply the laws of probability and probability distributions for modeling and analyzing the data.
5. To understand uncertain occurrences in data in a logical manner.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's De- scription
CO1	Analyze the statistical data using the concepts of correlation and regression.	L4	Analyze
CO2	Applying numerical methods to solve partial differential equations.	L3	Apply
CO3	Apply the theoretical discrete and continuous probability distributions in the relevant application areas.	L3	Apply
CO4	Analyze data using different hypothesis tests to make conclusions about acceptance and rejections of sample data.	L4	Analyze
CO5	Analyze research data using Chi-Square and ANOVA techniques to determine statistical significance and variance between variables in real-world context.	L4	Analyze

Numerical and Statistical Techniques (RCP23MPC251)

Course Contents

Unit-I

07 Hrs.

Regression Analysis and Partial Differential Equations [PDE]

Regression Analysis:

Statistical diagram: scattered diagram. Correlation: Karl Pearson's Coefficient of correlation and its mathematical properties, Spearman's Rank correlation and its interpretations. The measure of association between two variables. Linear Regression.

Partial Differential Equations [PDE]:

Bender-Schmidt Method and Crank- Nicolson method.

Unit-II

09 Hrs.

Probability

Probability:

Discrete and Continuous random variables, Probability mass and density function, Probability distribution for random variables, Expected value, and Variance.

Probability distributions:

Discrete – Binomial, Poisson. Continuous - Normal.

Unit-III

07 Hrs.

Test of Hypotheses and significance for large , small samples

Test of Hypotheses:

Sampling distribution: Test of Hypothesis. Level of significance, critical region. One-tailed and two-tailed tests. Interval Estimation of population parameters. Large and small samples.

Test of significance for large samples:

Test for significance of the difference between samples mean and population means, Test for significance of the difference between the means of two samples.

Test of significance of small samples:

Student's t-distribution and its properties, Test for significance of the difference between samples mean and population means, Test for significance of the difference between the means of two Samples, paired t-test.

Unit-IV

05 Hrs.

Chi Square Distribution and Analysis of Variance

Chi Square Distribution:

Chi-square test, Test for the Goodness of fit, Association of attributes.

Analysis of Variance (F-Test):

One-Way classification, Two-way classification (short-cut method).

Numerical and Statistical Techniques Laboratory (RCP23MPC251L)

Suggested Experiments

A Any 8 experiments:

- 1 Develop a program to compute the correlation coefficient and analyse the relationship between two variables.
- 2 Generate a program to perform linear regression, determine the regression line equation, and analyse the fit.
- 3 Write a program to numerically solve PDEs using the explicit Bender-Schmidt method for heat conduction problems.
- 4 Develop a program to solve PDEs using the implicit Crank-Nicolson method for time-dependent problems.
- 5 Create a program to compute the expected value and variance for a given set of data or probability distribution.
- 6 Design a program to generate and analyse binomial or Poisson distributions for various parameters.
- 7 Write a program to generate and analyse normal distribution curves with specified mean and variance.
- 8 Write a program to perform a Z-test for large sample hypothesis testing and interpret the results.
- 9 Develop a program to conduct t-tests for comparing sample means under different conditions and draw conclusions.
- 10 Create a program to apply the chi-square test for goodness of fit or independence and analyse the findings.
- 11 Implement a program to carry out ANOVA for comparing multiple samples means and determine statistical significance.

Minimum 8 experiments from the above-suggested list or any other experiments based on syllabus will be included, which would help the learner to apply the concept learned.

Experiments should be performed using suitable software package/ programming language whenever required.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Mechanics of Materials (RCP23MPC252)		
Mechanics of Materials Laboratory (RCP23MPC252L)		

Prerequisites:

1. Basic knowledge of Engineering Mechanics.
2. Basic knowledge of types of loads, free body diagram and beams

Course Objectives:

1. To gain knowledge of different types of stresses, strains and deformations induced in the mechanical components due to external loads.
2. To study the distribution of various stresses in the mechanical elements that deform under loads.
3. To study the effect of component dimensions and properties of materials due to stresses and deformations.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Evaluate stresses, strains, deformation and properties of materials in mechanical components/ structures.	L5	Evaluate
CO2	Draw SFD and BMD for different types of loads and support conditions for a beam.	L3	Apply
CO3	Determine and plot direct, bending and shear stresses across sections of given beam.	L3	Apply
CO4	Determine torsional shear stresses and strain energy in mechanical components.	L3	Apply
CO5	Analyse deflections and slopes in beams and analyze buckling phenomenon in columns and struts.	L4	Analyze

Mechanics of Materials (RCP23MPC252)

Course Contents

Unit-I 10 Hrs.

Stress and Strain

Stress and Strain:

Definition, Simple stress-strain, uni-axial, bi-axial and tri-axial stresses, tensile stress, compressive stress and shear stresses, elastic limit, Hooke's law, deformation due to self-weight, bars of varying sections, composite sections, deformation of tapering members, Thermal Stresses. Theories of failures. Elastic Constants and their relations:

Poisson's ratio, Modulus of elasticity, Modulus of rigidity, Bulk modulus, yield stress, ultimate stress. Factor of safety, state of simple shear, relation between elastic constants, Volumetric strain for tri-axial loading.

Principal stresses and Strains:

Principal plane and principal stresses, analytical and graphical method (Mohr's circle) for determining of stresses on oblique section.

Unit-II 07 Hrs.

Shear Force and Bending Moment in Beams

Shear Force and Bending Moment in Beams:

Axial force, shear force and bending moment diagrams for statically determinate beams (excluding beams with internal hinges), relationship between rates of loading, shear force and bending moment.

Moment of Inertia:

Area Moment of Inertia, Parallel axis theorem, Polar moment of inertia, Principal axes, Principal moment of inertia.

Unit-III 08 Hrs.

Bending and shear stresses

Bending stresses:

Theory of pure Bending, Assumptions, Flexural formula for straight beams, moment of resistance, bending stress distribution, Section modulus, beams of uniform strength.

Direct & Bending Stresses:

Combined stresses, Eccentricity, Stress distribution, Core /kernel of Section.

Shear Stresses:

Distribution of shear stresses for the section of beam.

Unit-IV 08 Hrs.

Torsion and Strain Energy

Torsion:

Torsion of circular shafts-solid and hollow, stresses in shafts when transmitting power, shafts in series and parallel.

Strain Energy:

Resilience, Proof Resilience, strain energy stored in the member due to gradually applied load, suddenly applied load, impact load. Strain energy stored due to Shear, Bending and Torsion.

Deflection of Beams, Columns and Struts

Deflection of Beams:

Deflection of Cantilever, simply supported and over hanging beams using Macaulay's or double integration method for different type of loadings.

Columns and Struts:

Buckling load, crushing load, Types of end conditions for column, Euler's column theory and its limitations, Rankine- Gordon Formula.

Mechanics of Materials Laboratory (RCP23MPC252L)**Suggested Experiments**

- 1 Tension test on mild steel bar (stress-strain behavior, determination of yield strength and modulus of elasticity) using a Universal Testing Machine (UTM).
- 2 Impact test on the metal specimen (Izod test/ Charpy test).
- 3 Hardness test on metals – (Brinell Hardness Number / Rockwell Hardness Number).
- 4 Flexural test on beam (central loading).
- 5 Flexural test on beam (two point loading).
- 6 Torsion test on mild steel bar / cast iron bar.

The above tests are conducted as per the ASTM standard.

Minimum 5 experiments from the above suggested list or any other experiment based on syllabus and minimum 5 assignments based on syllabus will be conducted or Mini project relevant to the subject will be included, which would help the learner to apply the concept learnt.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Advanced Manufacturing Processes (RCP23MPC253)		

Prerequisites:

1. Knowledge of fundamental machining techniques and various manufacturing processes.

Course Objectives:

1. To familiarize the students with unconventional modern machine tools & manufacturing practices.
2. To familiarize oneself with various micro manufacturing techniques like Meso, Micro and Nano manufacturing.
3. To acquaint the knowledge of additive manufacturing processes, and its capabilities in the modern digital manufacturing industry.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Illustrate the fundamentals of various non-conventional machining processes, highlighting their capabilities and areas of application.	L3	Apply
CO2	Explain the operation of MEMS micro devices and microsystems, including their applications and manufacturing processes, such as bulk and surface micromachining techniques.	L2	Understand
CO3	Apply micro machining techniques and use appropriate methods involved in MEMS packaging.	L3	Apply
CO4	Explain the principles of various nano-finishing techniques essential for enhancing surface quality and achieving ultra-smooth surfaces at the nanoscale level.	L2	Understand
CO5	Apply and use the fundamental principles of various additive manufacturing technologies including solid-based, liquid-based, and powder-based techniques, and determine the differences between traditional and additive manufacturing processes.	L3	Apply

Advanced Manufacturing Processes (RCP23MPC253)

Course Contents

Unit-I 09 Hrs.

Unconventional Machining

Unconventional machining processes:

Classification of the Non-traditional machining process. Basic principles, machines, advantage, disadvantages, and applications of water jet machining (WJM), Abrasive jet machining (AJM), abrasive water jet machining (AWJM), ultrasonic machining (USM), electrical discharge machining (EDM), chemical machining (CHM), electrochemical machining (ECM), laser beam machining (LBM), plasma arc machining (PAM), electron beam machining (EBM).

Introduction to Hybrid machining.

Unit-II 09 Hrs.

MEMS Fabrication

MEMS Introduction:

Intrinsic Characteristics of MEMS, Components of MEMS, Applications of MEMS and Microsystems, Overview of Commonly Used Mechanical Structures in MEMS (Beams, Cantilevers, Plates, Diaphragms), and Typical Applications.

MEMS Fabrication Technology

Challenges in Meso, Micro and Nano manufacturing, Overview about micro fabrication methods: Chemical vapour deposition (CVD); physical vapour deposition (PVD), optical and electron beam lithography; dry and wet etching.

Unit-III 07 Hrs.

Micro Machining

Micro Machining

Mechanics of micro machining, difference between micro and macro machining Micro turning, Micro Milling, Micro grinding.

MEMS packaging challenges, MEMS packaging process.

Unit-IV 07 Hrs.

Nano Finishing Techniques

Abrasive Flow Machining (AFM), Magnetic Abrasive Finishing (MAF), Magneto Rheological Finishing (MRF), Magneto Rheological Abrasive Flow Finishing (MRAFF), Magnetic Float Polishing (MFP), Elastic Emission Machining (EEM), Chemical Mechanical Polishing (CMP).

Unit-V

Additive Manufacturing (AM)

Introduction to Additive Manufacturing (AM):

History of AM, traditional manufacturing v/s additive manufacturing, discussion on various materials used in AM, role of solidification rate in AM, and the influence of grain structure and microstructure in AM.

Extrusion based AM processes:

Fused deposition modelling (FDM), history of FDM, basic principles, material requirements, benefits and limitations, and post-processing. Powder Bed Fusion AM Process: Selective laser sintering (SLS): process workflow and material requirements, powder fusion mechanism, polymer ageing and recycling. Vat Polymerization AM process: Stereo lithography apparatus (SLA), history of SLA, material requirements, workflow, scan patterns, applications, benefits and limitations.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Universal Human Values (RCP23XHS284)		

Prerequisites:

—

Course Objectives:

1. To help students distinguish between values and skills, and understand the need, basic guidelines, content and process of value education.
2. To help students initiate a process of dialog within themselves to know what they 'really want to be' in their life and profession
3. To help students understand the meaning of happiness and prosperity for a human being.
4. To facilitate the students to understand harmony at all the levels of human living, and live accordingly.
5. To facilitate the students in applying the understanding of harmony in existence in their profession and lead an ethical life.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Identify the need, relevance, and role of universal human values in personal, academic, and professional life.	L2	Understand
CO2	Demonstrate understanding of self-exploration, harmony in human relationships, and ethical conduct in daily interactions.	L3	Apply
CO3	Apply principles of trust, respect, and responsibility to foster sustainable and compassionate social environments.	L3	Apply
CO4	Analyze the interdependence between individual values, societal well-being, and ecological balance.	L4	Analyze
CO5	Use human values into decision-making processes for holistic development and responsible engineering practice.	L3	Apply

Universal Human Values (RCP23XHS284)

Course Contents

Unit-I

08 Hrs.

Course Introduction - Need, Basic Guidelines, Content and Process for Value Educations

Understanding the need, basic guidelines, content and process for Value Education, Self-Exploration-what is it? - its content and process; 'Natural Acceptance' and Experiential Validation- as the mechanism for self-exploration, Continuous Happiness and Prosperity- A look at basic Human Aspirations, Right understanding, Relationship and Physical Facilities- the basic requirements for fulfillment of aspirations of every human being with their correct priority, Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario, Method to fulfill the above human aspirations: understanding and living in harmony at various levels.

Unit-II

08 Hrs.

Understanding Harmony in the Human Being - Harmony in Myself

Understanding human being as a co-existence of the sentient 'I' and the material 'Body', Understanding the needs of Self ('I') and 'Body'. Understanding the Body as an instrument of 'I' (I being the doer, seer and enjoyer), Understanding the characteristics and activities of 'I' and harmony in 'I', Understanding the harmony of I with the Body; correct appraisal of Physical needs, meaning of Prosperity in detail, Programs to ensure Self-regulation and health.

Unit-III

12 Hrs.

Understanding Harmony in the Family and Society- Harmony in Human-Human Relationship

Understanding harmony in the Family- the basic unit of human interaction, understanding values in human-human relationship; meaning of Justice and program for its fulfillment. Trust and Respect as the foundational values of relationship, Understanding the meaning of Trust; Difference between intention and competence, Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship, Understanding the harmony in the society (society being an extension of family). Visualizing a universal harmonious order in society- Undivided Society, Universal Order- from family to world family!

Unit-IV

08 Hrs.

Understanding Harmony in the Nature and Existence - Whole existence as Co-existence

Understanding the harmony in the Nature, Interconnectedness and mutual fulfillment among the four orders of nature- recyclability and self regulation in nature. Understanding Existence as Co-existence of mutually interacting units in all pervasive space, Holistic perception of harmony at all levels of existence.

Implications of the above Holistic Understanding of Harmony on Professional Ethics

Natural acceptance of human values, Definitiveness of Ethical Human Conduct, Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order, Competence in Professional Ethics: a) Ability to utilize the professional competence for augmenting universal human order, b) Ability to identify the scope and characteristics of people friendly and eco-friendly production systems, technologies and management models, Case studies of typical holistic technologies, management models and production systems, Strategy for transition from the present state to Universal Human Order: a) At the level of individual: as socially and ecologically responsible engineers, technologists and managers, b) At the level of society: as mutually enriching institutions and organizations.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Project Management (RCP23XOE261)		

Prerequisites:

1. Basic concepts of Management.

Course Objectives:

1. To familiarize the students with the use of a structured methodology/approach for every unique project undertaken, utilizing project management concepts, tools and techniques.
2. To appraise the students with the project management life cycle and make them knowledgeable about the various phases from project initiation through closure.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain the project management life cycle, project phases, and the roles and responsibilities of a project manager.	L2	Understand
CO2	Apply project selection criteria to select an appropriate project from available alternatives.	L3	Apply
CO3	Apply project management tools to develop a Work Break-down Structure (WBS), prepare a basic project schedule, and identify major project risks.	L3	Apply
CO4	Analyze project performance using Earned Value Management techniques and evaluate lessons learned during project execution for future improvement.	L4	Analyze
CO5	Analyze the Waterfall and Agile Scrum methodologies for software development projects.	L4	Analyze

Project Management (RCP23XOE261)

Course Contents

Unit-I 08 Hrs.

Project Management Foundation

Definition of a project, Project Vs Operations, Necessity of project management, Triple constraints, Project life cycles (typical atypical). Project phases and stage gate process. Role of project manager, Negotiations and resolving conflicts, Introduction to project leadership, ethics in projects, Multicultural and virtual projects, Project management in various organization structures, PM knowledge areas as per Project Management Institute (PMI).

Unit-II 09 Hrs.

Initiating Projects

How to get a project started, selecting project strategically, Project selection models (Numeric /Scoring Models and Non-numeric models), Project portfolio process, Project sponsor and creating charter, Effective project team, Stages of team development & growth (forming, storming, norming & performing), team dynamics.

Unit-III 08 Hrs.

Project Planning and Risk Management

Project Planning: Work Breakdown structure (WBS) and linear responsibility chart, Project cost estimation and budgeting, Top down and bottoms up budgeting, Networking and Scheduling techniques, PERT, CPM. Crashing project time & Resource loading and levelling (Only Theory), Project Stakeholders and Communication plan.

Risk Management in projects: Risk management planning, Risk identification and risk register, Qualitative and quantitative risk assessment, Probability, and impact matrix. Risk response strategies for positive and negative risks.

Unit-IV 08 Hrs.

Monitoring and Controlling Projects

Monitoring and Controlling Projects: Planning monitoring and controlling cycle, Information needs and reporting, engaging with all stakeholders of the projects, communication and project meetings. Earned Value Management techniques for measuring value of work completed, using milestones for measurement, change requests and scope creep, Project audit, Project Contracting: Project procurement management, contracting and outsourcing.

Closing the Project: Customer acceptance, Reasons of project termination, Various types of project terminations (Extinction, Addition, Integration, Starvation), Process of project termination, completing a final report, doing a lessons learned analysis, acknowledging successes and failures.

Unit-V 09 Hrs.

Agile Project

Agile project management: Agile principle, Agile Manifesto, Agile process framework, Characteristics of Agile Approaches and Scrum, Benefits of Agile project management, Implementing Agile project management.

Agile Project Planning: Comparison of Agile Project Management with Traditional Waterfall Approach, Project Planning with Scrum, Scrum Artifacts Supporting Project Planning , Scrum Events for Project Planning. Scheduling with scrum, Techniques for scrum scheduling- Poker estimation. Agile Tools for Tracking Project Progress: Task Boards, Burnup and Burndown Charts.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Cyber Security, Policies and Laws (RCP23XOE262)		

Prerequisites:

1. Fundamentals of Computers.

Course Objectives:

1. Familiarize with the provisions and implications of the Digital Personal and Data Protection Act, the obligations of data fiduciaries, the rights and duties of data principals, and mechanisms for resolving breaches.
2. Equip individuals and organizations with the knowledge and tools to create secure cyber ecosystems, strengthen regulatory frameworks, and develop incident response plans.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain the types of cybercrimes and interpret relevant legal frameworks related to digital personal data protection.	L2	Understand
CO2	Apply cybersecurity strategies based on the National Cyber Security Policy to address common security threats.	L3	Apply
CO3	Apply appropriate law enforcement strategies to both, prevent and control cybercrime.	L3	Apply
CO4	Comprehend regulations and strategies pertaining to AI (Artificial Intelligence) and large language models.	L2	Understand

Cyber Security, Policies and Laws (RCP23XOE262)

Course Contents

Unit-I 09 Hrs.

Cyber Crime

Definition and Origin of the Word, Cyber Crime and Information Security, who are Cyber Criminals, Classification of Cybercrimes, E-mail Spoofing, Spamming, Cyber Defamation, Internet Time Theft, Salami Attack, Salami technique Data Diddling, Forgery, Newsgroup Spam, Online Frauds, Pornographic Offenders, Email Bombing, Password Sniffing, Credit Card Frauds.

Unit-II 09 Hrs.

Cyber Offenses

How Criminals plan them, Categories of Cyber Crimes, How Criminal Plans the Attack: Active Attacks, Passive Attacks, Social Engineering, Classification of Social Engineering, Cyber Stalking: types of Stalkers, Cyber Cafe and Cyber Crimes, Botnets, Attack Vectors, Cyber Crime and Cloud Computing.

Unit-III 08 Hrs.

Indian IT Act

Cyber Crime and Criminal Justice, Penalties, Adjudication and Appeals Under the IT Act, 2000, IT Act. 2008 and its Amendments Security aspect in Cyber-Law, The Contract Aspects in Cyber Law, The Security Aspect of Cyber Law, Security Standards: SOX, GLBA, HIPAA, NIST Cyber Security Framework (CSF).

Unit-IV 08 Hrs.

India's Digital Personal and Data Protection Act (2023)

Preliminary, Obligations of Data Fiduciary, Rights and Duties of Data Principal, Special Provisions, Data Protection Board of India, Powers, Functions and Procedure to Be Followed by Board, Appeal and Alternate Dispute Resolution, Penalties and Adjudication.

Unit-V 08 Hrs.

India's AI Regulation and Strategy

Privacy, Security and Artificial Intelligence, Differential Privacy, Security in AI. National Artificial Intelligence Strategy, Principles for Responsible AI, Information Technology (Intermediary Guidelines and Digital Media Ethics Code-2021), Draft National Data Governance Framework Policy (NDGFP), Rules against Deepfakes, Due diligence advisory for AI, AI regulations framework (June 2024).

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Advanced Operations Research (RCP23XOE263)		

Prerequisites:

1. Operation Research
2. Mathematics (Calculus)

Course Objectives:

1. To develop an ability to analyse the structure and mathematical model of various complex system occurring in manufacturing system, service system, and business applications.
2. To develop knowledge of the mathematical structure of linear and nonlinear optimization models.
3. To develop an understanding of the techniques used to solve linear and nonlinear optimization models using their mathematical structure.
4. To develop an understanding of the use of modelling languages for expressing and solving optimization models.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Apply Duality theory to solve linear programming problem and analyse optimum solution.	L4	Analyze
CO2	Construct linear integer programming models and apply the O.R. algorithms and techniques to solve linear integer programming problems.	L3	Apply
CO3	Determine best satisfying solution under a varying quantity of resources and priorities of the goals.	L3	Apply
CO4	Set up decision models and solve nonlinear programming-unconstrained optimization problems.	L3	Apply
CO5	Set up decision models and solve nonlinear programming-constrained optimization problems.	L4	Analyze

Advanced Operations Research (RCP23XOE263)

Course Contents

Unit-I **07 Hrs.**

Dual Linear Programs

Primal, dual, and duality theory - The dual simplex method -The primal-dual algorithm-Duality applications. Post optimization problems: Sensitivity analysis.

Unit-II **07 Hrs.**

Integer Programming

Pure and mixed integer programming problems, Solution of Integer programming problems – Gomory’s all integer cutting plane method and mixed integer method, branch and bound method, Zero-one programming.

Unit-III **06 Hrs.**

Goal Programming

Concept of Goal Programming, GP model formulations, Graphical method of GP, The simplex method of GP, Application areas of GP.

Unit-IV **11 Hrs.**

Nonlinear Programming- Unconstrained optimization

Minimization and maximization of convex functions- Local & Global optimum- Convergence-Speed of convergence. one-dimensional unconstrained optimization – Newton’s method – Golden-section search method , multidimensional unconstrained optimization –Gradient method — steepest ascent (descent) method – Newton’s method.

Unit-V **11 Hrs.**

Nonlinear Programming- Constrained optimization

Constrained optimization with equality and inequality constraints. Lagrangian method - Sufficiency conditions - Kuhn-Tucker optimality conditions Rate of convergence - Engineering Applications Quadratic programming problems-convex programming problems.

- 5 Optimization Techniques in Operation Research, C. B Gupta, I.K. International Publishing House Pvt. Limited, 2008.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Corporate Finance Management (RCP23XOE264)		

Prerequisites:

—

Course Objectives:

1. Overview of Indian financial system, instruments and market.
2. Basic concepts of value of money, returns and risks, corporate finance, working capital and its management.
3. Knowledge about sources of finance, capital structure, dividend policy.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Describe Indian finance system.	L2	Understand
CO2	Apply concepts of time value money and risk returns to product, services and business.	L3	Apply
CO3	Explain corporate finance and working capital management.	L2	Understand
CO4	Apply Investment and finance decisions.	L3	Apply
CO5	Apply dividend decisions.	L3	Apply

Corporate Finance Management (RCP23XOE264)

Course Contents

Unit-I **09 Hrs.**

Indian Financial System

Overview of Indian Financial System: Characteristics, Components and Functions of Financial System.

Financial Instruments: Meaning, Characteristics and Classification of Basic Financial Instruments - Equity Shares, Preference Shares, Bonds-Debentures, Certificates of Deposit, and Treasury Bills.

Financial Markets: Meaning, Characteristics and Classification of Financial Markets - Capital Market, Money Market and Foreign Currency Market.

Financial Institutions: Meaning, Characteristics and Classification of Financial Institutions - Commercial Banks, Investment-Merchant Banks and Stock Exchanges.

Unit-II **09 Hrs.**

Concepts of Returns and Risks and Time Value of Money

Concepts of Returns and Risks: Measurement of Historical Returns and Expected Returns of a Single Security and a Two-security Portfolio; Measurement of Historical Risk and Expected Risk of a Single Security and a Two-security Portfolio.

Time Value of Money: Future Value of a Lump Sum, Ordinary Annuity, and Annuity Due; Present Value of a Lump Sum, Ordinary Annuity, and Annuity Due; Continuous Compounding and Continuous Discounting.

Unit-III **08 Hrs.**

Overview of Corporate Finance and Working Capital Management

Overview of Corporate Finance: Objectives of Corporate Finance; Functions of Corporate Finance—investment Decision, Financing Decision, and Dividend Decision.

Working Capital Management: Concepts of Meaning Working Capital; Importance of Working Capital Management; Factors Affecting an Entity's Working Capital Needs; Estimation of Working Capital Requirements; Management of Inventories; Management of Receivables; and Management of Cash and Marketable Securities.

Unit-IV **08 Hrs.**

Capital Budgeting

Meaning and Importance of Capital Budgeting; Inputs for Capital Budgeting Decisions; Investment Appraisal Criterion—Accounting Rate of Return, Payback Period, Discounted Payback Period, Net Present Value (NPV), Profitability Index, Internal Rate of Return (IRR), and Modified Internal Rate of Return (MIRR).

Unit-V

Capital Structure and Dividend Policy

Capital Structure: Factors Affecting an Entity's Capital Structure; Overview of Capital Structure Theories and Approaches — Net Income Approach, Net Operating Income Approach; Traditional Approach, and Modigliani-Miller Approach. Relation between Capital Structure and Corporate Value;

Concept of Optimal Capital Structure.

Dividend Policy: Meaning and Importance of Dividend Policy; Factors Affecting an Entity's Dividend Decision; Overview of Dividend Policy Theories and Approaches — Gordon's Approach, Walter's Approach, and Modigliani- Miller Approach.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Corporate Social Responsibility (RCP23XOE265)		

Prerequisites:

–

Course Objectives:

1. To make students understand the concept, theories and application of CSR for the Development of the Society.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain and critique the concept of CSR and its evolution, understanding its relevance and impact on stakeholders in both business and societal contexts.	L2	Understand
CO2	Apply ethical theories and frameworks to real-world CSR issues, demonstrating an understanding of ethical decision-making processes in business scenarios.	L3	Apply
CO3	Interpret CSR-related legislation and compliance requirements in India, particularly the Companies Act 2013, and assess how these laws shape corporate behaviour and responsibilities.	L2	Understand
CO4	Apply the key drivers of CSR in India, understanding market pressures, civil society influence, and regulatory frameworks, while assessing case studies of successful CSR initiatives.	L3	Apply
CO5	Use CSR strategies and community engagement programs that align with sustainable development goals, emphasising corporate volunteering, stakeholder engagement, and public-private partnerships.	L3	Apply

Corporate Social Responsibility (RCP23XOE265)

Course Contents

Unit-I 08 Hrs.

Introduction to Corporate Social Responsibility (CSR)

- Understanding the concept of CSR
- Historical evolution and development of CSR
- Importance and benefits of CSR for businesses and society
- Stakeholder theory and its relevance to CSR.

Unit-II 09 Hrs.

Ethical Foundations of CSR

- Ethical theories relevant to CSR (Utilitarianism, Deontology, Virtue Ethics)
- Ethical decision-making frameworks in business
- Corporate governance and ethics
- Ethical issues in supply chain management

Unit-III 09 Hrs.

CSR-Legislation in India and the World

Section 135 of Companies Act 2013. Scope for CSR Activities under Schedule VII, Appointment of Independent Directors on the Board, and Computation of Net Profit's Implementing Process in India.

Unit-IV 08 Hrs.

The Drivers of CSR in India

Market based pressure and incentives, civil society pressure, the regulatory environment in India Counter trends, Review of current trends and opportunities in CSR, Review of successful corporate initiatives and challenges of CSR. Case Studies of Major CSR Initiatives, Corporate Social Responsibility and Public-Private Partnership (PPP).

Unit-V 08 Hrs.

Social Responsibility and Community Engagement

- Social issues and challenges in contemporary society
- Corporate philanthropy and community development initiatives
- Stakeholder engagement strategies
- Corporate volunteering and employee engagement programs
- CSR as a strategic business tool vital for sustainable development

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Bioinformatics (RCP23XOE266)		

Prerequisites:

Nil

Course Objectives:

1. To provide an overview of bioinformatics and its significance in modern biological research.
2. To enable students to apply bioinformatics methods in practical scenarios for biological data analysis and interpretation.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Describe the structure and function of cells, organelles, and biomolecules.	L2	Understand
CO2	Explain the types of data stored in bioinformatics databases and their relevance to biological research.	L2	Understand
CO3	Discuss genomic databases and understand the structure and content of protein databases.	L2	Understand
CO4	Explain system biology concepts and molecular evolution.	L2	Understand
CO5	Apply knowledge of cellular and molecular biology concepts to analyze a biological problem.	L3	Apply

Bioinformatics (RCP23XOE266)

Course Contents

Unit-I 09 Hrs.

Foundations of Molecular and Cellular Biology

Introduction to molecular biology: DNA, RNA, proteins, and their roles in cellular processes.

Cell structure and function: Organelles, membrane structure, and cellular transport.

Cell cycle regulation: phases of the cell cycle, checkpoints, and cell cycle control mechanisms.

Unit-II 09 Hrs.

Genetics and Genomics

Mendelian genetics: Inheritance patterns, Punnett squares, and genetic crosses Chromosome structure and organization: karyotyping, gene mapping, and genetic linkage.

Introduction to genomics: genome structure, organization, and variation.

Techniques in molecular genetics: PCR, DNA sequencing, and gene cloning.

Unit-III 08 Hrs.

Genomic and Protein Databases

Types of genomic databases such as GenBank, Ensemble, and UCSC Genome Browser, Understand the structure and content of protein databases such as UniProt and Protein Data Bank (PDB), Searching, Retrieving, and Analysing Genomic and Protein data from online databases.

Unit-IV 08 Hrs.

Systems Biology

Introduction to Systems Biology: Modeling biological systems and network analysis, Bioinformatics tools for systems biology and modeling complex biological processes.

Principles of molecular evolution: Mutation, Selection, and genetic drift.

Phylogenetic analysis: Tree construction, sequence alignment, and molecular clock.

Unit-V 08 Hrs.

Applications and Case Studies

Applications of Bioinformatics in Medicine, Agriculture, and Biotechnology, Case Studies (Integrating Cellular and Molecular Biology with Bioinformatics) and Research Examples, Ethical and Legal Issues in Bioinformatics, Future Trends and Emerging Technologies in Bioinformatics.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Human Resource Management (RCP23XOE267)		

Prerequisites:

—

Course Objectives:

1. To introduce the students with basic concepts, techniques and practices of the human resource management
2. To provide opportunity of learning Human resource management (HRM) processes, related with the functions, and challenges in the emerging perspective of today's organizations
3. To familiarize the students about the importance of the labour relations in the organization.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's De- scription
CO1	Explain the changing environment of the HRM and the role of the HR managers.	L2	Understand
CO2	Explain and analyze the recruitment process and the application of the IT.	L4	Analyze
CO3	Examine the importance of the training and development.	L2	Understand
CO4	Explain and determine the pay plans, performance appraisal and compensation.	L2	Understand
CO5	Explain the importance of the labour relation, the employee security and collective bargaining.	L2	Understand

Human Resource Management (RCP23XOE267)

Course Contents

Unit-I 08 Hrs.

Human Resource Function

Human Resource Philosophy – Changing environments of HRM – Strategic human resource management – Using HRM to attain competitive advantage – Trends in HRM – Organisation of HR departments – Line and staff functions – Role of HR Managers.

Unit-II 10 Hrs.

Recruitment & Placement

Job analysis: Methods - IT and computerised skill inventory - Writing job specification - HR and the responsive organisation.

Recruitment and selection process: Employment planning and forecasting - Building employee commitment: Promotion from within - Sources, Developing and Using application forms - IT and recruiting on the internet.

Employee Testing & selection: Selection process, basic testing concepts, types of test, work samples & simulation, selection techniques, interview, common interviewing mistakes, Designing & conducting the effective interview, small business applications, computer aided interview.

Unit-III 08 Hrs.

Training & Development

Orientation & Training: Orienting the employees, the training process, need analysis, Training techniques, special purpose training, Training via the internet.

Developing Managers: Management Development - The responsive managers - On-the-job and off the-job Development techniques using HR to build a responsive organisation.

Performance appraisal: Methods - Problem and solutions - MBO approach - The appraisal interviews - Performance appraisal in practice.

Managing careers: Career planning and development - Managing promotions and transfers.

Unit-IV 08 Hrs.

Compensation & Managing Quality

Establishing Pay plans: Basics of compensation - factors determining pay rate - Current trends in compensation - Job evaluation - pricing managerial and professional jobs - Computerized job evaluation.

Pay for performance and Financial incentives: Money and motivation - incentives for operations employees and executives - Organization wide incentive plans - Practices in Indian organizations.

Benefits and services : Statutory benefits - non-statutory (voluntary) benefits - Insurance benefits -retirement benefits and other welfare measures to build employee commitment.

Unit-V

Labour relations and employee security

Industrial relation and collective bargaining: Trade unions - Collective bargaining - future of trade unionism. Discipline administration - grievances handling - managing dismissals and separation.

Labour Welfare: Importance & Implications of labour legislations - Employee health - Auditing HR functions, Future of HRM function.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Digital Marketing Management (RCP23XOE268)		

Prerequisites:

—

Course Objectives:

1. Explain the evolution and technology of digital marketing, including underlying frameworks.
2. Understand digital business strategy and emerging business structures.
3. Cover digital marketing planning, operations setup, and implementation of search campaigns, alongside emerging concepts like Big Data, IoT, SMB, B2B marketing, and SoLoMo.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's De- scription
CO1	Describe the digital marketing framework, models, and consumer behaviour.	L2	Understand
CO2	Apply digital marketing strategies to promote a given product/service.	L3	Apply
CO3	Illustrate the terminology and concepts for developing web-specific media plans.	L3	Apply
CO4	Interpret concepts related to digital campaign management and revenue generation models.	L2	Understand
CO5	Apply global digital marketing technologies/tools to assess future trends.	L3	Apply

Digital Marketing Management (RCP23XOE268)

Course Contents

Unit-I

07 Hrs.

Introduction

Introduction to Digital Marketing:

Emergence of Digital Marketing as a tool, media consumption drivers for new marketing environment, applications and benefits of digital marketing.

Digital Marketing Framework:

Delivering enhanced customer value, market opportunity analysis and digital services development, ASCOR framework.

Digital Marketing Models Creation:

Factors impacting digital marketplace, value chain digitization, business models.

The Consumer for Digital Marketing:

Consumer behavior on the internet, evolution of consumer behavior models, managing consumer demand, integrated marketing communications (IMC).

Unit-II

12 Hrs.

Digital Marketing Strategy

Digital marketing Strategy Development :

Elements of assessment phase, macro-micro environmental analysis, marketing situation analysis.

Digital Marketing Internal Assessment and Objectives Planning :

Analyzing present offerings mix, marketing mix, core competencies analysis and internal resource mapping. Digital presence analysis, digital marketing objectives development and review.

Digital Marketing Strategy Definition :

Understanding digital business strategy and structures, consumer development strategy, offering mix for Digital, digital pricing models, managing promotional channels and developing the extended Ps- People, process, programs and performance.

Digital marketing Strategy Roadmap :

Developing digital marketing strategy roadmap, the 6s digital marketing implementation strategy, marketing across the product life cycle.

Unit-III

08 Hrs.

Digital Marketing Planning and Operations

Digital Marketing Planning and Setup :

Understanding digital media planning terminology and stages, steps to creating marketing communications strategy, introduction to search marketing, display marketing, social media marketing.

Digital Marketing Operations Setup:

Basics of lead generation and conversion marketing, website content development and management, elements of user experience, web usability and evaluation.

Unit-IV

08 Hrs.

Digital Marketing Execution

Digital marketing Execution :

Basic elements of digital campaign management, search execution, display execution, social media

execution, content marketing.

Digital marketing Execution Elements :

Digital revenue generation models, managing service delivery and payments, managing digital implementation challenges like e commerce, internal & external and consumer specific challenges.

Unit-V

07 Hrs.

Digital Business – Present and Future

Digital Marketing – Global Landscape, digital marketing overview – global spend, advertising spend, and technology/tools landscape.

Data technologies (Big data and IOT) impacting marketing, segment based digital marketing and SoLoMo – the next level of hyperlocal marketing.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Logistics and Supply Chain Management (RCP23XOE269)		

Prerequisites:

1. Latest trend of information technology in retail industry and logistic applications.

Course Objectives:

1. To develop advanced strategic thinking skills in supply chain management and logistics to effectively analyze and optimize supply networks.
2. To attain proficiency in leveraging cutting-edge tools and technologies to enhance supply chain efficiency and supply chain transformation.
3. Design and implement collaborative supply chain and sourcing strategies to promote information sharing and optimise coordination.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain the important role of supply chain management in today's business environment.	L2	Understand
CO2	Develop criteria and standards to achieve improved business performance by integrating and optimizing the total logistics and supply-chain process.	L6	Create
CO3	Summarize the value of information-based business logistics systems in improving accuracy and supporting decision-making at all levels of management.	L2	Understand
CO4	Describe current trends in supply chain information technology management.	L2	Understand
CO5	Use available technologies to enhance work performance and support supply chain functions, processes, transactions, and communications.	L3	Apply

Logistics and Supply Chain Management (RCP23XOE269)

Course Contents

Unit-I 05 Hrs.

Introduction

What Is Supply Chain Management? The Development Chain, Global Optimization, Managing Uncertainty and Risk, The Complexity in Supply Chain Management, Key Issues in Supply Chain Management.

Unit-II 07 Hrs.

Network planning

Introduction, Network Design- Data Collection, Data Aggregation, Transportation Rates, Mileage Estimation, Warehouse Costs, Warehouse Capacities, Potential Warehouse Locations, Service Level Requirements, Future Demand, Model and Data Validation, Solution Techniques, Key Features of a Network Configuration Supply Chain Planning; Inventory Positioning and Logistics Coordination-Strategic Safety Stock.

Unit-III 08 Hrs.

The Value of Information

Introduction, The Bullwhip Effect-Quantifying the Bullwhip Effect, The Impact of Centralized Information on the Bullwhip Effect, Methods for Coping with the Bullwhip Effect, Information Sharing and Incentives, Effective Forecasts, Information for the Coordination of Systems, Locating Desired Products, Lead-Time Reduction, Information and Supply Chain Trade-offs-Conflicting Objectives in the Supply Chain, Designing the Supply Chain for Conflicting Goals ,Decreasing Marginal Value of Information.

Unit-IV 08 Hrs.

Supply Chain Integration

Introduction, Push, Pull, and Push-Pull Systems-Push-Based Supply Chain, Pull- Based Supply Chain, Push-Pull Supply Chain ,Identifying the Appropriate Supply Chain Strategy, Implementing a Push-Pull Strategy The Impact of Lead Time Demand-Driven Strategies The Impact of the Internet on Supply Chain Strategies-what is E-Business, the Grocery Industry , the Book Industry , the Retail Industry and Impact on Transportation and Fulfillment.

Unit-V 07 Hrs.

Information Technology and Business Process

Introduction, The Importance of Business Processes, Goals of Supply Chain IT Supply Chain Management System Components, Decision-Support Systems IT for Supply Chain Excellence Sales and Operations Planning Integrating Supply Chain Information Technology. Implementation of ERP and Decision Support System.

Technology Standards

Introduction, IT Standards, Information Technology Infrastructure-Interface Devices, System Architecture and Electronic Commerce. Service-Oriented Architecture (SOA)-Technology Base: IBM and Microsoft and ERP Vendor Platform: SAP and Oracle. Radio Frequency Identification (RFID)- applications, point of sale data , business benefits and supply chain efficiency.

Books Recommended**Textbooks**

- 1 Sunil Chopra, Peter Meindl “Supply Chain Management-Strategy, Planning, and Operation”, Pearson Publications 2016
- 2 David Simchi-Levi, Philip Kaminsky, Edith Simchi-Levi, “Designing and Managing the Supply Chain-Concepts, Strategies, and Case Studies”, McGraw-Hill/Irwin 2008.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Design Thinking Laboratory (RCP23XHS283L)		

Prerequisites:

1. Basic understanding with the development life cycle of products, processes, software, or services.
2. Basic knowledge of iterative frameworks (not mandatory).

Course Objectives:

1. To introduce students to the fundamentals, history, and importance of design thinking and its role in solving complex real-world problems.
2. To develop students' empathy and user-research skills by teaching them how to gather insights, create personas, and map user journeys.
3. To equip students with the skills to define and reframe problem statements effectively, identifying opportunity areas and stakeholder touch-points.
4. To foster creative ideation, prototyping, and testing skills through hands-on exercises that incorporate strategic innovation and rapid prototyping techniques.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Explain the importance of a Human-Centric design approach for developing a solution.	L3	Understand
CO2	Apply innovative ideas to design sustainable solutions for real-world problems.	L4	Apply
CO3	Utilize design thinking principles to solve real-world problems.	L3	Apply

Design Thinking Laboratory (RCP23XHS283L)

Course Contents

Unit-I

08 Hrs.

Introduction to Design Thinking and Strategic Innovation

- Introduction to Design Thinking
 - Understanding the fundamentals of design thinking.
 - Exploring the history and evolution of design thinking.
 - The importance of empathy in the design thinking process.
 - Conduct market & industry research by observing and contextualizing various macro & micro trends.
 - Case Study - conduct their research on how Design Thinking helped solve some of the biggest and most critical problems of our time.
- Design Thinking for Strategic Innovation
 - Types of innovations, strategic innovation.
 - Features of strategic innovation.
 - Design thinking and strategic innovation.
 - Practices of integrating design thinking in strategic innovation.

Unit-II

04 Hrs.

Empathize Phase

- Techniques for conducting user research and gathering insights.
- Creating user personas and empathy maps.
- Practicing active listening and observation skills.
- To apply various empathizing techniques to the problem statement selected.
- Use walk-a-mile immersion and heuristic reviews to first empathize with end users and then to build an empathy map and customer journey map.

Unit-III

04 Hrs.

Define Phase

- Defining problem statements and reframing challenges.
- Tools for synthesizing research findings.
- Developing a clear and actionable problem statement.
- Start building from Persona map and conduct interviews/ Gemba walk to plot user's journeys from start to end.
- Define the problem space using the HMW statement. Now highlight areas of opportunities in the journey map and enlist potential channels/touchpoints as well as stakeholders for proposed solution interventions.

Unit-IV

06 Hrs.

Ideate Phase

- Generating creative ideas through brainstorming sessions.
- Techniques for divergent and convergent thinking.
- Prototyping and experimenting with ideas.
- Apply suitable ideation techniques to quickly generate diverse ideas that could be applied to target problem space – either partially or in full.
- Brain Writing – Build on each other's ideas and constructively creatively develop better ideas using SCAMPER technique.
- Evaluation of ideas.

Unit-V

06 Hrs.

Prototype and Validation

- Introduction to prototyping tools and techniques.
- Rapid prototyping methods.
- Testing prototypes with users and gathering feedback.
- Refining solutions based on user insights.
- Develop user storyboard to layout solution proposition in visual and easily explainable form. Run a quick peer validation.
- Peer-validated the storyboard.
- Build an interactive digital prototype using any digital rapid prototyping platform and seek user validation.

Design Thinking Laboratory (RCP23ILHSX02)

Suggested Experiments

- Below is a list of assignments/ activities/ experiments that would be carried out by students as a mini project in groups consisting of 3-4 students.
- Problem statement for these assignments/ activities/ experiments will be provided by facilitator/ instructor/ faculty to the groups/ teams/ batches within each class.
- This list of experiments will help students learn various design thinking methods and practice the corresponding tools available.
- **List of assignments/ activities/ experiments**

- 1 To conduct market and industry research and analyze case studies demonstrating the application of design thinking. (Increased understanding of how design thinking has been applied to solve critical problems in various contexts.)
- 2 To exercise empathizing techniques to understand the needs and pain points of a target audience.

- 3 Developing empathy maps and customer journey maps based on collected insights.
- 4 To exercise different tools and techniques (such as affinity diagrams, journey mapping, and user story mapping) for synthesizing research findings.
- 5 Develop user personas to represent different user archetypes and their needs concerning the problem at hand.
- 6 To practice SCAMPRE technique, Brainstorming and brain writing as a collaborative ideation technique to create multiple creative ideas / solution for the problem at hand.
- 7 Create a mind map to generate a wide range of solutions to a problem at hand.
- 8 To explore different prototyping tools and platforms, such as Adobe XD, Figma, Sketch, and InVision.
- 9 To Conduct rapid prototyping sessions to build low fidelity / High fidelity prototype based on the ideas generated in Ideation phase and iterate based on feedback received.
- 10 Develop a plan for implementing the final solution, considering factors like scalability and feasibility.
- 11 Conduct usability testing to gather feedback on prototypes. Use A/B testing to compare different versions of a solution and determine which performs better.

A minimum of five experiments from the above-suggested list or any other assignment based on the syllabus will be included, which would help the learner to apply the concept. The mini-project is mandatory.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Computer Aided Machine Drawing Laboratory (RCP23MSC251L)		

Prerequisites:

—

Course Objectives:

1. To study conventional representation of various machining and mechanical details.
2. To impart knowledge and skills of CAD modelling software.
3. To become conversant with 3D drafting of machine components from the given assembly/detail drawing.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Interpret the machine components from the assembly and detail drawing.	L2	Understand
CO2	Create 3D models of machine components using CAD software from the assembly and detail drawing.	L6	Create
CO3	Convert detailed drawings into assembly drawings and vice versa.	L3	Apply

Computer Aided Machine Drawing Laboratory (RCP23MSC251L)

Course Contents

Unit-I

10 Hrs.

Introduction of CAD Softwares

Review of graphic interface, various tools and settings for preparation of graphics workspace. Introduction of basic sketching commands (Line, circle, arc, rectangle, slot, spline, fillet, polygon, text, dimensioning, etc.) modify commands (move, trim, copy, replace, extend, split, offset, etc.), feature commands (extrude, revolve, loft, sweep, rib, coil, emboss, etc.) and navigational commands (Pan, zoom in, zoom out, orientation, etc.). Types of drawing sheets and its sizes, Drawing units, grid and snap, title block. Conversion of 3D views into orthographic projections of simple machine parts like (nuts, bolts, keys, screws, springs, etc.), Editing, Hidden line view, shaded view, render view, presentation of various views along with different orientations.

Unit-II

08 Hrs.

Introduction to Detail & Assembly Drawings

Details and assembly drawings:

Types of assembly drawings, part drawings, drawings for catalogues and instruction manuals, patent drawings, drawing standards, Introduction to unit assembly drawing, steps involved in preparing assembly drawing from details and vice-versa.

Geometric Dimensions and Tolerances (GD&T):

Introduction of Limits, fits, deviations, and tolerances with their applications, dimensioning with tolerances indicating various types of fits in details and assembly.

Threaded Fasteners:

Types of threads, thread designation, Thread terminology, sectional views of threads. ISO Metric (Internal & External), BSW (Internal & External), Square, Acme and American Standard thread, Conventional representation of threaded parts.

Unit-III

12 Hrs.

Preparation of details/assembly drawings of Machinery parts, Joints, Keys and Couplings

Machinery parts:

Clapper block, Single tool post, Lathe and Milling tail stock, jigs and fixtures.

Joints and Keys:

Cotter joints, knuckle joints, taper key, feather key, woodruff key, etc.

Couplings:

Muff coupling, flanged coupling, Protected type flange coupling, Pin type flexible coupling, Oldham's coupling and Universal Coupling.

Unit-IV

12 Hrs.

Preparation of details / assembly drawings of Bearings, pulleys, Pipe joints

Bearings:

Solid bearing, Bushed bearing, Pedestal bearing/Plummer block and footstep bearing.

Pulleys:

Flat belt pulleys, V-belt pulleys, rope pulleys, Fast and loose pulleys.

Pipe joints:

Flanged joints, Socket and spigot joint, Gland and stuffing box expansion joint and Union joint.

Unit-V

14 Hrs.

Preparation of details / assembly drawings of Valves, I.C. Engine Parts and RE

Valves:

Air cock, blow off cock, Steam stop valve, Gate valve, Globe valve and Non-Return Valve. I.C. Engine parts:

Piston, Connecting rod, Crankshaft, Carburetor, Injector and Spark plug.

Introduction to Reverse Engineering:

Historical Background, scope and task of Reverse Engineering in Modern Industries.

Computer Aided Machine Drawing Laboratory (RCP23MSC251L)

Suggested Experiments

A List of Laboratory Experiments (Any Six):

- 1 General machine elements - nuts, bolts, keys, cotter, screws, springs, etc. (any one)
- 2 Details/Assembly of Clapper block, Single tool post, Lathe and Milling tail stock, jigs and fixtures. (any one)
- 3 Details/Assembly of coupling - simple, muff, flanged Protected flange coupling, Oldham's coupling, Universal coupling. (any one)
- 4 Details/Assembly of ball and roller bearing, Pedestal bearing, footstep bearing. (any one)
- 5 Details/Assembly of different types of pulleys. (any one)
- 6 Details/Assembly of pipe joints - Flanged joints, Socket and spigot joint, Gland and stuffing box, expansion joint. (any one)
- 7 Details/Assembly of Air cock; Blow off cock, Steam stop valve, Gate valve, Globe valve, Non return Valve. (any one)
- 8 Details/Assembly of Piston, Connecting rod, Cross head, Crankshaft, Carburetor, Fuel pump, injector, and Spark plug. (any one)

Printouts / plots of the problems solved in practical class from the practical part of each module.

Problems from practical parts of each module should be solved using any standard CAD packages like Autodesk Inventor, Fusion 360, PRO-E, CATIA, Solid Works, etc

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Advanced Manufacturing Process Laboratory (RCP23MSC252L)		

Prerequisites:

1. Knowledge of fundamental machining techniques and various manufacturing processes.

Course Objectives:

1. To apply safety precautions and adhere to norms while demonstrating effective interpersonal skills for successful teamwork and hands-on learning.
2. To evaluate the effects of process parameters on various responses in non-conventional machining processes.
3. To fabricate a simple component using 3D printing techniques, and to fabricate and assemble mechanical components by applying various manufacturing techniques. To demonstrate expertise in CNC control systems by determining parameters and executing CNC programs for a range of machining operations.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Demonstrate lifelong learning with a commitment to professional, safety, environmental, and social responsibilities for career excellence.	L3	Apply
CO2	Apply and demonstrate fabrication and assembly of mechanical components using diverse manufacturing techniques.	L3	Apply
CO3	Assess the effects of process parameters on MRR, TWR in EDM of mild steel, and DOP, HOC in ECDM of glass.	L4	Analyze
CO4	Apply engineering expertise in additive manufacturing for the creation of functional 3D printed models.	L3	Apply
CO5	Apply CNC control systems, calculate technological parameters, and develop, simulate, and execute CNC programs for various machining operations.	L6	Create

Advanced Manufacturing Process Laboratory (RCP23MSC252L)

Suggested Experiments

- 1 To fabricate and assemble mechanical components through the application of conventional, non-conventional, and advanced manufacturing techniques. (16 hrs)
- 2 To analyze the influence of process parameters on the EDM process and determine the material removal rate (MRR), tool wear rate (TWR), and surface roughness of mild steel (M.S) using a copper electrode. (06 hrs)
- 3 To examine the effects of process parameters on ECDM and determine the depth of penetration (DOP) and hole overcut (HOC) in glass using a tungsten carbide electrode (06 hrs)
- 4 To fabricate a simple component using one of the 3D Printing techniques below 1) Selective laser printing (SLS) 2) Stereolithography (SLA) 3) Fused deposition modelling (FDM). (12 hrs)
- 5 To program, simulate, and fabricate a component on a CNC Vertical Machining Center, involving part programming, interpolation, contour motion, pocket milling (circular and rectangular), and mirror commands etc. (16 hrs)

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Semester Project II (RCP23XSC251P)		

Prerequisites:

—

Course Objectives:

1. Students are expected to design, simulate / implement a project based on the knowledge acquired from current semester subjects.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Analyze a survey of several available literature in the preferred field of study.	L4	Analyze
CO2	Describe various/alternate approaches to complete a project.	L2	Understand
CO3	Apply a collaborative project environment by interacting and dividing project work among team members.	L3	Apply
CO4	Use technical communication skills to present project work in the form of a technical report/paper.	L3	Apply
CO5	Apply teamwork and project management skills to plan, execute, and manage the research study.	L3	Apply

Semester Project II (RCP23XSC251P)

The purpose of introducing a semester project at the Second-year level is to provide exposure to students with a variety of projects based on the knowledge acquired from the semester subjects. This activity is supposed to enrich their academic experience and bring enough maturity to the student while selecting the project. Students should take this as an opportunity to develop skills in implementation, presentation, and discussion of technical ideas/topics. Proper attention shall be paid to the content of report, which is being submitted in partial fulfillment of the requirements of the Second-year, and it is imperative that a standard format be prescribed for the report.

Each student shall work on a project approved by the departmental committee approved by the Head of the Department. A group of 3 to 5 students (maximum allowed: 5 students in extraordinary cases, subject to the approval of the department committee and the Head of the department) shall be allotted for each Semester Project. Each group shall submit at least 3 topics for the Semester Project. The departmental committee shall finalize one topic for every group. The Semester Project Title or Theme should be based on the knowledge acquired during the semester. The project work shall involve sufficient work so that students get acquainted with different aspects of knowledge acquired from semester subjects.

Student is expected to:

- Select an appropriate project title based on acquired knowledge from current semester subjects.
- Maintain a Log Book of weekly work done (Log Book Format will be as per Table 1).
- Report weekly to the project guide along with the log book.

Table 1: Log Book Format

Sr	Week (Start Date:End Date)	Work Done	Sign of Guide	Sign of Coordinator
1				

Assessment Criteria:

- At the end of the semester, after confirmation by the project guide, each project group will submit a project completion report in the prescribed format for assessment to the departmental committee (including project guide).
- Assessment of the project (at the end of the semester) will be done by the departmental committee (including project guide).

Prescribed project report guidelines:

The Project Report (minimum of 25 pages) should include appropriate content for:

- Introduction
- Literature Survey,
- Related Theory
- Implementation details
- Project Outcomes, Conclusion
- References

Assessment criteria for the departmental committee (including project guide) for Continuous Assessment:

Guide will monitor weekly progress, and marks allocation will be as per Table 2.

Table 2: Continuous Assessment table

Sr	PRN	Name of Student	Student Attendance	Log Book Maintain	Literature Review	Depth of Understanding	Report	Total
			5	5	5	5	5	25

Assessment criteria for the departmental committee (including project guide) for End Semester Exam:

The departmental committee (including project guide) will evaluate the project as per Table 3.

Table 3: Evaluation Table

Sr	PRN	Name of Student	Project Selection	Design/ Simulation	model/ programming	Result Verification	Presentation	Total
			5	5	5	5	5	25

Each group shall present/publish a paper based on the semester project in reputed/peer-reviewed Conference/Journal/TechFest/Magazine before the end of the semester.

Program: Mechanical Engineering	S.Y. B.Tech.	Semester: IV
Programming for Data Analysis (RCP23MSC253)		

Prerequisites:

-

Course Objectives:

1. To understand the fundamentals of Python programming for engineering applications;
2. To develop basic coding and logical problem-solving skills;
3. To analyze engineering datasets using Python libraries;
4. To create graphical visualizations for engineering data interpretation;
5. To apply programming and analytics concepts to mechanical engineering problems.

Course Outcomes:

On completion of the course, the learner will be able to:

CO	Course Outcomes	Bloom's Level	Bloom's Description
CO1	Use basic programming structures to build simple Python scripts.	L3	Apply
CO2	Calculate engineering numerical by running Python library tools.	L3	Apply
CO3	Analyze and organization engineering datasets.	L4	Analyze
CO4	Create data visualizations for engineering interpretation.	L6	Create
CO5	Apply Python programming for simple mechanical engineering applications.	L3	Apply

Programming for Data Analysis (RCP23MSC253)

Course Contents

Unit-I 01 Hrs.

Introduction to Programming and Python Fundamentals

- Introduction to programming and computational thinking;
- Introduction to Python and its applications in engineering;
- Installation of Python and IDE overview;
- Python syntax and structure; Variables and data types;
- Input and output statements.

Unit-II 02 Hrs.

Control Structures and Engineering Computations

- Arithmetic and logical operators;
- Conditional statements (if, if-else, nested if);
- Looping statements (for loop, while loop);
- Simple engineering calculations using Python;
- Problem-solving using Python programs.

Unit-III 02 Hrs.

Functions and Modular Programming

- Functions and modular programming;
- User-defined functions;
- Built-in functions;
- Introduction to code reusability;
- Error handling concepts;
- File handling fundamentals.

Unit-IV 02 Hrs.

Python Data Structures and String Processing

- Introduction to lists;
- Tuples and dictionaries;
- String handling basics;
- Data manipulation techniques;
- Applications of data structures in engineering problems.

Unit-V

02 Hrs.

Numerical Computing with NumPy

- Introduction to NumPy;
- Arrays and matrix operations;
- Mathematical functions;
- Array indexing and slicing;
- Statistical operations;
- Engineering calculations using NumPy.

Unit-VI

02 Hrs.

Engineering Data Analytics Using Pandas

- Introduction to engineering data analytics;
- Introduction to Pandas library;
- Reading CSV and Excel datasets;
- Data cleaning basics;
- Sorting and filtering data;
- Data preparation for analysis.

Unit-VII

01 Hrs.

Data Visualization and Engineering Insights

- Introduction to data visualization;
- Plotting techniques;
- Introduction to Matplotlib;
- Engineering dashboard concepts;
- Data interpretation and engineering decision-making;
- Introduction to mathematical modeling.

Unit-VIII

02 Hrs.

Python Applications in Mechanical Engineering

- Introduction to engineering problem-solving using Python;
- Basic predictive calculations;
- Introduction to automation using Python;
- Sensor-based data interpretation;
- Simple engineering simulations;
- Introduction to AI-enabled engineering tools;
- Mini-project development using engineering datasets;
- Report generation and presentation.

Suggested Coursera Mapping

Module	Suggested Coursera Content Provider
Python Fundamentals	University of Michigan, Meta
Data Structures and Functions	Google, IBM
Numerical Computing	IBM, Microsoft
Data Analytics and Visualization	Google Data Analytics, IBM
Engineering Applications	DeepLearning.AI, AWS
